Case No.: 4:08-cv-4373-JSW  
**[REVISED PROPOSED] ORDER  
GRANTING PLAINTIFFS CAROLYN  
JEWEL, ERIK KNUTZEN, AND JOICE  
WALTON'S MOTION FOR PARTIAL  
SUMMARY JUDGMENT (ECF No. 261)  
AND DENYING THE GOVERNMENT  
DEFENDANTS' CROSS-MOTION FOR  
PARTIAL SUMMARY JUDGMENT  
(ECF No. 286)**  
**(Fourth Amendment Violation)**  
Courtroom 5, Second Floor  
The Honorable Jeffrey S. White

1 [Plaintiffs Carolyn Jewel, Erik Knutzen, and Joice Walton, by their counsel Richard R.  
2 Wiebe and their other counsel of record, respectfully submit the following revised proposed order  
3 for the assistance of the Court in light of the hearing in this matter held on December 19, 2014.]  
4

5 This matter comes before the Court on the motion of plaintiffs Carolyn Jewel, Erik  
6 Knutzen, and Joice Walton (collectively, “plaintiffs”) for partial summary judgment challenging  
7 the ongoing interception of their Internet communications as a violation of the Fourth Amendment,  
8 and the cross-motion of defendants National Security Agency, United States, Department of  
9 Justice, Barack H. Obama, Michael S. Rogers, Eric H. Holder, Jr., and James R. Clapper, Jr. (in  
10 their official capacities) (collectively, the “government defendants” or “the government”) for  
11 partial summary judgment.<sup>1</sup>

12 In summary, plaintiffs have put forward evidence that as part of a system of mass  
13 surveillance their Internet communications are copied and provided to the government (“stage  
14 one”), which filters them in an attempt to remove wholly domestic communications (“stage two”),  
15 and which then searches the remaining communications for numerous search terms called  
16 “selectors” (“stage three”). Plaintiffs contend that the copying and searching of their  
17 communications is conducted without a warrant or any individualized suspicion and violates the  
18 Fourth Amendment. The government defendants have not put forward any public evidence  
19 disputing plaintiffs’ evidence. Instead, they contend that plaintiffs’ evidence is insufficient to  
20 establish plaintiffs’ standing, that even assuming the sufficiency of plaintiffs’ evidence there can be  
21 no Fourth Amendment violation on these facts as a matter of law, and, alternatively, that the state  
22 secrets privilege requires dismissal of plaintiffs’ Fourth Amendment Internet surveillance claim.

23 Having considered the parties’ papers (including the government defendants’ classified  
24 brief and classified declarations) and the parties’ arguments, the Court GRANTS plaintiffs’ motion  
25 for partial summary judgment and DENIES the government defendants’ cross-motion for partial

26 \_\_\_\_\_  
27 <sup>1</sup> Plaintiffs Tash Hepting and Young Boon Hicks (as executrix of the estate of Gregory Hicks) are  
28 not AT&T Internet customers and are not parties to this motion.

1 summary judgment. The Court holds that the government defendants' warrantless and  
 2 suspicionless seizure of plaintiffs' Internet communications violates the Fourth Amendment, and  
 3 that the government defendants' warrantless and suspicionless content-searching of plaintiffs'  
 4 Internet communications violates the Fourth Amendment.

## 5 ANALYSIS

### 6 A. The Summary Judgment Legal Standard

7 "The party moving for summary judgment bears the initial burden of identifying those  
 8 portions of the pleadings, discovery, and affidavits that demonstrate the absence of a genuine issue  
 9 of material fact. *Celotex [Corp.v. Catrett]*, 477 U.S. [317,] at 323, 106 S. Ct. 2548 [(1986)]; *see*  
 10 *also* Fed. R. Civ. P. 56(c). An issue of fact is 'genuine' only if there is sufficient evidence for a  
 11 reasonable fact finder to find for the nonmoving party. *Anderson v. Liberty Lobby, Inc.*, 477 U.S.  
 12 242, 248-49, 106 S. Ct. 2505, 91 L.Ed.2d 202 (1986). A fact is 'material' if it may affect the  
 13 outcome of the case. *Id.* at 248, 106 S. Ct. 2505. Once the moving party meets its initial burden,  
 14 the non-moving party must go beyond the pleadings and, by its own evidence, 'set forth specific  
 15 facts showing that there is a genuine issue for trial.' Fed. R. Civ. P. 56(e) [*see* current Rule 56(c)].

