By selecting all agency users you are allowing all of your **specific agency** users to be notified if this vehicle is detected by **any** license plate reader operating under our shared regional data base. These officers will be notified either by email or via Car Detector application if on patrol.

By Selecting "Select Users" you can assign which users at your specific agency will get notified if this vehicle is detected. Note – the officer driving the ALPR vehicle may not be notified if he was not one of the users selected.

By selecting "Only Email Recipients" allows you to alert someone that does not have a user account at your specific agency.
