1 **I. INTRODUCTION**

2 Respondents' oppositions confirm both Respondent City of Los Angeles and Respondent  
3 County of Los Angeles use ALPRs to amass an enormous database of the movements of vehicles across  
4 Los Angeles, the overwhelming majority of which are associated with no crime, registration violation or  
5 even suspicion of wrongdoing. But when faced with a public records request for a narrow slice of this  
6 data that would illuminate the privacy concerns and determine whether the technology is being used to  
7 target vulnerable groups, Respondent have refused to comply. The California Public Records Act  
8 (PRA) mandates that "all public records are subject to disclosure unless the Legislature has expressly  
9 provided to the contrary." *Williams v. Superior Court*, 5 Cal. 4th 337, 346 (1993). The records at issue in  
10 this case, including a week's worth of license plate data, are not covered by any exemption expressly  
11 provided by the Legislature. As such they must be released.

12 Respondents' arguments fail to show otherwise. Respondents have claimed that the records can  
13 be withheld under the investigatory records exemption in § 6254(f);<sup>1</sup> the general public interest  
14 exemption in § 6255;<sup>2</sup> as information protected in § 6254(k) and the California Constitutional right to  
15 privacy; and as information protected by the "official information" privilege in Evidence Code § 1040.  
16 First, the records may not be withheld under § 6254(f). License plate cameras are not triggered by any  
17 suspicion of criminal wrongdoing and thus take pictures indiscriminately of all plates around them.  
18 Therefore, the vast majority of the data cannot be considered "investigative" under either any reasonable  
19 definition of the word or the case law interpreting this section of the statute. As such, the data are neither  
20 "records of investigations" or "investigative files." Second, the exemptions in both § 6255 and the  
21 protections for privacy though the California Constitution (through § 6254(k)) do not apply because the  
22 public interest served by disclosure of the narrow sliver of ALPR data Petitioners seek outweighs any  
23 interest in nondisclosure. Finally, the requested ALPR data also do not qualify as official information  
24 under Evidence Code § 1040 because the data was not obtained in confidence and is not confidential.

25 Because Respondents have failed to meet their burden of proving the records are exempt under at

26 \_\_\_\_\_  
27 <sup>1</sup> Respondents have failed to argue in their briefs—and thus have waived any claim—that the  
28 information at issue should be withheld as either intelligence information or security procedures records  
pursuant to § 6254(f).

<sup>2</sup> Only Respondent LAPD argues § 6255 applies.

1 least one of the claimed exemptions, this Court should grant Petitioners' Writ and order the records to be  
2 released.

3 Further, given the broad scope of the agencies' ALPR programs, the number of years those  
4 programs have been in operation, the small quantity of documents released, and the failure of either  
5 agency's declarant to address the records production, the Court should order Respondents to produce  
6 declarations describing their searches and indices of documents withheld.

## 7 **II. ARGUMENT**

8 The government bears the burden of demonstrating that the records at issue are exempt. *Comm'n*  
9 *on Peace Officer Standards & Training v. Super. Ct.*, 42 Cal. 4th 278, 299 (2007) (herein after "*Comm'n*  
10 *on POST*"). Respondents continue to claim that these records can be withheld under various exemptions;  
11 however, none of the claimed exemptions apply. And even if a small portion of the requested records  
12 that have been incorporated into the files of a criminal investigation could be considered exempt,  
13 Respondents are obligated to segregate and produce the parts of the records that do not fall under this  
14 exemption.

### 15 **A. The ALPR Data are Not Exempt from Disclosure Under § 6254(f) Because They are** 16 **Neither Records of Investigations nor Investigatory Files**

17 Respondents acknowledge they collect data on Los Angeles drivers *en masse*, without targeting  
18 particular individuals who are suspected of criminal activity. Respondents nonetheless argue that ALPR  
19 data are "investigatory . . . files" or "records of . . . investigations" of a local police agency that would  
20 be exempt under § 6254(f).

21 The California Supreme Court in *Haynie v. Superior Court*, 26 Cal. 4th 1061 (2001),  
22 distinguished between "investigatory . . . files" and "records of . . . investigations," and the standards for  
23 disclosure for each. In *Haynie*, a man detained and then released by LASD deputies while driving a van  
24 that ostensibly matched the description of a civilian tip sought records related to the basis for his  
25 detention, including "crime reports, arrest reports, evidence reports, use-of-force reports, canine reports,  
26 officer-involved-shooting reports, follow-up reports, handwritten notes, supervisors' reports, notes or  
27 reports of interviews of witnesses, and tape recordings." *Id.* at 1065. The court reaffirmed its prior  
28 holdings that "the exemption for [investigative] files applies only when the prospect of enforcement

1 proceedings is concrete and definite.” *Id.* at 1068 (citing *Williams v. Super. Ct.*, 5 Cal. 4th 337, 355  
2 (1993), and *Uribe v. Howie*, 19 Cal. App. 3d 194, 212-13 (1971) (internal quotation marks omitted)).  
3 But the court indicated that the exemption applied “only to information which is not itself exempt from  
4 compelled disclosure, but claims exemption only as part of an investigatory file.” *Id.* at 1069 (citation  
5 omitted). “[R]ecords of . . . investigations,” the court held, are independently exempt under the text of  
6 § 6254(f), and do not require any showing that “the prospect of enforcement is ‘concrete and definite.’”  
7 *Id.*