16 "In order to make this showing, the non-moving party must 'identify with reasonable  
 17 particularity the evidence that precludes summary judgment.' *Keenan v. Allan*, 91 F.3d 1275, 1279  
 18 (9th Cir.1996) (quoting *Richards v. Combined Ins. Co.*, 55 F.3d 247, 251 (7th Cir.1995) (stating  
 19 that it is not a district court's task to 'scour the record in search of a genuine issue of triable fact');  
 20 *see also* Fed. R. Civ. P. 56(e) [*see* current Rule 56(c)]. If the non-moving party fails to point to  
 21 evidence precluding summary judgment, the moving party is entitled to judgment as a matter of  
 22 law. *Celotex*, 477 U.S. at 323, 106 S. Ct. 2548; Fed. R. Civ. P. 56(e)(3)." *Jewel v. National*  
 23 *Security Agency*, 965 F. Supp. 2d 1090, 1099-1100 (N.D. Cal. 2013).

24 Plaintiffs' motion raises the legal issues of whether the government's copying of plaintiffs'  
 25 Internet communications at stage one is a seizure; whether the government's searching of those  
 26 communications at stage three is a search; and, if there is a search or seizure, whether the search or  
 27 seizure violates the Fourth Amendment. The government's cross-motion additionally puts at issue  
 28 whether plaintiffs have established their standing by showing their communications have been

1 copied and searched, and whether the state secrets privilege requires dismissal of plaintiffs' Fourth  
2 Amendment claim regarding the search and seizure of their Internet communications.

3 The parties begin with some common ground. First, the parties agree for purposes of this  
4 motion that plaintiffs have a reasonable expectation of privacy in their Internet communications,  
5 including not just their emails, instant messages, and video chats but also their Internet browsing  
6 and social media posting and viewing. 12/19/14 Reporter's Transcript ("RT") at 75, 84, 94-96.  
7 Second, the parties agree that plaintiffs have a possessory interest in their Internet communications.  
8 *Id.* Third, the parties agree that if the Court reaches the merits of the Fourth Amendment issue, it  
9 must decide the case based solely on the public evidence and disregard the secret filings made by  
10 the government. 12/19/14 RT at 25-27, 42-45, 47.

### 11 **B. The Factual Record**

12 Plaintiffs present the following evidence in support of their allegations that the government  
13 is copying and searching their Internet communications.

14 The government admits that it is currently conducting ongoing surveillance intercepting  
15 communications transiting the Internet "backbone." These admissions include statements made in  
16 *the Report on the Surveillance Program Operated Pursuant to Section 702 of the Foreign*  
17 *Intelligence Surveillance Act* by the Privacy and Civil Liberties Oversight Board ("PCLOB  
18 Report"), statements in declassified declarations filed in this lawsuit, and statements to Congress.<sup>2</sup>

19 <sup>2</sup>See, e.g., ECF No. 262, Ex. A (PCLOB Report) at 7, 35-37 (at 36-37: "Once tasked, selectors  
20 used for the acquisition of upstream Internet transactions are sent to a United States electronic  
21 communication service provider to acquire communications that are transiting through circuits that  
22 are used to facilitate Internet communications, what is referred to as the 'Internet backbone.' The  
23 provider is compelled to assist the government in acquiring communications across these circuits.  
24 To identify and acquire Internet transactions associated with the Section 702-tasked selectors on  
25 the Internet backbone, Internet transactions are first filtered to eliminate potential domestic  
26 transactions, and then are screened to capture only transactions containing a tasked selector.");  
27 ECF No. 227 (12/20/13 NSA Deputy Dir. Fleisch Classified Decl.) at ¶ 38, p. 25:14-16 ("NSA  
28 collects electronic communications with the compelled assistance of electronic communications  
service providers as they transit Internet 'backbone' facilities within the United States"); ECF  
No. 169 (12/20/13 NSA Deputy Dir. Fleisch Unclassified Decl.) at ¶ 29, p. 17; ECF No. 253-3  
("The Intelligence Community's Collection Programs Under Title VII of the Foreign Intelligence  
Surveillance Act") at 3-4 ("NSA collects telephone and electronic communications as they transit  
the Internet 'backbone' within the United States. This is known as 'upstream' collection").

