July 30, 2007

Subject: SYSTEM DCS-3000 and Red Hook

FOIPA No. 1056287- 000 and FOIPA No. 1056307-1

Dear Ms. Hofmann:

The enclosed documents were reviewed under the Freedom of Information/Privacy Acts (FOIPA), Title 5, United States Code, Section 552/552a. Deletions have been made to protect information which is exempt from disclosure, with the appropriate exemptions noted on the page next to the excision. In addition, a deleted page information sheet was inserted in the file to indicate where pages were withheld entirely. The exemptions used to withhold information are marked below and explained on the enclosed Form OPCA-16a:

996 **page(s)** were reviewed and 781 **page(s)** are being released.

- Document(s) were located which originated with, or contained information concerning other Government agency(ies) [OGA]. This information has been:
 - referred to the OGA for review and direct response to you.
 - referred to the OGA for consultation. The FBI will correspond with you regarding this information when the consultation is finished.

You have the right to appeal any denials in this release. Appeals should be directed in writing to the Director, Office of Information and Privacy, U.S. Department of Justice, 1425 New York Ave., NW, Suite 11050, Washington, D.C. 20530-0001 within sixty days from the date of this letter. The envelope and the letter should be clearly marked "Freedom of Information Appeal" or "Information Appeal." Please cite the FOIPA number assigned to your request so that it may be easily identified.

The enclosed material is from the main investigative file(s) in which the subject(s) of your request was the focus of the investigation. Our search located additional references, in files relating to other individuals, or matters, which may or may not be about your subject(s). Our experience has shown, when ident, references usually contain information similar to the information processed in the main file(s). Because of our significant backlog, we have given priority to processing only the main investigative file(s). If you want the references, you must submit a separate request for them in writing, and they will be reviewed at a later date, as time and resources permit.

See additional information which follows.

Sincerely yours,

David M. Hardy
Section Chief
Record/Information
Dissemination Section
Records Management Division

Enclosure(s)

Please be advised that this is the third interim release as ordered by the court on May 7, 2007 for documents concerning surveillance systems known as DCS-3000 and Red Hook.

A decision has not been made concerning your request for a waiver of fees. We will be corresponding with you concerning that request in the near future. In the interim, we are providing you with the enclosed documents. Pursuant to Title 28, Code of Federal Regulations, Section 16.11, there is a fee of ten cents per page for duplication. No fees are assessed for the first 100 pages. If it is determined that you do not qualify for a fee waiver, duplication fees will be assessed accordingly.

EXPLANATION OF EXEMPTIONS

SUBSECTIONS OF TITLE 5, UNITED STATES CODE, SECTION 552

- (b)(1) (A) specifically authorized under criteria established by an Executive order to be kept secret in the interest of national defense or foreign policy and (B) are in fact properly classified to such Executive order;
- (b)(2) related solely to the internal personnel rules and practices of an agency;
- (b)(3) specifically exempted from disclosure by statute (other than section 552b of this title), provided that such statute(A) requires that the matters be withheld from the public in such a manner as to leave no discretion on issue, or (B) establishes particular criteria for withholding or refers to particular types of matters to be withheld;
- (b)(4) trade secrets and commercial or financial information obtained from a person and privileged or confidential;
- (b)(5) inter-agency or intra-agency memorandums or letters which would not be available by law to a party other than an agency in litigation with the agency;
- (b)(6) personnel and medical files and similar files the disclosure of which would constitute a clearly unwarranted invasion of personal privacy;
- (b)(7) records or information compiled for law enforcement purposes, but only to the extent that the production of such law enforcement records or information (A) could be reasonably be expected to interfere with enforcement proceedings, (B) would deprive a person of a right to a fair trial or an impartial adjudication, (C) could be reasonably expected to constitute an unwarranted invasion of personal privacy, (D) could reasonably be expected to disclose the identity of confidential source, including a State, local, or foreign agency or authority or any private institution which furnished information on a confidential basis, and, in the case of record or information compiled by a criminal law enforcement authority in the course of a criminal investigation, or by an agency conducting a lawful national security intelligence investigation, information furnished by a confidential source, (E) would disclose techniques and procedures for law enforcement investigations or prosecutions, or would disclose guidelines for law enforcement investigations or prosecutions if such disclosure could reasonably be expected to risk circumvention of the law, or (F) could reasonably be expected to endanger the life or physical safety of any individual;
- (b)(8) contained in or related to examination, operating, or condition reports prepared by, on behalf of, or for the use of an agency responsible for the regulation or supervision of financial institutions; or
- (b)(9) geological and geophysical information and data, including maps, concerning wells.

