LEARN – NVLS
Basic Training

LOGGING IN

- Go to learn-nvls.com
- Click on System User

LOGGING IN

- Use the User Name and Password supplied in the email sent by Leah Green.
- Click OK
- If this is your first time logging in, you will be prompted to change your password.
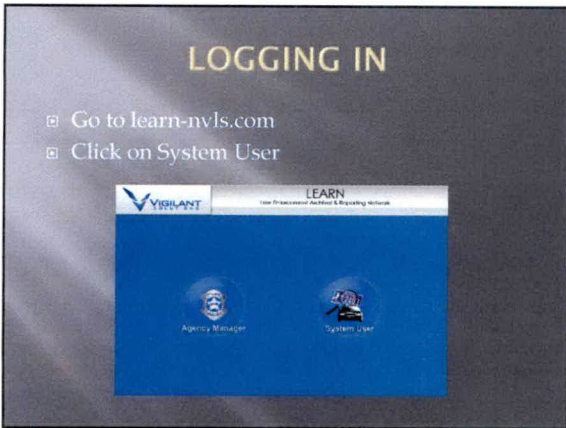

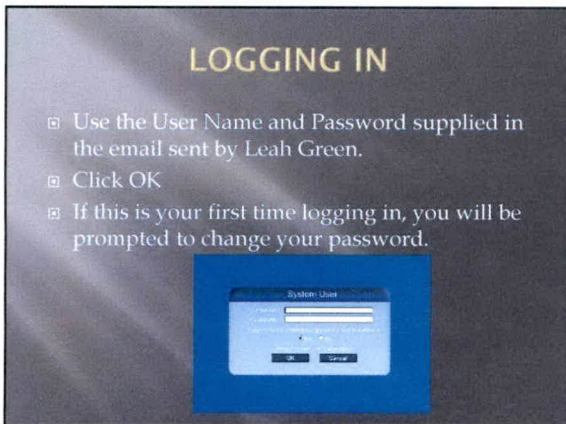

## MAIN MENU

- After you sign in the first time, you will be prompted to change your password.
- Once signed in you will receive this screen:

LICENSE PLATE QUERY

- The most commonly used search is the LICENSE PLATE QUERY.

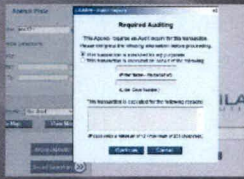

LICENSE PLATE QUERY

PLATE SEARCH

- The plate can be entered in either spot and will be automatically put in the remaining spot.
- Click Search

REQUIRED AUDITING

- After a search, this window will pop up. You can select what is marked or fill in the other information. A person's name and case number is sufficient. You do not need to fill in the bottom box.

LICENSE PLATE READ

NOW WHAT DO I DO?

- After searching for a vehicle, there are multiple things that can be done.
- Are you just looking for the vehicle description?
- Are you looking to find where the vehicle frequents?

WHERE HAS THE VEHICLE BEEN?

Make sure one "hit" is selected and click on Map It.

A map will pop up with a blue dot indicating where the license plate reader obtained the reading.

You can also click on "show address" for a location.

STAKEOUT

STAKEOUT

Stakeout is used to search for vehicles near an address.

Put an address into the address spot and select a time frame (From and To).
Note: You can leave the date range open if you don't have one in you need for sure.

STAKEOUT RETURNS

The list of the left shows each time a plate reader was in the area. It shows the total number of plates scanned on the visit.

By clicking on a visit #, across the bottom it will show all the plates read in the area. It will also show the route that the plate reader vehicle took in the area. You can click on any of the plates across the bottom and it will show the read.