8 *Haynie* defined such “records of investigation exempted under section 6254(f)” as “only those  
9 investigations undertaken for the purpose of determining whether a violation of law may occur or has  
10 occurred.” *Id.* at 1071. Because *Haynie* had requested documents related to his detention and the bases  
11 for it, and “the investigation that included *the decision to stop Haynie and the stop itself* was for the  
12 purpose of discovering whether a violation of law had occurred and, if so, the circumstances of its  
13 commission[,] [r]ecords relating to that investigation are exempt from disclosure by section 6254(f),” *Id.*  
14 (emphasis added). However, as shown below, the facts in *Haynie* are very different from the facts in this  
15 case, and *Haynie*’s conclusion that the requested material was properly withheld as an investigatory  
16 “record” is inapplicable here.

### 17 **1. The ALPR Data are Not “Records” of Investigations**

18 Respondents argue that “all APLR data is investigatory” and thus absolutely exempt under the  
19 “records of investigations” clause of Section 6254(f). LAPD Br. at 4 (emphasis in original); LASD Br.  
20 at 4. However, because ALPRs scan surrounding vehicles indiscriminately without any criminal  
21 suspicion and without reference to any particular criminal investigation, and because the overwhelming  
22 majority of plate scans are simply used to accumulate a database of location information for future use,  
23 ALPRs scans are not “investigations” within any dictionary or common-sense definition of the word,  
24 nor within the scope of the case law interpreting this section of the statute.

25 As Petitioners noted in their opening brief and Respondents do not dispute, LPR cameras  
26 automatically photograph all plates within view, without the driver’s knowledge, without the officer  
27 targeting any particular car, and without any level of suspicion. The system immediately extracts the key  
28 data from the image—the plate number and time, data and location where it was captured—and runs that

1 data against “hot lists” of stolen vehicles, Amber alerts, wanted lists, etc. *See* Gaw Decl. ¶ 4; Gomez  
2 Decl. ¶ 5. At the instant a plate is scanned by an ALPR camera, not even the computer system itself—let  
3 alone the officer in the squad car—knows whether the license plate is linked to criminal activity. This is  
4 unlike any other surveillance technology in use by law enforcement today; even red-light cameras,  
5 which also capture an image of a vehicle’s license plate, are only triggered to save a picture of the plate  
6 when the vehicle has violated the law by entering an intersection after the light has turned red.<sup>3</sup> LPR  
7 systems collect millions of data-points weekly or perhaps even daily.<sup>4</sup>

8 All of the cases to which Respondents cite, and indeed all of the very small number of other  
9 cases holding documents exempt from disclosure under the “records of . . . investigations” clause of §  
10 6254(f), are distinguishable because they involve requests for documents related to targeted  
11 investigations into specific criminal acts — for example, a newspaper’s request for records of  
12 disciplinary proceedings against two deputies involved in a brutal beating of a drug suspect, *Williams*,  
13 *supra*, 5 Cal. 4th 337; a former police officer’s request for records relating to the “investigation of a  
14 local official for failing to account properly for public funds,” *Rivero v. Superior Court*, 54 Cal. App.  
15 4th 1048, 1051 (1997); and a newspaper’s request for records concerning the investigation of “two  
16 separate incidents of alleged police misconduct involving” a specific officer, *Rackauckas v. Superior*  
17 *Court*, 104 Cal. App. 4th 169, 171 (2002). Even the request in *Haynie* was for documents related to “the

---

18 <sup>3</sup> *See* LAPD, *Photo Red Light FAQs*, [http://www.lapdonline.org/get\\_informed/content\\_basic\\_view/1026](http://www.lapdonline.org/get_informed/content_basic_view/1026)  
19 (last visited March 3, 2014) (“The third video captures images of the front and rear of the vehicle,  
20 including the driver’s face and the license plate. . . . The red light camera enforcement system only  
21 captures vehicles that run the red light.”).

22 <sup>4</sup> LAPD Sgt. Gomez states in his declaration: “LAPD has 242 LPR equipped vehicles distributed  
23 throughout all LAPD police stations and in several specialized sections . . . [and] 32 fixed position LPR  
24 cameras in Southeast Area and Hollenbeck Area.” Gomez Decl. at ¶ 4. From an ALPR presentation  
25 produced by LASD, we know that “ALPR has the ‘ability’ to read more than 14,000 license plates  
26 during the course of a shift.” LASD Training, Bibring Decl., Exh. B at 32. By multiplying the number  
27 of LAPD vehicles equipped with LPR by the number of plates LASD says ALPR cameras can collect,  
28 we learn that, in a single shift, LAPD’s cameras can collect as many as 3.4 *million* plates. And yet, as  
Petitioners noted in their opening brief, the typical percentage of license plate scans that become  
connected to any kind of suspected crime or vehicle registration issue is only about 0.2 percent. ACLU,  
*You Are Being Tracked: How License Plate Readers Are Being Used to Record Americans’ Movements*,  
13-15 (July 2013) <https://www.aclu.org/technology-and-liberty/you-are-being-tracked-how-license-plate-readers-are-being-used-record>. This means license plate data is regularly collected from thousands,  
if not millions of innocent people all over Los Angeles every day without their knowledge or consent  
and stored in a database for years.

