Subject: RE: (U) NSA Response to NSS VEP Action

Classification: UNCLASSIFIED//~~FOR OFFICIAL USE ONLY~~

Hi [Redacted]

(U//~~FOUO~~) At our meeting yesterday, I told you I would send you an estimate of what we think it would take to develop an application for your VEP program.

(U//~~FOUO~~) Based on your initial requirements, we came to the conclusion that the VEP application probably would be a hybrid of the [Redacted] applications so we would have to develop a new application. Since the application will reside on JWICS instead of NSANet we have to determine how to develop this application to work in this environment. [Redacted]

[Redacted] The server has to be certified before we can get official permission to operate. The process takes awhile since it is dependent on other organizations and their workload, so we are estimating 6 months. However, while we are in the certification process we can still develop the application during this time. The time it takes to develop the application is dependent on how complicated the process will be.

(U//~~FOUO~~) Other issues to consider would be the security to access the application. [Redacted]

(b)(5)

(U//~~FOUO~~) We still need to do some investigations about the JWICs environment and your requirements may change once you finish establishing your process. I just wanted to let you know the things we may have to do and the time it may take to get your application on JWICs. As [Redacted] requested in her previous email, please let her know of a time we can meet to demo [Redacted] applications. Seeing [Redacted] these applications will give you a better understanding of our capabilities and may help you in determining your work process and requirements. If you have any questions, please let us know.

thanks