1 The government further admits that, as part of the process of surveillance, it filters communications  
 2 transiting the Internet backbone in an attempt to eliminate wholly domestic communications and  
 3 then content-searches the remaining communications to see whether they contain any one or more  
 4 of many different selectors the government chooses to search for.<sup>3</sup> The government admits that  
 5 this Internet backbone surveillance has been ongoing since 2001.<sup>4</sup>

6 AT&T in turn admits that it currently conducts Foreign Intelligence Surveillance Act  
 7 (FISA) surveillance of communications content on behalf of the government.<sup>5</sup>

8 The declaration of Mark Klein and accompanying AT&T documents show the mass,  
 9 indiscriminate copying of Internet communications of AT&T customers and other Internet users  
 10 transiting links between AT&T's Internet backbone network and the rest of the Internet, as well as  
 11 the delivery of those copies to the National Security Agency's ("NSA's") possession in a limited-  
 12 access room controlled by the NSA in AT&T's facility (the "SG3 Secure Room").<sup>6</sup> The copying is

13 \_\_\_\_\_  
 14 <sup>3</sup> See, e.g., ECF No. 262, Ex. A (PCLOB Report) at 36-37, 121-22; ECF No. 310, Ex. A (PCLOB  
 Report) at 38-41; ECF No. 172-8 (9/11/12 Classified Declaration of Frances J. Fleisch) at ¶ 69.

15 <sup>4</sup> ECF No. 310, Ex. A (PCLOB Report) at 5-6, 16-20.

16 <sup>5</sup> ECF No. 295, Ex. B (AT&T Transparency Report).

17 <sup>6</sup> ECF No. 84-2 (Klein Decl.) at ¶¶ 12, 19-20, 22, 24-36; ECF No. 84-3 (Klein Decl., Ex. A); ECF  
 18 No. 84-4 (Klein Decl., Ex. B); ECF Nos. 84-5 & 84-6 (Klein Decl., Ex. C).

19 The Court overrules the government's personal-knowledge and hearsay objections to Klein's  
 20 testimony. Klein's testimony regarding the copying of plaintiffs' communications by means of  
 21 splitters and the transmission of those communications to the SG3 Secure Room is squarely within  
 22 his personal knowledge, for his duties included operating and maintaining that equipment.  
 23 *Barthelemy v. Air Lines Pilots Ass'n*, 897 F.2d 999, 1018 (9th Cir. 1990). So, too, is Klein's  
 24 knowledge of AT&T's relationship with the NSA, including NSA's control over the copies sent to  
 25 the SG3 Secure Room. Employees are routinely permitted to testify, as matters within their  
 26 personal knowledge, to the activities of their employer, their supervisors, and co-workers,  
 27 including the relationship between their employer and government agencies or other outside  
 28 entities. *United States v. Neal*, 36 F.3d 1190, 1206 (1st Cir. 1994) (bank employee could testify to  
 information she learned in the course of her job, including the status of the bank's relationship with  
 a federal agency (the Federal Deposit Insurance Corporation) and the locations of its customers,  
 even though her knowledge was based solely on hearsay statements in documents she reviewed);  
*DIRECTV, Inc. v. Budden*, 420 F.3d 521, 529 (5th Cir. 2005) (employee could testify about facts  
 concerning another company he learned from a law enforcement investigation); *Great American  
 Assurance Co. v. Liberty Surplus Ins. Corp.*, 669 F. Supp. 2d 1084, 1089 (N.D. Cal. 2009)  
 (footnote continued on following page)

1 done by means of “splitters” that indiscriminately copy all the data flowing over fiber-optic  
 2 cables.<sup>7</sup> The declaration of AT&T’s James Russell attests that Klein’s descriptions and the  
 3 descriptions in the AT&T documents of the splitter equipment and the equipment in the SG3  
 4 Secure Room controlled by the NSA are accurate.<sup>8</sup> The declaration of plaintiffs’ expert J. Scott  
 5 Marcus explains the functionality of the splitters and the equipment in the SG3 Secure Room  
 6 controlled by the NSA, and he opines that AT&T would have had no business purpose for using  
 7 the splitters and the equipment in the SG3 Secure Room.<sup>9</sup>