1 decision to stop Haynie and the stop itself,” which were “for the purpose of discovering whether a  
2 violation of law had occurred and, if so, the circumstances of its commission.” *Haynie*, 26 Cal. 4th at  
3 1071.<sup>5</sup>

4 The automated scans of license plates are not “investigations” within the meaning of *Haynie* or  
5 any of the cases to apply its rule. ALPRs do not involve a “decision” to stop and investigate; they do not  
6 involve any specific allegations of wrongdoing or any particular crime. ALPR scans are automated,  
7 mass surveillance undertaken without suspicion that the target is involved in any criminal activity,  
8 without a specific crime in mind, and indeed without the specific knowledge of or effort by any human  
9 police officer. Interpreting use of ALPRs as an “investigation” does not comport with an ordinary,  
10 common-sense understanding of the word — that when a law enforcement officer conducts an  
11 “investigation,” he or she is looking into specific criminal activity by a particular suspect, not  
12 indiscriminately gathering information on everyone in a community, whether or not that information  
13 will lead to evidence of criminal activity.<sup>6</sup> Collecting the license plate data for every vehicle that comes  
14 into view of a camera does not entail such targeted inquiry. As such, ALPR data cannot be considered  
15 records of investigations.

16 Moreover, because so few ALPR scans result in an immediate hit, the predominant effect of  
17 ALPR use is to create a database of plate scans for future use by law enforcement, who can query the  
18 database to address crimes that were not identified or perhaps not even committed at the time the plate  
19 was scanned. The accumulation of information because it might be useful in future in some unspecified  
20 case certainly is not an investigation within any reasonable meaning of the word.

## 21 **2. The Data are Not Investigative “Files”**

22 Section 6254(f) also shields from disclosure the contents of “investigatory . . . files.” A public  
23 agency may not “shield a record from public disclosure, regardless of its nature, simply by placing it in a  
24

---

25 <sup>5</sup> Respondents also cite to *Black Panther Party v. Kehoe*, 42 Cal. App. 3d 645 (1974). This case  
26 addressed records of “complaints” sent to state agencies rather than records of “investigations”  
27 conducted by law enforcement. Nevertheless, even the records sought in this case were tied to specific,  
28 individual citizen complaints “charging unethical or abusive practices by licensed collection agencies.”  
*Id.* at 648.

<sup>6</sup> Indeed, the Fourth Amendment was added to the United States Constitution to prevent “general  
warrants” that

1 file labeled ‘investigatory.’” *Williams*, 5 Cal. 4th at 355. Courts have also rejected the argument that  
2 § 6254(f) “appli[es] to any document which a public agency might, under any circumstances, use in the  
3 course of [an investigation]” because that would “create a virtual *carte blanche* for the denial of public  
4 access to public records.” *Id.* at 356 (citing *Uribe*, 19 Cal. App. 3d at 212-13). Rather, a file is exempt  
5 as investigatory “only when the prospect of enforcement proceedings [becomes] concrete and definite.”  
6 *Id.* at 355 (quoting *Uribe*, 19 Cal. App. 3d at 212).

7 Respondents’ declarations show that ALPR data are exactly what *Williams* teaches that  
8 investigatory files are not: vast stores of information that Respondents are holding because they “might,  
9 under [some] circumstances, use [them] in the course of an investigation.” *Id.* at 356. Respondents  
10 declarations’ show that officers query their accumulated ALPR data to see if any might be relevant to an  
11 investigation. But while Respondents are collecting data on as many as several million license plates  
12 every day, data suggest that only about 1 in 500 scans (or 0.2 percent) becomes connected to “any kind  
13 of crime, wrongdoing, minor registration problem, or even suspicion of a problem.”<sup>7</sup> Respondents  
14 therefore have not shown and cannot show that the data have been incorporated into investigatory files  
15 where the prospect of enforcement is “concrete and definite.” *Uribe*, 19 Cal. App. 3d at 212.<sup>8</sup> As such,  
16 these data are not investigatory files and must be released.

17  
18  
19 <sup>7</sup> ACLU, *You Are Being Tracked*, *supra* note 5 at 13-15.

20 <sup>8</sup> The City suggests that ALPR data that might actually be used in an investigation cannot be released,  
21 and that the data is not segregable because it might become useful in a criminal investigation. Gomez  
22 Decl. ¶ 8. This fails for several reasons. First, if the raw ALPR data does not indicate which of the  
23 millions of plate scans are vehicles that are not targets of an investigation, then it does not represent  
24 “investigatory . . . files.” Public records do not constitute “investigatory . . . files” just because the  
25 contents might be germane to an investigation — for example, just because a criminal investigation may  
26 involve writing down the phone numbers of targets does not mean that the entire phone book is an  
27 investigatory record because the numbers are also listed there.