SUBSECTIONS OF TITLE 5, UNITED STATES CODE, SECTION 552a

- (d)(5) information compiled in reasonable anticipation of a civil action proceeding;
- (j)(2) material reporting investigative efforts pertaining to the enforcement of criminal law including efforts to prevent, control, or reduce crime or apprehend criminals;
- (k)(1) information which is currently and properly classified pursuant to an Executive order in the interest of the national defense or foreign policy, for example, information involving intelligence sources or methods;
- (k)(2) investigatory material compiled for law enforcement purposes, other than criminal, which did not result in loss of a right, benefit or privilege under Federal programs, or which would identify a source who furnished information pursuant to a promise that his/her identity would be held in confidence;
- (k)(3) material maintained in connection with providing protective services to the President of the United States or any other individual pursuant to the authority of Title 18, United States Code, Section 3056;
- (k)(4) required by statute to be maintained and used solely as statistical records;
- (k)(5) investigatory material compiled solely for the purpose of determining suitability, eligibility, or qualifications for Federal civilian employment or for access to classified information, the disclosure of which would reveal the identity of the person who furnished information pursuant to a promise that his/her identity would be held in confidence;
- (k)(6) testing or examination material used to determine individual qualifications for appointment or promotion in Federal Government service the release of which would compromise the testing or examination process;
- (k)(7) material used to determine potential for promotion in the armed services, the disclosure of which would reveal the identity of the person who furnished the material pursuant to a promise that his/her identity would be held in confidence.

1.0 Summary:

This document outlines the operational procedures for the LAESP-PLAY program, CSIM test simulator, sniffer, CVT, and other related tools.

1.1 History:

Version	Date	Changes
0.1.0	6/25/2002	draft created, RFC
0.2.0	6/27/2002	update following internal review
0.3.0	6/27/2002	update following test reordering, additional clarifications

1.2 General Notes:

1. All dates should be of the form: 2002_0102.
2. File names should be of the form:

b2
b7E

For example:

From DCS 3000: 2002 0301 test1 01.log

— this is a directory

PASS: FBIHQ, INFORMATION RESOURCES DIVISION, MRS. MORRIS,
ROOM 5829.

(U) SUBJECT: TRAVEL TO OTTAWA CANADA, 5/30/96 AND 6/4-7/96. ~~(S)~~
FOR THE INFORMATION OF LEGAT OTTAWA, EST-4, ELECTRONIC
SURVEILLANCE TECHNOLOGY SECTION, INFORMATION RESOURCES
DIVISION, FBIHQ, HAS BEEN OFFICIALLY REQUESTED [REDACTED]

(S) [REDACTED] TO PROVIDE TECHNICAL
ASSISTANCE WITH THE INITIAL SETUP OF AN EXPERIMENTAL SYSTEM.
THIS SYSTEM, CODENAMED REDHOOK, IS AN INTEGRATED SERVICES
DIGITAL NETWORK INTERCEPT SYSTEM. FBI PERSONNEL ARE REQUESTED
(S) TO DELIVER AND SETUP ONE SYSTEM FOR [REDACTED] IS TO RETURN
THE SYSTEM AFTER THREE MONTHS. ~~(S)~~

b1

IN ATTENDANCE FROM EST-4 WILL BE SUPERVISORY SPECIAL
AGENTS [REDACTED] ELECTRONICS
(U) ENGINEER [REDACTED] AND ELECTRONICS TECHNICIAN