8 *(footnote continued from preceding page)*

9 (employee can testify to company policies based on her “experience and perceptions” on the job);  
 10 *Sjoblom v. Charter Communications, LLC*, 571 F. Supp. 2d 961, 968-69 (W.D. Wis. 2008)  
 11 (employees may testify about the activities of their supervisors and co-workers that they observe);  
 12 *United States v. Wirtz*, 357 F. Supp. 2d 1164, 1169-70 (D. Minn. 2005) (employee could testify  
 13 that employees of a different company provided certain information and documents to his company  
 14 even though he had no personal contact with the employees of the other company).

15 The government’s hearsay objection fails for two separate reasons even if it is assumed AT&T’s  
 16 relationship with the NSA is not within Klein’s personal knowledge. First, the statements made to  
 17 Klein by management and other AT&T employees about the NSA’s activities and the SG3 Secure  
 18 Room are admissible nonhearsay. AT&T is the agent of the government in assisting the  
 19 government in electronic surveillance, and statements by an agent on a matter within the scope of  
 20 the agency relationship are admissible nonhearsay. Fed. R. Evid. 801(d)(2)(D); *Anestis v. United*  
 21 *States*, \_\_\_ F. Supp. 3d \_\_\_, 2014 WL 4928959, at \*4 n.3 (E.D. Ky. Sept. 30, 2014); *Quintero v.*  
 22 *United States*, 2014 WL 201608, at \*2 (D. Mass. Jan. 15, 2014); *Cefalu v. Holder*, 2013 WL  
 23 5315079, at \*14 n.16 (N.D. Cal. Sept. 23, 2013); *L-3 Communications Integrated Systems v.*  
 24 *United States*, 91 Fed. Cl. 347, 359 (Fed. Cl. 2010); *Globe Savings Bank, F.S.B. v. United States*,  
 25 61 Fed. Cl. 91, 93-95 (Fed. Cl. 2004). AT&T’s statements in its transparency report and the  
 26 NSA Inspector General’s draft report (discussed in footnote 10 below) are independent evidence of  
 27 the agency relationship. In addition to being admissible under Rule 801(d)(2)(D), the e-mail to  
 28 Klein from AT&T management and statements by his manager and a co-worker telling of  
 upcoming visits by an NSA agent (ECF No. 84-2 at ¶¶ 10, 16 (Klein Decl.)), are also admissible  
 under Rule 803(3) as evidence that AT&T employees actually met with NSA agents for the  
 purpose of implementing the surveillance, that AT&T’s management’s plan and intent was to  
 cooperate with the NSA in implementing the surveillance, and that AT&T thereafter did cooperate  
 with the NSA. Fed. R. Evid. 803(3) (statements reflecting plan or intent are admissible); *United*  
*States v. Best*, 219 F.3d 192, 198 (2d Cir. 2000) (statement of plan or intent can be used to “prove  
 that the declarant thereafter acted in accordance with the stated intent”).

25 <sup>7</sup> ECF No. 84-2 (Klein Decl.) at ¶¶ 21-34; ECF No. 89 (Marcus Decl.) at ¶¶ 56-58, 62, 72, 109.

26 <sup>8</sup> ECF No. 84-1 (Russell Decl.) at ¶¶ 5-6, 10-12, 15, 19-23.

27 <sup>9</sup> ECF No. 89 (Marcus Decl.) at ¶¶ 56-58, 62, 70-73, 77, 109, 128-47.

28 *(footnote continued on following page)*

1 The NSA Inspector General's draft report also is evidence of AT&T's participation in  
2 NSA's interception of Internet communications during the period from 2001 to 2007.<sup>10</sup>

3 Plaintiffs' declarations show that they are AT&T Internet customers who use the Internet to  
4 communicate internationally, including sending emails to persons located overseas and visiting  
5 foreign websites.<sup>11</sup>

6 The government has not submitted any evidence in the public record controverting any of  
7 plaintiffs' evidence. Instead, it contends that plaintiffs' evidence is insufficient to show that  
8 plaintiffs' communications ever have been or are currently being copied or searched by the  
9 government.