28 Second, even if the court were to find that the tiny fraction of plates that might be separately  
relevant to investigations did constitute “investigatory . . . files,” then those plates could be redacted —  
even if the “system” cannot segregate data that is germane to investigations, it can be redacted manually  
as any other record subject to disclosure under the CPRA. Finally, the fact that data that is not  
associated with a crime might one day become associated with a crime, Gomez Decl. ¶ 8, is exactly the  
kind of speculative concern that the Supreme Court rejected when it limited the exception to  
investigations where the prospect of enforcement is “concrete and definite.” *Williams*, 5 Cal. 4th at 355-  
56 (quotation omitted).

1           **B.     The Catch-All Exemption in § 6255 Does Not Justify Withholding ALPR Data**

2           Respondent City argues that ALPR data should be withheld under the catch-all exemption in  
3 § 6255 that applies when “the public interest served by not disclosing the record clearly outweighs the  
4 public interest served by disclosure.” Gov’t Code § 6255(a); *see also Cal. State Univ., Fresno Assn., Inc.*  
5 *v. Super. Ct.*, 90 Cal. App. 4th 810, 831 (2001) (noting that the “burden of proof is on the proponent of  
6 nondisclosure, who must demonstrate a ‘clear overbalance’ on the side of confidentiality”). Respondent  
7 City argues that there is a clear overbalance in favor of nondisclosure based on their description of the  
8 public interest in disclosure as “weak and largely speculative.” City Br. at 11-12. This characterization  
9 ignores both facts and law.

10           First, Respondent City derides the “potential for abuse” from ALPRs as “speculative,” arguing  
11 that such speculation or “suspicions about improper motives or actions by police officers ... does not  
12 constitute a strong public interest in disclosure.” City Br. at 12. But this logic undercuts the very purpose  
13 of the CPRA, which is to provide the public with access to documents necessary to determine whether or  
14 not abuses are taking place and, therefore, to allow the public to provide a check on government: “In  
15 order to verify accountability, individuals must have access to government files. Such access permits  
16 checks against the arbitrary exercise of official power and secrecy in the political process.” *Int’l Fed’n*  
17 *of Prof’l and Technical Engineers, Local 21, AFL-CIO v. Super. Ct.*, 42 Cal. 4th 319, 328-329 (2007)  
18 (hereinafter “*IFPTE*”). It would stand the CPRA on its head to require a requestor to show some factual  
19 basis to believe abuse has actually occurred in order to obtain public records, as the City seems to  
20 suggest, rather than recognizing the public interest in disclosure of documents that would illuminate  
21 whether or not abuse has occurred. And even beyond the ordinary presumption of disclosure, *see Cal.*  
22 *Const.*, art. I, § 3 (b)(1), there is a strong public interest in disclosure of records related to police because  
23 of the power police wield. *Comm’n on POST*, 42 Cal. 4th at 300 (“The public has a legitimate interest  
24 not only in the conduct of individual [police] officers, but also in how the Commission and local law  
25 enforcement agencies conduct the public’s business.”); *see also N.Y. Times Co. v. Superior Court*, 52  
26 Cal. App. 4th 97, 104-05 (1997) (“To maintain trust in its police department, the public must be kept  
27 fully informed of the activities of its peace officers.”). Respondents admit they maintain a program of  
28 collecting ALPR data and thus are broadly gathering data on the public’s movements. The fact that such

1 a program implicates privacy rights so strongly and holds the potential for abuse if monitoring is  
2 directed at certain communities creates a strong public interest in access to information about how the  
3 program actually operates.

4         Second, the City suggests there is no potential for abuse because ALPRs scan license plates  
5 “automatically” and “indiscriminately,” and cannot “selectively scan only plates affixed to vehicles  
6 driven by Muslims, gays, those on their way to political demonstrations, or others whom... [police] seek  
7 to target.” City Br. at 12. This simplistic account is utterly misleading. While the computerized ALPR  
8 device does not distinguish between vehicles but scans all plates within its viewing range, police can  
9 easily use ALPRs to target certain groups by deciding where to use them. Police could target Muslims  
10 by driving an ALPR car around the parking lot of a mosque during Ramadan prayers. They could circle  
11 parking lots or streets around a gay bar or political meeting to collect plates of likely patrons or  
12 attendees, or sweep the streets around a political protest to capture the plates of likely protestors. And  
13 although one declaration describes ALPRs as being distributed across the jurisdiction, the raw data will  
14 show if ALPRs are deployed primarily in particular communities of color, creating a disproportional  
15 impact on those residents’ privacy. The public can only debate whether police should have ALPRs and  
16 what limitations might be necessary if they understand how police actually use the technology, which  
17 only the underlying data can show. *Cf. In re Sealing & Non-Disclosure*, 562 F. Supp. 2d 876,  
18 886 (S.D. Tex. 2008) (“Cumulatively considered, these secret orders, issued by the thousands year after  
19 year . . . may conceal from the public the actual degree of government intrusion that current legislation  
20 authorizes. It may very well be that, given full disclosure of the frequency and extent of these orders, the  
21 people and their elected representatives would heartily approve without a second thought. But then  
22 again, they might not.”).

23         Third, the public interest arises not only from concerns about targeting but in understanding how  
24 complete a picture of movements ALPRs are currently providing to police. Are there residents whose  
25 plates are scanned dozens of times in a single week? Hundreds of times? This information helps the  
26 public evaluate the threat to privacy posed by ALPRs.

