[Redacted] I returned the call to [Redacted] His question(s) centered around whether the Digital Collection project involved software/code development or equipment replacement/upgrade. I told him it was more of the latter - that we don't do development - although there is some development involved in the DCS-3000 albeit small compared to the rest of Digital Collection. He asked about the [Redacted] requested in the FY08 budget enhancement and I told him that while those individuals would assist in gathering the requirements for the New (if required) system for the current (ending lifecycle) system, they will be needed to implement and support Digital Collection. Hope the conversation doesn't come back to haunt.

b6
b7C

Right after I hung up [Redacted] called saying that our appeal of the FY08 enhancement [Redacted] was approved by DOJ for forwarding to OMB for approval.

This is a follow-up to my e-mail below (and to yesterday's e-mail from GC Caproni to ADs.) , which resulted in you folks being identified as the likely ticket holders for this action (due Friday).

This is taken from a list provided me--I apologize for any misspellings. Also, if you're not the right person, please contact me ASAP to dime out who is.

I will try to contact you by phone later today, but please feel free to call me first if you'd like (202-324-[redacted]). As detailed below, actions require completion of at least one and maybe more Privacy Impact documents for the following systems for which I understand you are the POC. (I assume the ISSO probably has primary ticket, but this would be for ISSO and owner to work out.)

Chemical Network: ISSO: [redacted] System Owner: [redacted]

CJIS WAN: ISSO: [redacted] /System Owner: [redacted]

Hope all went well at your meeting and the Dr. Appt....

I spoke with Mr. Clifford, and advised him that we are working on this project and most of the requested documentation will be sent to [Redacted] by COB today. Mr. Clifford thanked us for doing a good job for such a short deadline.
(Please put a note on the email to [Redacted] advising that attached is what we have found to date and we are still working on this issue).
(Please have on the CC Mr. Clifford [Redacted] and me... thanks)

b6
b7C

Further, I advised Mr. Clifford of the other issue regarding the Privacy Impact Assessments (PIA) and DCS-3000, and that the deadline for this task is June 9th.

If there is anything I can do to help you, please let me know.

Interesting question. Let me check with ERF. I thought that our devices kept a raw data file on the system, but perhaps not.

[redacted] will look into this with our telephone group. I will be up your way over the weekend and will try to follow up.

PRIVILEGED DELIBERATIVE DOCUMENT - NOT FOR DISCLOSURE OUTSIDE THE FBI WITHOUT PRIOR OGC APPROVAL

[redacted]
Associate General Counsel - Unit Chief
Science & Technology Law Unit
Engineering Research Facility
Bldg 27958A, Room A-207

Please let us know if you need additional information. Thank you.

(1) The table below provides the estimated project costs to interface the DCS-5000 to Trilogy.

DCS-5000 Project IT Costs

System components (WAN)	\$ 388,000.00
Networking equipment	\$3,337,000.00
Encryption equipment	\$ 814,000.00
Network maintenance/control*	\$ 250,000.00
Software development	<u>\$ 153,000.00</u>
	\$4,942,000.00

*Recurring cost

Amounts are based, in part, on numbers of networking equipment and costs provided by [redacted] for 82 systems in field offices and resident agencies.

(2) SBIT's Input from [redacted]

The cost of the hardware, software, and the development work for the interface to the Trilogy network or other FBI IT infrastructure for the DCS-3000 system is approximately \$750,000 per year. The majority of this cost is for hardware (e.g. routers and other networking equipment). The DCSnet costs are approximately \$500,000 per year if you include the IP service contract we have with [redacted] can elaborate on this topic if needed.

[redacted]

This is tied primarily to future requests for money, 300 exhibits and requisition in FY07 and forward. However, the cost of each system should be looked at so we can determine our investment and support needs that are truly IT.

We would like to know the cost of the part of each system that is IT (that allows our collection systems to connect to trilogy, operate remotely over an IT system, prepares data to be sent over/to an IT system).