10 Plaintiffs' evidence described above (including the government's own admissions),  
11 however, establishes that since 2001 the government has been copying Internet communications  
12 transiting AT&T's Internet backbone network, filtering them in an attempt to eliminate wholly  
13 domestic communications, and searching them for selectors. As AT&T Internet customers who  
14 communicate internationally, plaintiffs' communications are among those copied, filtered, and  
15 searched.

16  
17  
18 *(footnote continued from preceding page)*

19 The Court overrules the government's objections to Marcus's testimony. Marcus's education and  
20 long experience with Internet businesses and technology, together with the facts stated in Klein's  
21 testimony and the AT&T documents (facts which are confirmed by Russell's testimony), give him  
22 a substantial foundation for his opinions.

23 <sup>10</sup> ECF No. 147, Ex. A (NSA Office of the Inspector General Report on the President's  
24 Surveillance Program, Working Draft ("NSA IG draft report")) at 17, 27-29, 33. The NSA IG draft  
25 report identifies "Company A" and "Company B" as participants in the NSA's Internet backbone  
26 surveillance and describes them as the two largest providers of international telephone calls into  
27 and out of the United States when the surveillance began in 2001. *Id.* AT&T was one of the two  
28 largest providers of international telephone calls in the United States at that time. ECF No. 262,  
29 Ex. E (Common Carrier Bureau, Federal Communications Commission, 1999 International  
30 Telecommunications Data) at 29, fig. 9.

<sup>11</sup> ECF No. 263 (Jewel Decl.) at ¶¶ 2-8; ECF No. 264 (Knutzen Decl.) at ¶¶ 2-9; ECF No. 265  
(Walton Decl.) at ¶¶ 2-9.

1 Plaintiffs' evidence is sufficient to establish their standing. Standing is determined by the  
2 facts existing at the time the lawsuit was filed. *Davis v. Federal Election Commission*, 554 U.S.  
3 724, 734 (2008). The cumulative evidence of the Klein, Russell, and Marcus declarations, the  
4 PCLOB report and other government admissions, the NSA IG draft report, and plaintiffs' own  
5 declarations shows that the copying and searching of the Internet communications of plaintiffs and  
6 other AT&T customers that began in 2001 was continuing in 2008 when this lawsuit was filed.  
7 The government defendants have not put forward any opposing evidence showing that their  
8 copying and searching of AT&T Internet backbone communications had ceased by 2008.  
9 Defendants' further suggestion that the copying and searching of communications transiting  
10 AT&T's Internet backbone may have ceased between 2008 and now also does not rise to the level  
11 of an evidentiary inference or create a genuine dispute of fact because it is not supported by any  
12 evidence, direct or circumstantial. To the contrary, the evidence shows that the government's  
13 Internet backbone surveillance, including full-content searching of the communications at stage  
14 three, is ongoing, and that AT&T continues to participate in FISA surveillance. Moreover, to the  
15 extent conduct by the government after the filing of this lawsuit might bear on the scope and  
16 appropriateness of injunctive relief, that issue is not presented by the pending motions.

### 17 **C. Search And Seizure Of Plaintiffs' Communications**

#### 18 **1. Seizure Of Internet Communications By "Stage One" Copying**

19 The Fourth Amendment protects plaintiffs' email and other Internet communications, just  
20 as it protects communications in other forms. *United States v. Cotterman*, 709 F.3d 952, 957,  
21 964-66 (9th Cir. 2013) (en banc) (emails and browsing history protected as "papers" under the  
22 Fourth Amendment); *Berger v. New York*, 388 U.S. 41, 59-60 (1967) (Fourth Amendment protects  
23 oral conversations); *Katz v. United States*, 389 U.S. 347, 353 (1967) (same); *Ex parte Jackson*, 96  
24 U.S. 727, 733 (1877) (Fourth Amendment protects contents of letters while in transit); *see United*  
25 *States v. Jones*, 565 U.S. \_\_\_, 132 S. Ct. 945, 950 (2012) (Fourth Amendment "embod[ies] a  
26 particular concern for government trespass upon the areas ('persons, houses, papers, and effects') it  
27 enumerates").