b6
b7C

TRAVEL ON 5/30/96 WILL BE A ROUND TRIP ON A BUREAU PLANE
WITH THE SOLE PURPOSE OF DELIVERING THE REDHOOK SYSTEM TO
(S) [REDACTED]

b1

TRAVEL ON 6/4-7/96 WILL BE BY COMMERCIAL AIRLINE. DURING
(S) THESE DATES, THE ABOVE MENTIONED PERSONNEL WILL ASSIST [REDACTED] IN
THE SETUP AND EVALUATION OF THE REDHOOK SYSTEM. LEGAT
ASSISTANCE IS REQUIRED FOR LODGING. A RENTAL CAR IS REQUIRED
FOR THE DURATION OF THE STAY.

POINT OF CONTACT FOR THIS EFFORT IS [REDACTED]
[REDACTED] CAN BE REACHED AT 703 [REDACTED]

Title: ~~(S)~~ NETWORKS ACCESS DEVELOPMENT (EST-4)
(C) REDHOOK PROJECT

b1

Synopsis: ~~(S)~~ Trip report for travel to Ottawa, Canada in direct support of loaned RedHook equipment [redacted]

b1

(U) ~~Derived from: G-3~~
~~Declassify On: X-1~~

Reference: (U) FD540 #1612992 Serial

b6
b7C

Details: ~~(S)~~ On 6/4/96 [redacted]

[redacted] traveled to Ottawa, Canada at the request of [redacted]

b1
b6
b7C
b7E

~~(S)~~ The purpose of this travel was to demonstrate a RedHook integrated services digital network (ISDN) intercept system for possible deployment and purchase of additional systems by [redacted]. The RedHook system that was used for this demonstration is on a temporary loan to [redacted] for three months with an anticipated return date of 9/6/96.

b1

b1

~~(S)~~ The system was successfully installed and tested at the [redacted] facility. During testing it was discovered that the ISDN lines installed for this demonstration were not functioning normally. The lines were experiencing abnormally high far end bit errors (FEBEs). These FEBEs were occurring in bursts that repeatedly caused the RedHook serial bridge to go into a safety

Case ID : 268-HQ-1001725

Serial : 55

~~CONFIDENTIAL~~

bypass mode. When an ISDN line tester was placed on the line, the FEBEs were found to be intermittent and of varying severity.

(C) The [redacted] were briefed on the RedHook system during a period when the FEBEs were not as severe. Following the briefing, [redacted] gave a live demonstration using the ISDN lines that were experiencing FEBEs. During the demonstration, the system performed perfectly.

b1
b2
b6
b7C
b7E

~~(C)~~ After the briefing was concluded, the ISDN lines again returned to a state of abnormally high FEBEs. [redacted]

(C) [redacted] RedHook system to another location that has known good lines.

~~(C)~~ After returning to the Engineering Research Facility, the [redacted] personnel have repeatedly encountered the FEBEs and asked if the RedHook system could be modified to operate in this abnormal environment. [redacted] has briefed them on the fact that the system presently allows [redacted] times the bit error rate allowed [redacted]

b2
b6
b7C
b7E

[redacted] the RedHook bit error safety bypass function [redacted]

Details: FBI Contract [redacted] was issued to [redacted]
[redacted] This contract was divided into [redacted] phases:

DATE: 06-04-2007
CLASSIFIED BY 65179DMH/KSR/LMF
REASON: 1.4 (B/G)
DECLASSIFY ON: 06-04-2032

ALL INFORMATION CONTAINED
HEREIN IS UNCLASSIFIED EXCEPT
WHERE SHOWN OTHERWISE

Case ID : 268-HQ-1001725

Serial : 59

[Redacted]

At the completion of this contract it was determined that the system required further development prior to implementing

[Redacted]

b2
b7E

FBI Contract [Redacted] was issued to [Redacted]

The purpose of this contract is to ensure that the future RedHook production systems meet the FBI's intercept requirements. The Contracting Officer's Technical Representative for this contract is Electronics Engineer

[Redacted]

b6
b7C

Enhancements that have been added to the RedHook system thus far in the contract are multi-point collection capability, automatic database recovery, bridge transparency improvements, and multiple line cards placed in the virtual memory extended

[Redacted]

b2
b7E

During a recent deployment of the RedHook system the [Redacted] caused several operational problems. The problems are related to the fact that [Redacted] is rapidly becoming defunct.