I know this is a little vague but we need an estimate with some basis behind it.

Thanks

The cost of the hardware, software, and the development work for the interface to the Trilogy network or other FBI IT infrastructure for the DCS-3000 system is approximately \$750,000 per year. The majority of this cost is for hardware (e.g. routers and other networking equipment). The DCSnet costs are approximately \$500,000 per year if you include the IP service contract we have with [redacted] can elaborate on this topic if needed.

Ken

To All,

Due to the move, please provide [redacted] with all submissions no later than 3pm today. [redacted] and I will gather the data to send it to the front office later this afternoon.

[redacted] - the DCS-6000 does not connect to trilogy, operate remotely over an IT system, or prepares data to be sent over an IT system. But, how it relates to DCS-NET may be a different story. So as not to duplicate numbers, if there is an IT cost for the 6000 and DCS-NET, can you include that number (and notation) with your estimate? Thanks.

[Redacted]

Per our discussion, here are some items of interest/or concern with regards to DCS6000 remote workstations. Also, I have talked with [Redacted] and his is in agreement that Chicago would like to be a test site once this capability exists. We would be interested in an estimated time frame that this could happen and if there is anything that could be done to speed up the release of this technology.

Concerns/or Issues that may need to be addressed:

Legal - Monitoring/collecting in different jurisdictions
Network - Minimum bandwidth, encryption
Security - Encryption, Accreditation

b6
b7c

Possible requirements at a remote site:

Computer(s) (DCS6000/3000)
Router + (T1's (Network connection/data) and/or ISDN's)
Remote Server

[redacted]
I am forwarding this e-mail to you in regards to the legal and accreditation issues mentioned below. Chicago desires to remote a T-III from headquarters city to their [redacted]

[redacted] - the [redacted] collecting for years, so one would think the jurisdictional issue is not an impediment or has yet to be challenged in the courts. Do you foresee problems? b2 b7E

[redacted] - as for Security, would accreditation be a problem if TICTU addresses this case from a proof of concept perspective? The VoiceBox (VB) collection system will be going through the C & A process again shortly. Also, this system is unclassified, and even though the interception would be traveling from Chicago to [redacted] (from/to FBI controlled space) via a T-1, the routers will have encryption. Is that enough to satisfy Security? Any additional foreseen problems? b6 b7C

I believe FBI criminal collection is moving in this direction anyway, so now may be the time for TICTU to do some R & D. Thanks.

[redacted] Here are the questions posed which we discussed earlier today:

1. Identify and fully describe the DCS-3000 database.
2. The FBI's practice regarding storing, accessing, marking, deleting, and handling of FISA materials within the system.

There is another question re minimization procedures which could be adopted on an expedited basis, but I don't believe this would pertain to the DCS-3000. It seems the time line for completing this is on hold, so please do not rush to get this completed. Thanks.

Gents,

After many internal discussion regarding the Certification and Accreditation (C&A) process of systems, we [AU, CU, and I] came to the conclusion that combining systems under one C&A makes sense (in some cases). I'd like to get your opinion on this matter as I'm looking to combine the collections systems (DCSnet, DCS 3000, 5000, 6000, and J3094) under one C&A (if that makes sense to do so).

I'd like to arrange a meeting for 13:30 tomorrow 19 January to discuss and collect your comments. We can meet in my office unless someone has a better alternative.

Cheers [Redacted]

Hello Guys,

Here is an e-mail moving about regarding C & A.

Please review.

[Redacted]

Gents,

After many internal discussion regarding the Certification and Accreditation (C&A) process of systems, we [AU, CU, and I] came to the conclusion that combining systems under one C&A makes sense (in some cases). I'd like to get your opinion on this matter as I'm looking to combine the collections systems (DCSnet, DCS 3000, 5000, 6000, and J3094) under one C&A (if that makes sense to do so).

I'd like to arrange a meeting for 13:30 tomorrow 19 January to discuss and collect your comments. We can meet in my office unless someone has a better alternative.