1 A seizure occurs when there is a meaningful interference with a possessory interest. *United*  
2 *States v. Jacobsen*, 406 U.S. 109, 113 (1984). An exercise of dominion and control by the  
3 government is one type of meaningful interference that results in a seizure. *Id.* at 120-21 & n.18.  
4 The parties agree, and the Court finds, that plaintiffs have a possessory interest in their Internet  
5 communications. Plaintiffs’ possessory interest in the contents of their communications extends to  
6 the right to exclude others from copying their communications. *Hearst v. Black*, 87 F.2d 68, 70-71  
7 (D.C. Cir. 1936) (government’s copying of telegrams en masse was a “dragnet seizure” that  
8 violated sender’s property right in contents of telegrams). Copying a communication in transit is a  
9 seizure because it is an exercise of dominion and control that meaningfully interferes with the  
10 possessory interest in the communication. *See Berger*, 388 U.S. at 59-60 (making an electronic  
11 copy of an oral conversation was a seizure of the conversation); *Katz*, 389 U.S. at 353 (same);  
12 *United States v. Ganius*, 755 F.3d 125, 137 (2d Cir. 2014) (copying of defendant’s computer files  
13 beyond the scope of a warrant was a seizure since it “deprived him of exclusive control over those  
14 files”); *United States v. Jefferson*, 571 F. Supp. 2d 696, 701-704 (E.D. Va. 2008) (copying of  
15 personal information and documents is a seizure).

16 Accordingly, the Court holds that the “stage one” copying of plaintiffs’ Internet  
17 communications is a seizure. It is an intrusion into plaintiffs’ “papers” and an appropriation of  
18 their contents. The government argues that the copies exist only for “milliseconds” and therefore  
19 there is no seizure. This argument lacks both factual and legal foundation. There is no evidence in  
20 the record that the copies made last only milliseconds. Even if there were such evidence, it would  
21 not show that the making of the copies was not an exercise of dominion and control. The  
22 interference that plaintiffs complain of is the copying of the contents of their communications, not  
23 a delay in delivery of their communications. None of the package-delay cases that the government  
24 relies on involved opening the package to copy communications inside of it, and thus they do not  
25 support the government’s position that copying the contents of a communication in transit is not a  
26 seizure so long as delivery of the communication is not delayed. However long the copies exist, it  
27 is long enough for the government to search their full contents and learn whether the  
28 communications contain any of the selectors the government is searching for.

## 2. “Stage Three” Search Of Internet Communications

1 A search occurs when the government violates a person’s reasonable expectation of privacy  
2 or physically intrudes on a constitutionally protected area such as a person’s papers to discover  
3 information. *Jones*, 132 S. Ct. at 949-50; *Florida v. Jardines*, \_\_\_ U.S. \_\_\_, 133 S. Ct. 1409, 1414  
4 (2013). The parties agree, and the Court finds, that plaintiffs have a reasonable expectation of  
5 privacy in their Internet communications. *See Cotterman*, 709 F.3d at 964-66.

6 At stage three, the government searches the entire contents of plaintiffs’ Internet  
7 communications for the selectors it is interested in. Searching the contents of a communication to  
8 determine whether or not it contains a particular message is an intrusion on the contents of the  
9 communication and violates the reasonable expectation of privacy in the communication. As such,  
10 it is a search for Fourth Amendment purposes.

11 The government argues that the full-content searching of plaintiffs’ communications at  
12 stage three does not violate any reasonable expectation of privacy because no human ever learns of  
13 the result of the search. But even though the search is automated, the government learns whether  
14 or not the communication contains one or more selectors and uses that information to decide  
15 whether to retain the communication or not. The government discovers information about the  
16 contents of the communications and acts on that information. Moreover, despite the automated  
17 nature of the search, it is humans who have designed the search mechanism and who choose what  
18 selectors to search for.

19 The dog-sniff and other contraband detection cases that the government relies upon do not  
20 demonstrate that the content-searching of plaintiffs’ communications is not a search. In those  
21 cases, the government without opening the package or container tried to detect an externally  
22 observable characteristic of contraband within. *Jacobsen*, 466 U.S. at 122-24; *United States v.*  
23 *Place*, 462 U.S. 696, 706-708 (1983) (holding dog sniffs are “*sui generis*”). Here, the government  
24 is going inside plaintiffs’ communications and examining their contents, the equivalent of opening  
25 and searching a package en route. That conduct is a search. *Jacobsen*, 466 U.S. at 114 (“the  
26 Fourth Amendment requires that [the government] obtain a warrant before examining the contents  
27 of . . . a package”).  
28

