3 and discoveries that result from the research, if  
4 shared and effectively disseminated, will advance  
5 science and improve the lives and welfare of people  
6 of the United States and around the world;

7           (2) the Internet makes it possible for this infor-  
8 mation to be promptly available to every scientist,  
9 physician, educator, and citizen at home, in school,  
10 or in a library; and

11           (3) the United States has a substantial interest  
12 in maximizing the impact and utility of the research  
13 it funds by enabling a wide range of reuses of the  
14 peer-reviewed literature that reports the results of  
15 such research, including by enabling computational
