Classification: ~~SECRET//NOFORN~~

~~Classified By: C42W42B75
Derived From: FBI NSIC dated 20130301
Declassify On: 20401231~~

Here is a synopsis of what I have obtained so far. The caveat is that the airborne missions are not recorded in [redacted] metrics. I also cannot locate any data in Sentinel and [redacted]. Therefore, the data I have is based upon an urgent email request that was sent out to the field [redacted]. There may be additional missions that can be reported in the future, when all the [redacted] respond (the email was sent 06/08/2015). Also, some of the missions might go back as far as [redacted] when [redacted] had tried to start a nascent aerial capability. At that time, CSS gear was sent to [redacted] and [redacted] had gear, but they sent it back for lack of interest/usage. The POC for that program, [redacted] reached out specifically to those offices in addition to the [redacted] wide email I sent. All offices reported back with the same stats as the ones emailed to me. There may also be airborne missions that involved [redacted] that are no longer in the [redacted] so I cannot say for certain that the mission numbers are 100% accurate. So far, we have five airborne missions reported.

b6
b7C
b7E

SENSITIVE BUT UNCLASSIFIED
NON-RECORD

Hey [redacted]
Hope you had fun in [redacted] (is that where it was?) this past weekend. Probably not as muggy as [redacted]

My boss gave me some guidelines to work with here in [redacted] as far as the Airborne WITT training. We propose having the training [redacted] We would like to have the training at the [redacted] There is a nice big conference room there and the airplanes [redacted] My boss would also like to have a couple of the [redacted] guys attend, one is even a [redacted] that would likely be flying, so it would be good for him to see what it is we are trying to accomplish. We would likely have [redacted] would like to come, and I think [redacted] mentioned [redacted] might want to come up for refresher training.

b6
b7C
b7E

Since [redacted] and I have already been through the class and would likely be the operators in the sky, I think [redacted] than the air operations, [redacted] [redacted] With weather conditions here, it is sometimes hard to create a schedule and stick to it. It is almost always safe to plan afternoon air operations as the fog has burned off by then, just an FYI. We definitely want to spend time in the air though, that's the whole point isn't it?

If it matters, here is the level of experience of the above mentioned:

Me - Loser extraordinaire, shouldn't even be in the bu.
[redacted] attended [redacted] and can operate the gear with little or no assistance
[redacted] has attended no training, but can operate the gear with some basic assistance. I spent some time with [redacted] showing him the gear.
[redacted] attended regional basic witt as an auditor and can operate the gear with some basic assistance. I have spent some time training her.
[redacted] has not attended any training, but is interested in the witt program. [redacted]

b6
b7C
b7E

[redacted] My boss, has been on a couple of missions and is familiar with what we do. He is the former [redacted] and is [redacted] certified. Very supportive of the program and it would be good for him to know what his crew is doing.

[redacted] Has not been to any WITT training, but has [redacted]
[redacted] Has also flown on all the airborne witt training/missions in [redacted] and will likely continue to do so until and if he moves to the [redacted]

b6
b7C
b7E

[redacted] Has shown a good deal of interest in the [redacted] program and is a hard worker. [redacted] thought he would benefit from the training.

As far as the [redacted] we would have to do a quick background on the [redacted] folks, unless they have a clearance. If they have a clearance, all they would have to do is sign a non-disclosure agreement regarding the [redacted] If they don't have a clearance, let me

know and I'll begin the paperwork...

Let me know what you think. Thanks, [redacted]

All: Based on our [redacted] it is necessary that we obtain FAA Certification of these devices for use in any airborne platform. We recently conducted training in [redacted] with the [redacted] and they refused to "FLY" with the WITT airborne equipment without FAA certifications. Can someone reach out to [redacted] formally and request the FAA Certificates. I know they DO NOT have these, however, if we are purchasing this equipment that is [redacted] for an airborne platform it is a requirement to have FAA certifications.. Any thoughts.

Additionally, I strongly believe that we need not pay for this

All,

I'll start the coordination, but I will need some information first. Certification is at best a loose term. Does the [redacted] need radiation, emmision or airframe certification, or all of the above? I can contact our flight groups to get the aircraft models we fly but will need a [redacted] POC for that information, from there I can contact [redacted]. There is also a good possibility [redacted] will want a government sponsor to go with them to the FAA. It may be best to start communications with the FAA in parallel.

All: Based on our purchase of [redacted] airborne [redacted] it is necessary that we obtain FAA Certification of these devices for use in any airborne platform. We recently conducted training in [redacted] with the [redacted] and they refused to "FLY" with the WITT airborne [redacted] without FAA certifications. Can someone reach out to [redacted] formally and request the FAA Certificates. I know they DO NOT have these, however, if we are purchasing this equipment that is "designed" for an airborne platform it is a requirement to have FAA certifications.. Any thoughts.

Additionally, I strongly believe that we need not pay for this

[redacted]

Is the list of tested platforms from the [redacted] for [redacted] If it is any other equipment it doesn't mean anything. Also the only ones who can approve a testing facility for FAA certification is the FAA. We can see if anyone on the list is already FAA approved. Following up with [redacted] is fine, let me know what he digs up for a list. Also when you contact [redacted] and have him check with the [redacted] as to their specific needs for certification. FAA certification is a large request, just what is it that they need?

Thanks,

[redacted]

All,

I'll start the coordination, but I will need some information first. Certification is at best a loose term. Does the [redacted] need radiation, emission or airframe certification, or all of the above? I can contact our flight groups to get the aircraft models we fly but will need a [redacted] POC for that information, from there I can contact [redacted]. There is also a good possibility [redacted] will want a government sponsor to go with them to the FAA. It may be best to start communications with the FAA in parallel.

[redacted]

I spoke with the pilot and he inquired about the weight of the plane with a pilot, instructor, [redacted] and other personnel. [redacted]

[redacted] will weigh the [redacted] and meet with the pilot to determine what it can handle.

Could WITT send out the [redacted] to us for the class or have the other TDY students bring their own.

[redacted]

[redacted]

Plenty of hotels within a short drive. [redacted]

The [redacted] office is good but is not sufficient for classroom instruction. Conducting instruction in the [redacted] office would be good to hold briefings, etc but not for actual instruction. There are no desks in classroom setting.

Hope this helps.

Hi [redacted]
[redacted] has the most experience with the [redacted] and so far we have arranged for a [redacted] of offices to have the airborne capability. In fact, he is currently in [redacted] with [redacted] teaching a class for airborne operations [redacted]

- For starters, could you forward the following:
1. Model of the [redacted] that you have avail [redacted] ..
 2. [redacted]
 3. If there is a particular or specific [redacted]

I believe the process will start with arranging an airborne class in your area with your folks, and us (WITT) figuring out the class schedules and availability of [redacted]

[redacted] can also explain technically which [redacted] to conduct airborne operations, through his experience. Once we receive answers to the above, we'll take this up with management who most likely will support this as soon as possible if everything is available...
