

(U) General Information

MYSTIC

YEAR ESTABLISHED	(U) 2009
DESCRIPTION	(TS//SI//NF) MYSTIC is an SSO program for embedded collection systems overtly installed on target networks, predominantly for the collection and processing of wireless/mobile communications networks. The overt purpose is for legitimate commercial services for the Telco's themselves; our covert mission is the provision of SIGINT.
INTELLIGENCE VALUE	
MAJOR TARGETS	(TS//SI//NF) These systems directly support [REDACTED] in their [REDACTED] Counter Terrorism, Counter Narcotics, and International Crime missions.
MAJOR BENEFACTORS & USERS OF INFORMATION	(TS//SI//NF) The MYSTIC program encompasses a number of subprograms, which are variously sponsored by NCSC, DEA, and CIA.

5	(TS//SI//NF) Plan for MYSTIC accesses against projected new mission requirements (i.e. 3G and 4G technologies, Voice data, etc.) (MOD)	3.1, 3.3