Cheers [redacted]

After speaking with you, I have conversed with members of TICTU to provide answers to the questions that were posed to you (see below). I know [redacted] has also spoken with you. Be advised that we (OTD) always prefer to have the field office's TA (TS or TTA) contact us with questions so that everyone is on the same page. Still, we here to help anyone who asks of it. I hope this helps.

Subject: Digital Collection description

~~UNCLASSIFIED~~
~~NON-RECORD~~

[Redacted] hope this provides what you need. If not, please let me know. If you need a more succinct or technical description, I'll provide it.

b6
b7C

Glad we finally met. Thanks for your help. [Redacted]

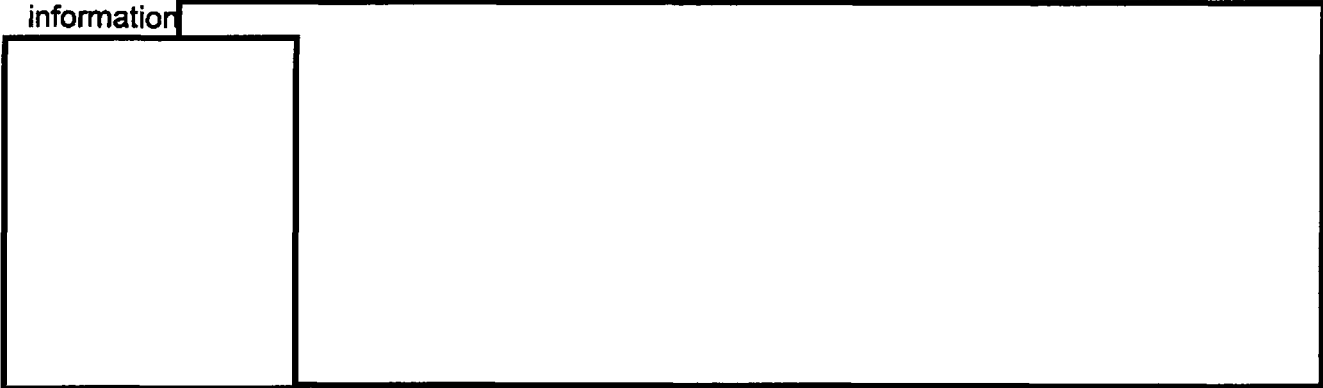

Digital Collection consists of the DCS-3000, DCS-5000, and DCS-6000, which provide digital collection tools, foreign counterintelligence gathering, and law enforcement evidence collection, respectively. Digital Collection supports the FBI's mission to ensure the ability of the FBI to collect evidence and intelligence through the acquisition, deployment, and support of communications interception techniques and systems to facilitate and support national security, domestic counterterrorism, and criminal investigative efforts. Systems being acquired under the Digital Collection program include systems (foreign counterintelligence and law enforcement) that possess similar functions and capabilities to intercept telephone, microphone, and facsimile communications; however, the primary difference is law enforcement system's requirement to minimize collected communications. The passage of the Communication Assistance to Law Enforcement Act (CALEA), the implementation of state-of-the-art personal security features, and the explosion of telecommunication options (caller ID, call waiting, call conferencing, etc.) spotlighted the deficiencies of the legacy systems.

The Digital Collection Program provides the FBI with the means to collect evidence and intelligence through the acquisition, deployment, and support of communications interception techniques and systems which facilitate and support national security, domestic counterterrorism, and criminal investigative efforts. Systems provided through this program intercept multi-source digital (and analog) communications information for intelligence gathering for foreign counterintelligence activities and investigative purposes for providing evidence of criminal activity for trial. It should be noted that those systems used for criminal investigations possess a requirement to minimize intercepted voice sessions, (i.e., record only when the call is being actively monitored). Electronic information collected includes pen register (incoming and outgoing dialed digits, caller identification, date/time of communication, and other signal related information), analog and digital telephone calls, facsimile and modem transmissions, and microphone audio. High density drives and magneto-optical disks are utilized for temporary and permanent storage, respectively; no special,

~~SECRET~~

environmental storage facilities are needed. Digital Collection systems are used primarily by FBI field offices and Resident Agencies in support of active foreign intelligence and criminal cases. Support is also provided to other federal, state, local and tribal agencies, as required.