27         Fourth, Respondent City argues that the public “has strong interest in ensuring that police  
28 investigations are not compromised by the public release of investigatory information.” City Br. at 11.

1 Of course, if the ALPR were actual investigatory information, it would be exempt under § 6254(f). If it  
2 is not investigatory information but merely information that might one day be used for an investigation,  
3 then this argument ignores the balance struck by § 6254(f) and should be rejected. Moreover, as this  
4 argument suggests that a person should not even have access to ALPR data gathered about his or her  
5 own movements, the balance swings significantly in favor of disclosure because no privacy interest is at  
6 stake.

7 On balance, the public interest in nondisclosure of such a limited request for ALPR data falls far  
8 short of “clearly outweigh[ing]” the interests in disclosure. Gov’t Code § 6255(a). But even if the court  
9 were to find the balance favored nondisclosure, all Respondents’ arguments concern the interests in  
10 nondisclosure of information that identifies particular vehicles. These interests could be addressed by  
11 redacting the license plate information from the data — for example, by assigning a unique but  
12 anonymous numerical ID for each license plate— to protect individual privacy interests (or prevent  
13 criminals from knowing if where their cars have been scanned) while still providing the public with  
14 enough data to partially assess Respondents’ practices. *See, e.g., CBS, Inc. v. Block*, 42 Cal. 3d 646, 655  
15 (1986) (recognizing that where public interest favoring disclosure conflicts with information about  
16 individuals that “entail[s] a substantial privacy interest . . . In such special cases, the confidential  
17 information [about that individual] may be deleted.”).

### 18 **C. No Other Provision of Law Bars Disclosure of ALPR Data**

19 Respondents argue that ALPR data is exempt from disclosure under the CRPA pursuant to  
20 § 6254(k), because its disclosure would be prohibited by other provisions of state law, although they  
21 differ on which other provisions they invoke. The City argues that protection for privacy as an  
22 “inalienable right” in Article I, section 1 of the California Constitution precludes disclosure, while the  
23 County argues that the information is protected pursuant to the “official information” privilege in  
24 Evidence Code § 1040. Neither argument has merit.

#### 25 **1. *The Privacy Protections in the California Constitution Do Not Bar Disclosure of 26 the Requested ALPR Data***

27 Petitioners do not dispute that members of the public have a strong privacy interest in the  
28 location information contained in ALPR data, nor that such a privacy interest is protected by Article I,  
section 1 of the California constitution, which provides that privacy is an “inalienable right.” But unlike

1 other provisions commonly incorporated by § 6254(k) — such as the “official information” privilege of  
2 Evidence Code § 1040 for documents reflecting information acquired in confidence, or the exemption  
3 for peace officers personnel records in § 832.7, for example — Article 1, section 1 does not on its face  
4 create a privilege or bar disclosure of any particular class of documents.

5 The City assumes, without citation or support, that just because there is a privacy interest in a  
6 public record — even a constitutionally protected one — that disclosure of that public record under the  
7 CPRA is categorically prohibited, without consideration of other factors such as the strength of the  
8 interest or the public interest in disclosure. But such a conclusion runs contrary to the CPRA’s explicit  
9 handling of privacy concerns in § 6254(c), which bars disclosure of “[p]ersonnel, medical, or similar  
10 files, the disclosure of which would constitute an unwarranted invasion of personal privacy.” That  
11 exemption “requires [courts] to balance two competing interests... — the public’s interest in disclosure  
12 and the individual’s interest in personal privacy.” *IFPTE*, 42 Cal. 4th at 329-30 (quoting § 6254(c)). In  
13 *IFPTE*, petitioners sought disclosure of public salary information. The California Supreme Court and all  
14 parties agreed that government employees had a privacy interest (indeed a constitutionally protected  
15 one) in their financial information. *Id.* at 330. Nonetheless, the Court evaluated the strength of that  
16 interest and balanced it against “the strong public interest in knowing how the government spends its  
17 money.” *Id.* at 333. If invocation of privacy interests under § 6254(c) requires balancing private interests  
18 with public interest in disclosure, it would be anomalous to bypass such balancing simply because the  
19 government instead invoked § 6254(k) and the constitutional right of privacy.

20 Therefore, under the California Constitution, as under § 6254(c), this court must balance the  
21 privacy interests against the interests in disclosure, just as under § 6255. For the same reasons articulated  
22 in the analysis under § 6255, *supra*, withholding of ALPR data is not justified.