**D. Constitutionality Of The Search And Seizure**

1 The seizures and searches of plaintiffs' Internet communications are made without a  
2 warrant or any individualized suspicion. Warrantless searches and seizures are presumptively  
3 unreasonable, as are suspicionless searches. *Jacobsen*, 466 U.S. at 114; *Chandler v. Miller*, 520  
4 U.S. 305, 308 (1997). This is a consequence of the Fourth Amendment's purpose, which is to  
5 prevent suspicionless general searches and seizures. *Riley v. California*, 573 U.S. \_\_\_, 134 S. Ct.  
6 2473, 2494 (2014); *Payton v. New York*, 445 U.S. 573, 583 (1980); *Marcus v. Search Warrant of*  
7 *Property*, 367 U.S. 717, 726-29 & n.22 (1961); *Go-Bart Importing Co. v. U.S.*, 282 U.S. 344, 357  
8 (1931).

9 The government contends that warrantless, suspicionless searches of plaintiffs' Internet  
10 communications are permitted here under the "special needs" exception. It contends that a  
11 significant purpose of the searches is to obtain foreign intelligence information and that this  
12 purpose justifies the intrusion on plaintiffs' possessory and privacy interests.

13 The "special needs" exception is a "closely guarded" category. *Chandler*, 520 U.S. at 309.  
14 It requires a "context-specific" inquiry. *Id.* at 314. A threshold requirement of the special needs  
15 exception is that "'the privacy interests implicated by the search [be] minimal.'" *Id.* (quoting  
16 *Skinner v. Railway Labor Executives' Ass'n*, 489 U.S. 602, 624 (1989)). Thus, circumstances in  
17 which the Supreme Court has approved warrantless special needs searches are ones in which the  
18 person searched has a diminished expectation of privacy, such as, for example, schoolchildren who  
19 voluntarily choose to participate in extracurricular activities, *see Board of Education of*  
20 *Independent School Dist. No. 92 of Pottawatomie County v. Earls*, 536 U.S. 822, 830-32 (2002);  
21 *Vernonia School Dist. 47J v. Acton*, 515 U.S. 646, 654-57 (1995), or workers who voluntarily  
22 choose employment in professions that put the safety of others at risk, *see Skinner*, 489 U.S. at  
23 624-28; *National Treasury Employees Union v. Von Raab*, 489 U.S. 656, 671-72 (1989). As  
24 Justice Kennedy has explained: "An essential, distinguishing feature of the special needs cases is  
25 that the person searched has consented, though the usual voluntariness analysis is altered because  
26 adverse consequences (*e.g.*, dismissal from employment or disqualification from playing on a high  
27  
28

1 school sports team) will follow from refusal.” *Ferguson v. City of Charleston*, 532 U.S. 67, 90-91  
2 (2001) (Kennedy, J., concurring).

3 Here, plaintiffs’ privacy interests in their Internet communications are within the Fourth  
4 Amendment’s central protection of their “papers.” Plaintiffs have an undiminished expectation of  
5 privacy in the content of their electronic communications and retain their possessory interest in  
6 their communications. They have not voluntarily chosen to engage in activities that diminish their  
7 expectations of privacy or otherwise consented to the search.

8 Nor is the intrusion into plaintiffs’ privacy interest in their communications a minimal one.  
9 The intrusion into those communications is total: At stage one, the government copies the contents  
10 of all of plaintiffs’ communications flowing through AT&T’s Internet backbone junctions. For  
11 those communications that pass through the filtering at stage two and are searched at stage three,  
12 the entire contents are searched.

13 The undiminished nature of plaintiffs’ privacy interests in their Internet communications  
14 also makes the seizures and searches unreasonable under the Fourth Amendment. “The cases in  
15 which the [Supreme] Court has found warrantless searches to be reasonable all involve . . . greatly  
16 diminished privacy interests—a point repeatedly emphasized by the Court.” *Al Haramain Islamic*  
17 *Foundation, Inc. v. United States Department of Treasury*, 686 F.3d 965, 994 (9th Cir. 2011). As  
18 explained, plaintiffs’ privacy interests are undiminished, making the searches and seizures  
19 unreasonable.