[Redacted]

The [Redacted] system to control the processing of incoming data from the [Redacted] is used to migrate the captured [Redacted]

[Redacted] for distribution to the user workstations for monitoring and storage.

The [Redacted] used to control this data flow has called for final purchase quantities as it is being discontinued. The updated [Redacted] is incompatible with [Redacted] used with the RedHook PDU. After three months of trying to unsuccessfully get the manufacturer to fix the incompatibility problem, it is the Contracting Officer's Technical Representative's opinion that an alternate [Redacted] should be designed.

b2
b7E

There are several advantages to a redesign of the [Redacted]

A personal computer based [Redacted] would greatly reduce the cost of purchasing [Redacted] systems [Redacted] based [Redacted] costs [Redacted] while a PC based [Redacted] is estimated to cost [Redacted]

The design of the [Redacted] with the ISDN RedHook bridge unit would have to be [Redacted] PC card form factor but not re-designed, and [Redacted]

b2
b7E

The PC based [Redacted] would greatly reduce the size and weight of the [Redacted] weighs [Redacted] pounds and is [Redacted] inches while the PC based [Redacted] would weigh less than [Redacted] pounds and is a standard [Redacted] inches).

The RedHook Project is approaching [redacted] the procurement phase. GSA has already given approval for an indefinite purchase - indefinite quantity contract with [redacted] [redacted] with a ceiling of [redacted]. It is anticipated that this development effort will cost [redacted]. The purchase of 11 systems will be the break-even point for the cost of this enhancement.

b2
b7E

(S) It is anticipated that there will be multiple United States government agencies purchasing RedHook systems, as well as, both the [redacted]

b1

(S) EST-4 is recommending that the Contract Review Unit (CRU) coordinate the tasking of [redacted] to enhance the [redacted] Specifically to redesign the [redacted] to operate on a [redacted] based personal computer.

b2
b7E

EST-4 is also asking for additional funding for both case support and new development of system enhancements required for future deployments. The additional funding for this effort is [redacted]

[redacted] Requisition [redacted] dated 8/28/96 is in place for [redacted] and requisition [redacted] dated 5/29/97 is enclosed to fund this effort. LEAD (s):

b2

Here in TICTU, there is a vast difference between "should be" and "is". I agree that we need to work towards "should be". I started to say more in my earlier e-mail and thought better of it. Here we go...

Most of the information that this local security manager is expecting should in fact be in the SSP. Were we to have gone down the path of separate accreditations per site then we would have this for our site. Currently we are lacking a majority of what this gentleman is asking for [redacted] is correct. It needs to be in the documentation. The process of acquiring this information and getting it all into a consolidated SSP is going to be a long road that is all uphill. As you may remember after my initial trip to [redacted] I found that the [redacted] Field office had no network drawings of their system or interconnecting network interfaces, poor training, poor documentation, and a general dependence on outside services such as [redacted] If we bite off on this, we should plan on visiting each site. In a perfect world I would bring on temporary help to travel to each site gathering information, producing accurate network drawings, and inventorying the system (this is partly why I was concerned that our [redacted] instructions received last week, no longer include the site system inventory)

Let me speak in general concerning our [redacted] Our [redacted] and related documents are in most cases the "bare minimum" required to gain [redacted] When we received [redacted] was surprised. Were I inspecting TICTU, I too would have found [redacted] items. As you found yesterday, there is no plan in place to accomplish the [redacted]

b2
b7E

This request troubles me. I am sure this is going to raise questions. Let me know when you want to meet.