23 a. Respondents Offer No Support for their Proposed Rule that Any Data  
24 Collected By the Government on Members of the Public is Exempt under the  
25 CPRA

26 In its argument under the privacy protections of the California Constitution, the City contends  
27 that data about members of the public for which the government is just the custodian should generally be  
28 exempt under the CPRA. *See City Br.* at 8-9. In support of this point, Respondents cite two cases: *U.S.*  
*Dep’t of Justice v. Reporters’ Comm. for Freedom of Press*, 489 U.S. 749 (1989), and *Westerbrook v.*

1 *County of Los Angeles*, 27 Cal. App. 4th 157 (1994), which conclude that that criminal history  
2 information (or “rap sheets”) are protected against disclosure under federal law and California law,  
3 respectively. But neither case justifies the broad, categorical rule the City advocates. In *Reporters’*  
4 *Committee*, the Supreme Court held that rap sheets for of suspected members of the mafia were exempt  
5 from disclosure under the federal Freedom of Information Act (“FOIA”) based on its interpretation of  
6 FOIA’s exemption for information gathered for law enforcement purposes where there is an  
7 “unwarranted invasion of personal privacy.” 489 U.S. 749 at 751 (quoting 5 U.S.C. § 552(b)(7)(C)). But  
8 that case is notably distinguishable for two reasons: First, in finding computerized rap sheets exempt  
9 from disclosure, the Court relied heavily on the federal Privacy Act’s protections against disclosure of  
10 “compiled computerized information.” *Id.* at 766 (citing H. R. Rep. No. 93-1416, p. 7 (1974) (noting  
11 Privacy Act reflected legislative concern with “the impact of computer data banks on individual  
12 privacy”); 5 U.S.C. § 552a(b) (barring disclosure of records except pursuant to request by, or with  
13 consent of, person to whom record pertains)). Respondents cite no analogous provision of California law  
14 that would specifically bar disclosure of ALPR data. Second, *Reporters’ Committee* involved requests  
15 for criminal history of suspected mafia members, which is significantly more embarrassing and invasive  
16 than a request for a single week of ALPR data. Indeed, the *Westerbrook* court noted that *Reporters*  
17 *Committee* was “distinguishable . . . in several respects, including the fact that the information sought in  
18 that case was the rap sheets of four persons believed to be connected with organized crime, and the case  
19 was decided under the federal Privacy Act of 1974 (5 U.S.C. § 552a) rather than a specifically  
20 controlling statute.” *Westerbrook*, 27 Cal. App. 4th at 166.

21 Similarly, the issues arising here under the Article 1, section 1 are entirely distinguishable from  
22 the grounds for decision in *Westerbrook*. There, the court held that under California law, municipal  
23 courts have no duty to disclose criminal “rap sheets” from the municipal court information system,  
24 which contain not just the pending criminal charges but a significant amount of other information  
25 including physical identifiers, social security number, drivers license number, police disposition, and  
26 offenses charged.<sup>9</sup> But *Westerbrook* relied on neither § 6254(f) nor the California Constitution’s

27 \_\_\_\_\_  
28 <sup>9</sup> The records sought in *Westerbrook* revealed “name, aliases, monikers, address, race, sex, date of birth,  
place of birth, height, weight, hair color, eye color, CII number, FBI number, social security number,

(cont’d)

1 protection for privacy, and included no discussion of CPRA exemptions or the balancing at issue here.  
2 Instead, the court relied on specific statutory provisions regulating the information available from master  
3 criminal calendars in Penal Code 13300, which limits information available from master criminal  
4 records, as evincing Legislative intent that “nondisclosure of criminal offender record information [is]  
5 the general rule.” *Westbrook*, 27 Cal. App. 4th at 164.<sup>10</sup> The court also reasoned that making the  
6 requested criminal records public would interfere with courts’ ability to seal or destroy records if a  
7 criminal defendant were found factually innocent or completed a diversion program, thus subverting  
8 provisions of the Penal Code allowing such sealing or destruction of records. Here, there are no specific  
9 statutory protections for ALPR data that would be analogous to Penal Code 13300. Nor are there any  
10 legal provisions for purging or deleting ALPR data that would be circumvented by public release. Both  
11 *Westerbrook* and *Reporters’ Committee* are therefore inapposite.

## 12 **2. ALPR Data Does Not Fall Within the “Official Information” Privilege**

13 Respondent County of Los Angeles argues that records of scanned license plates are exempt  
14 from disclosure under § 6254(k) because they fall within the privilege for “official information acquired  
15 in confidence by a public employee” set forth in Evidence Code §1040(a). County Br. 7:23. As  
16 Petitioners point out in their opening brief, Pet. Br. at 7-8, the “official information” privilege on its face  
17 protects only records “acquired in confidence” or provided by a confidential source. Evid. Code  
18 §1040(a); *see also, e.g., Ochoa v. Superior Court*, 199 Cal. App. 4th 1274, 1283 (2011) (protecting  
19 information provided by prison informants because it was necessarily “clothed with the indicia of  
20 confidentiality and therefore conditionally privileged”). The records at issue here were scanned from

---

21  
22 California operating license number, arresting agency, booking number, date of arrest, offenses charged,  
23 police disposition, county and court name, date complaint filed, original charges and disposition.”  
*Westbrook*, 27 Cal. App. 4th at 161.

24 <sup>10</sup> The court in *Westerbrook* mentioned the constitutional protection for privacy in passing, noting that  
25 because “[t]he state constitutional right of privacy extends to protect defendants from unauthorized  
26 disclosure of criminal history records” and “appellants, as custodians of the records, have a duty to  
27 ‘resist attempts at unauthorized disclosure and the person who is the subject of the record is entitled to  
28 expect that his right will be thus asserted.’” 27 Cal. App. 4th 165-66 (citing *Craig v. Municipal Court*,  
100 Cal. App. 3d 69, 77 (1979)). But as *Craig* makes clear, that “duty” merely justifies the  
government’s standing to assert the privacy interests of the individuals whose records it holds. *See*  
*Craig*, 100 Cal. App. 3d at 76 (“dispos[ing] of defendant's contention that ... [Respondents] [have] no  
standing to assert an individual's constitutional right to privacy”).