#### 20 **E. The State Secrets Privilege**

21 The government defendants also assert that the state secrets privilege requires dismissal of  
22 plaintiffs’ Fourth Amendment claim alleging ongoing Internet surveillance. The government does  
23 not assert that any of the evidence on which plaintiffs rely is privileged. Indeed, it has  
24 affirmatively waived any privilege as to the evidence of AT&T’s participation in the surveillance  
25 set forth in the Klein and Marcus declarations and the AT&T documents. ECF No. 295, Ex. C.  
26  
27  
28

1 Instead, it contends that secret evidence exists that precludes a “full and fair adjudication” of  
2 plaintiffs’ claim.<sup>12</sup> ECF No. 285 at 45.

3 The Court rejects the government’s contention that the state secrets privilege requires  
4 dismissal of plaintiffs’ Fourth Amendment claim alleging ongoing Internet surveillance. In earlier  
5 proceedings, the Court ruled that Congress has displaced the state secrets privilege for plaintiffs’  
6 statutory claims of unlawful electronic surveillance with the procedure of 50 U.S.C. § 1806(f).  
7 *Jewel*, 965 F. Supp. 2d at 1103-1106. The parties agree and the Court concludes that its analysis  
8 applies equally to plaintiffs’ constitutional claims, and the Court accordingly holds that section  
9 1806(f) displaces the state secrets privilege in the adjudication of plaintiffs’ constitutional claims.  
10 *See* ECF No. 167 at 2, 6-7.

11 Under section 1806(f), Congress has charged the courts with deciding claims of unlawful  
12 electronic surveillance on their merits, rather than dismissing such claims. *Jewel*, 965 F. Supp. 2d  
13 at 1104-1105. “The purpose of this provision is to permit courts to determine whether any  
14 particular surveillance was lawfully authorized and executed.” *Id.* at 1105. Any secret evidence  
15 necessary for adjudicating the constitutionality of the government’s mass surveillance can be  
16 submitted to the Court for its *in camera* and *ex parte* consideration in deciding the lawfulness of  
17 the surveillance. *Id.* at 1104-1105. The government, however, has not sought to proceed by way  
18 of section 1806(f). Instead, it continues to maintain its position that section 1806(f) does not  
19 displace the state secrets privilege or apply to any of plaintiffs’ claims, and that the Court should  
20 not consider any secret evidence in adjudicating the merits of plaintiffs’ motion. 12/19/14 RT at  
21 42-45, 47, 119. In light of that choice by the government and the government’s position that any  
22 secret evidence must be excluded from the process of deciding the merits of plaintiffs’ motion, it is  
23

---

24 <sup>12</sup> The government cites no authority for its contention that the state secrets privilege requires  
25 dismissal whenever the exclusion of evidence makes an adjudication less “full and fair” than it  
26 would otherwise be, and that contention is inconsistent with the nature of the state secrets privilege  
27 as an evidentiary privilege. Invocation of a privilege always results in the exclusion of relevant  
28 evidence and in that sense makes the resulting adjudication less “full and fair” than it would be if  
the evidence were admitted.

1 appropriate for the Court to decide the merits of plaintiffs' motion using only the public evidence  
2 of record.

3 Finally, the Court rejects the government's position that any ruling on plaintiffs' claim  
4 would inevitably harm national security. AT&T's participation in Internet surveillance for national  
5 security purposes is public knowledge by virtue of the Klein evidence and AT&T's admissions.  
6 And as this order demonstrates, a ruling on plaintiffs' claim does not disclose the identities of those  
7 "on the list of surveillance targets." *Clapper v. Amnesty International USA*, \_\_ U.S. \_\_, 133 S. Ct.  
8 1138, 1149 n.4 (2013).

9 **CONCLUSION**

10 For the foregoing reasons, the Court GRANTS plaintiffs' motion for partial summary  
11 judgment and DENIES the government defendants' cross-motion for partial summary judgment.  
12 The Court holds that the government defendants' warrantless and suspicionless seizure of  
13 plaintiffs' Internet communications violates the Fourth Amendment, and that the government  
14 defendants' warrantless and suspicionless content-searching of plaintiffs' Internet communications  
15 violates the Fourth Amendment.

16 **IT IS SO ORDERED.**