[redacted]

The documentation [redacted] was asking for should be included in the SSP's for the system. On the issue of bringing in / connecting electronic devices, we probably need to discuss it and come up with a plan that is acceptable to the FBI as a whole. I know how most of the IC deals with this issue, but don't know the DOJ answer.

My thought is that there should be unified position and (internally) coordinated guidance before the field is provided information. This will all come rolling into [redacted] lap if it doesn't go well. He should be informed #1. You [redacted] and [redacted] should put your heads together and come up with the answer(s) - this will certainly affect [redacted] too. [redacted] needs to be brought in (thru [redacted] as well.

I believe the SSP(s) is a living document and can be adjusted over time to meet things that come up like this. The Bureau has always been strict on items connecting to networks/systems that contain memory, but costs, benefits, and risks need to be weighed. [redacted] seems to be becoming the new [redacted] for "problems." This has potential to blow up.

[redacted] please see me about this.

b2
b7E

Thanks for the heads up [redacted]

[redacted] gave some guidance for the dcs6000. Thanks [redacted] since ERF is going to get these requests from everyone in the field, I suggest we wait for a unified reply from the ERF folks on the dcs1000,3000 and 5000 platforms at which time we can show how [redacted] has configured the

b6
b7C

Hello y'all - I'm seeking your advice to hopefully save a lot of work. [redacted] just returned from Security training and has been designated the computer/network security person for our Division (ISSO?). He advised that HQ has mandated that he obtain all sorts of info from our systems/networks i.e: DCS 1000, DCS 3000, DCS 5000, DCS 6000 etc.

b6
b7C

[redacted] wants an accounting for all of the systems we, as TTAs & DCSPs, maintain. He wants to have diagrams, schematics, charts etc on what we have and how everything is connected. He wants lists of all of the general users and all of the limited/admin users.

Is this duplicating what has already been done @ ERF w/ the security certification for each system? Or is there a new mandate to have this info on file w/ the specifics for each individual field office?

b6
b7C

[redacted] also discussed restrictions regarding contractors and non employees working on, touching our systems. He even mentioned the phone company installers when they come to install/troubleshoot circuits etc. My understanding from this conversation is that they are not suppose to bring in computers, test equipment, etc that have memory etc. We are suppose to supply the computers/equipment for them to use.

b2
b7E

I know that when [redacted] comes to install our new [redacted] the week after next, that they will have their own computers, flash drives etc. I know that when [redacted] was just here to upgrade our database they brought [redacted] will have equipment to test the new DCS 3000 network connection in the [redacted] RA in the next couple of weeks.

b6
b7C

How can we best handle this situation? Do I need to get a copies of the certification documents from ERF to give to [redacted] or should we just walk him through our system and have him make diagrams. Is there something in writing that I can read to better understand what I have to do when [redacted] etc come into our space?

Any advice, comments etc would be helpful.

A screenshot of a software application window titled "Configure". The window is divided into two main panels. The left panel, titled "Target Selection", contains a grid of data with a horizontal bar chart overlaid on it. Below the grid is a "Refresh" button. The right panel, titled "Cell Analysis", is currently empty. At the bottom of the right panel are three buttons: "Map Cell", "Time of Day", and "Day of Week". The window has a standard title bar with minimize, maximize, and close buttons. The overall image is heavily textured and appears to be a scan of a physical document.

Purpose

The SBIC is an introductory course on CALEA intercept techniques and procedures. Upon completion of this course students should have a basic understanding of the CALEA Paradigm and specific training on the implementation of CALEA pen register collections utilizing the DCS 3000 suite of applications.

Background

The Switch Based Intercept Team is responsible [REDACTED]

DCS-3000 is the current interim solution used by the FBI

The FBI is investigating and deploying other options from outside vendors

b2
b7E

Goals and Objectives

Switch Based Intercepts Course

Educate TTAs on:

Technologies utilized, FBI equipment needed, connection information for service providers, DCS-3000 application hardware, operating system, and infrastructure needed for implementation and maintenance

Enable "graduates" to implement and maintain switch based intercepts in their field divisions with specific training on the DCS 3000 system