1 publicly displayed license plates. They were neither “acquired in confidence” nor provided to  
2 Respondents by a confidential source. Although Petitioners raise this point in their opening brief, the  
3 County simply ignores that requirement in its opposition, relying on arguments relating to the  
4 confidentiality of investigatory files.<sup>11</sup>

5 The County also argues that the ALPR data is exempt because it “is likely to lead to the  
6 disclosure of personal identifying information,” such as home addresses, if people look use commercial  
7 databases to look up that personal identifying information associated with a particular license plate that  
8 may be specifically protected against disclosure by statute. *See* County Br. at 9. But the County does not  
9 suggest that ALPR data itself is specifically protected by statute, as would be required for it to be  
10 exempt from disclosure under § 6254(k). The fact that the results of a CPRA request *might* spur the  
11 requestor to take the further step of lawfully looking up in a commercial database information that a  
12 government would be prohibited from disclosing is irrelevant to whether the results of the original  
13 CPRA request are exempt.

14 **D. The Court Should Order Respondents to Produce Declarations Describing Their**  
15 **Searches and Indices of Documents Withheld**

16 In their oppositions, Respondents assert that they have not withheld any documents beyond the  
17 ALPR data. But neither of the declarations submitted by Respondents clearly describes the searches  
18 conducted for documents in a manner that indicates Respondents discharged their duties under the  
19 CPRA. Nor does either declaration clearly say that the City and County produced all responsive  
20 documents. Accordingly, in order to facilitate its own review of Respondents’ actions, this Court should  
21 correct the imbalance of knowledge by ordering Respondents to produce an index of any documents  
22 withheld on the basis of exemptions, as well as affidavits describing the searches they conducted for  
23 responsive materials.

---

24 <sup>11</sup> Even if ALPR data were “acquired in confidence” such that the “official information” privilege might  
25 apply, courts deciding whether the privilege protects information must undertake the same balancing of  
26 public interest in disclosure versus nondisclosure under Evidence Code § 1040 as is required by the  
27 CPRA catchall in Gov’t Code § 6255, and, as Respondents acknowledge, may withhold information  
28 only “where the public interest in maintaining confidentiality *clearly outweighs* the public interest in  
disclosure.” County Br. at 8:20-21 (citing *Black Panther Party v. Kehoe*, 42 Cal. App. 3d 645, 657  
(1974)). For the same reasons the documents are not exempt under § 6255, their disclosure is not  
“against the public interest” under Evid. Code § 1040 (b)(2) and withholding is not justified.

1 The County asserts that it has produced all responsive documents, but the declaration of Sgt.  
2 John Gaw notably omits any clear assertion that no other responsive documents exist, and certainly fails  
3 to describe the search that identified those documents and how it was reasonably calculated to yield all  
4 responsive documents.

5 The City argues that no evidence suggests that they have withheld documents, pointing out that a  
6 document Petitioners submitted as responsive was created after Petitioners request. But ample evidence  
7 exists to question the scope of their production: the City provides a declaration from Sgt. Daniel Gomez  
8 indicating that LAPD has been using ALPRs since 2004, that it has nearly 300 ALPRs in operation  
9 across the City. Gomez Decl. ¶ 4. The scope and duration of its use make it implausible that the City has  
10 so few responsive documents, and in fact lacks a single document to train officers on the use of the  
11 ALPR data. While the City points out that the document submitted by Petitioners relating to a new  
12 appropriation for ALPRs was created after Petitioners' CPRA request, that document described the  
13 ongoing use of Palantir Law Enforcement, a platform for integrating databases "used by [LAPD]  
14 Newton Division's Crime Intelligence Detail . . . to track vehicles using data from the Automated  
15 License Plate Reader," and requested an extension to allow training of additional officers through June  
16 2013.<sup>12</sup> If LAPD requested an extension of time for training on the use of ALPR databases in February  
17 2013, it is entirely reasonable for the Court to require the City to explain why no training materials were  
18 turned over in October and November 2013, barely three months earlier.

19 Moreover, LAPD Sgt. Gomez's declaration is also notable for what it does not say: it does not  
20 say that the City has provided all responsive documents, nor does he explain how the City might provide  
21 training without any documents, nor does he explain how the City searched for responsive documents,  
22 and why.

23 No affirmative showing of a failure to respond is required before a court can order either an  
24 index or a declaration. Respondents note that an index is not required by the CPRA, but ignore that  
25 courts have clearly held that they may order an index, or that an index is one of the most effective ways

---

26 <sup>12</sup> See Transmittal of the Extension for the 2009 Los Angeles Smart Policing Project, Bibring Dec. Ex. D  
27 at 160, 161 (letters dated March 1, 2013 and Feb. 20, 2013). Palantir has posted information about its  
28 work on LAPD's ALPR database. Palantir, Responding to Crime in Real Time at the LAPD, *avl. at*  
[http://www.palantir.com/\\_ptwp\\_live\\_ect0/wp-content/uploads/2012/06/ImpactStudy\\_LAPD.pdf](http://www.palantir.com/_ptwp_live_ect0/wp-content/uploads/2012/06/ImpactStudy_LAPD.pdf).

1 a trial court can ensure the reasonableness of an agency’s claim that a document is exempt from  
2 disclosure or non-responsive to the request. *See American Civil Liberties Union of N. Cal. v. Super. Ct.*,  
3 202 Cal. App. 4th 55, 82-86 (2011); *State Bd. of Equalization v. Super. Ct.*, 10 Cal. App. 4th 1177, 1191-  
4 93 (providing index upholds the pro-disclosure spirit of PRA); *Haynie*, 26 Cal. 4th at 1072-75, or that a  
5 statement describing the search conducted is standard procedure for cases under FOIA, on which the  
6 PRA was explicitly modeled. *Lawyers’ Comm. for Civ. Rights of San Francisco Bay Area v. U.S. Dep’t of*  
7 *the Treasury*, 534 F. Supp. 2d 1126, 1130-31 (N.D. Cal. 2008) (to prevail on summary adjudication of  
8 FOIA claim, agency must “describe what records were searched, by whom, and through what processes”  
9 and show “that the search was reasonably calculated to uncover all relevant documents and conducted in  
10 good faith”) (quotations omitted); *American Civil Liberties Union Foundation v. Deukmejian*, 32 Cal. 3d  
11 440, 447 (1982) (noting PRA was explicitly modeled on the federal FOIA, and “the judicial construction  
12 and legislative history of the federal act serve to illuminate the interpretation of its California  
13 counterpart”).

14 Here, the Court should require Respondents to create an index for any documents withheld other  
15 than the requested week’s worth of ALPR data to allow both Petitioners and the Court to fully  
16 understand and respond to any other exemptions asserted, and a declaration describing their search  
17 process.

18  
19 **E. Respondent County Fails to Address Their Refusal to Respond to Requests  
Regarding “Hotlists”**

20 Petitioners argued in their Opening Brief that the County neglected its obligations under the  
21 CPRA when it responded to the ACLU’s request for documents related to use of “hot lists” by stating  
22 that it was “unable to assist . . . with your request” because “[t]he request does not ask for ‘identifiable’  
23 public records, but specific ‘information’ in the form of interrogatories.” *See* Pet. Br. at 15; Pet., Ex. K  
24 at 78. The County fails to respond to this argument and ignores the request for documents related to  
25 hotlists in its account of their responses. *See* County Br. at 9-10. For the reasons set forth in Petitioners’  
26 Opening Brief, the County’s refusal to respond to the requests related to “hotlists” is unjustifiable, nor  
27 has the County even attempted to justify it here. The Court should order the County to respond by  
28 producing responsive documents, providing an index of documents withheld, and providing a

1 declaration regarding the scope of its search.

2 **III. CONCLUSION**

3 For the foregoing reasons, Petitioners respectfully request this Court grant the Petition.

4 Dated: March 7, 2014

Respectfully submitted,

5 ACLU FOUNDATION OF SOUTHERN  
6 CALIFORNIA

PETER BIBRING

Attorneys for Petitioners

1 **PROOF OF SERVICE**

2 STATE OF CALIFORNIA, COUNTY OF LOS ANGELES

3 I am employed in the County of Los Angeles, State of California. I am over the age of 18  
4 and not a party to the within action. My business address is 1313 West Eighth Street, Los  
5 Angeles, California 90017. I am employed in the office of a member of the bar of this court at  
6 whose direction the service was made.

7 On March 7, 2014, I served the foregoing document: PETITIONERS' REPLY IN  
8 SUPPORT OF PETITION FOR WRIT OF MANDAMUS, on the parties in this action by  
9 placing a true and correct copy of each document thereof, enclosed in a sealed envelope,  
10 addressed as follows:

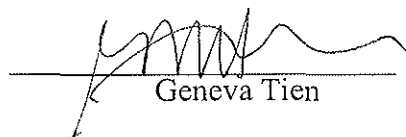

11 Tomas A. Guterres  
12 Eric C. Brown  
13 Collins Collins Muir & Stewart LLP  
14 1100 El Centro Street  
15 South Pasadena, CA 91030

16 Heather L. Aubry, Deputy City Attorney  
17 City Hall  
18 200 North Main Street  
19 City Hall East, Room 800  
20 Los Angeles, CA 90012

21 I caused such envelope(s) fully prepaid with U.S. Postage to be placed in the United  
22 States Mail at Los Angeles, California. I am "readily familiar" with the firm's practice of  
23 collection and processing correspondence for mailing. Under that practice it would be deposited  
24 with the U.S. Postal Service on that same day with postage thereon fully prepaid at Los Angeles,  
25 California in the ordinary course of business.

26 I declare under penalty of perjury under the laws of the State of California and the United  
27 States of America that the above is true and correct.

28 Executed on March 7, 2014, at Los Angeles, California.

  
Geneva Tien