The Digital Collection Program has evolved during its life cycle and has become more complex. Even so, digital collection systems are computer-based systems comprised primarily of commercial-off-the-shelf hardware and software with limited proprietary application software. Incorporated technological advances allow Case Agents to easily and effectively manage the recordings electronically, which dramatically increases the efficiency of trial preparations. While each Field Office or Resident Agency is self-sustaining in its ability to process intercepted information

SENSITIVE BUT UNCLASSIFIED

NON-RECORD

[redacted]

Below are the goals/accomplishments for the DCS Program in FY2005/2006:

OBJECTIVES/ACCOMPLISHMENTS FOR 2005 (I have only included those goals which were pertinent to DCS' mission in 2005)

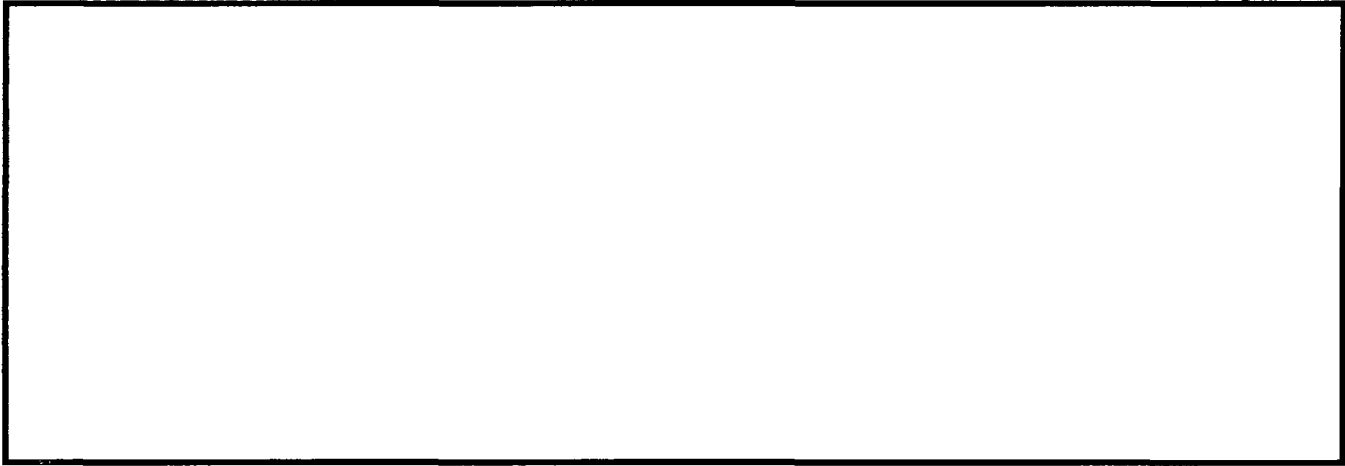

vi

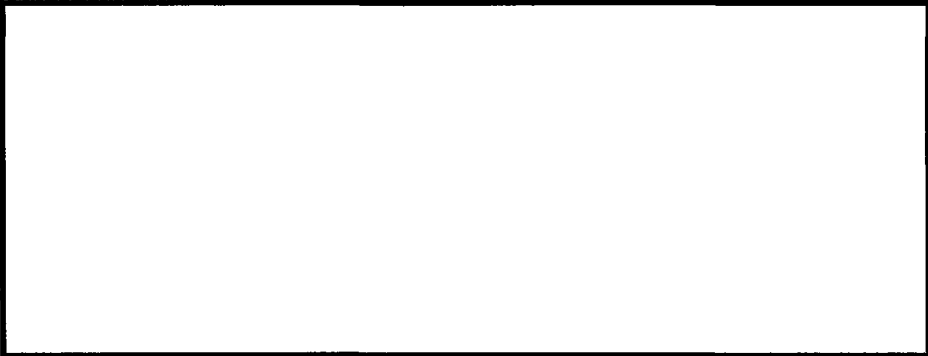

DCS-5000/6000 Project Goals for FY2006:

b2
b7E

5000 Objectives:

6000 Objectives:

b2
b7E

Additional Program Goals for FY2006:

1. Consider possible realignment of teams/responsibilities
2. Visit four (new) digital collection vendors
3. Assess need for additional personnel, to include:
 - Full time TICTU Security professional
 - Technical writer
 - Secretary/Assistant
 - Data Base Administrator
 - Additional ET/EE/etc.
4. On-site visit to [redacted] re hub system concept
5. On-site visit to [redacted] re regionalization concept
6. Consider way to evaluate work activity for efficiency/staffing/work
7. Consider pilot testing Domain Server Access for back-up of FO servers (DCS-5000 server Disaster Recovery

~~SECRET~~

- 8. Expand Program's visibility in TICTU's annual East/West conference
- 9. Develop a project plan to reflect and monitor DCS-5000/6000 (DCS-3000?) project goals for FY2006

Please note that there were other FY2005 goals which I considered as part of our mission/normal activity. Hence, there was no need to entertain them in this correspondence. Also, I have been informing my personnel that due to these lean times, it would be prudent to not simply respond to any request with a "yes". It would be better to say "yes...we can probably do that, but let me get back to you..." We must be able to assess the impact of a request before we commit to it.

Industry best practices suggest that a review and impact statement be generated outside of a project's scope/plan (I know we are government). Simply "knee-jerking" to every request leads to "robbing Peter to pay Paul" situations which does not reflect well on any organization. There are other units/offices who's tail is 'wagging the dog' (us) instead of the other way around.

Please disburse to program members after review/changes. Thanks

[redacted]

Would ya'll forward this to whom ever you may think needs it, especially in the TICTU realm. Tomorrow, space management and FBI movers will commence moving all of our TA/ET/CMP equipment from New Orleans to our new offsite [redacted]. This includes moving all CMP equipment (Voice Box, DCS3000 [redacted] etc).

During this move I am sure things will be damaged. We cannot leave anything in place for space management is to begin gutting our entire field office next week. In a perfect world, we will be back in our New Orleans office by the end of May, or early June '06. In the interim our division will be scattered in bldgs from Covington, LA to Baton Rouge, with Baton Rouge having several bldgs housing different programs. I have asked TTA [redacted] to contact TICTU, et al to help set up temporary DCS 3000, etc in our Shreveport RA. As for as any CMP down here, I do not know at this time how that will evolve, but once we get all equipment up here in BR, perhaps BAE could send some contractor types to check out all of our equipment. Also, I am sure we will have to surplus equipment but we will take it one step at a time.

b2
b6
b7C
b7E

[redacted] I may ask for a few TTAs in the next week or so to come and help set up our new space. There is a TR# associated with this that I will get for you if/when needed. Lodging is still an issue and anyone who comes should be prepared to sleep in TRU tents (A/C'd) or in our new space on cots. Just let those interested in coming what the conditions are. I will speak with you more on this when the time comes. I am the only TTA in NO that did not have significant damage t my house. All others are out til at least 10/1 on admin leave.

That's it for now. I'll keep you posted.

RECORD 269-HQ-1366780

As you can see, we are working the issue. One thing we will need is additional power. - Specifically three each 30A circuits. These will be required to support any upgrade of the Gitmo system, and as can be seen from [Redacted] trip report (attached) they would allow us to increase the UPS configuration supporting the existing system and hopefully improve its performance until we can get it replaced. We are hoping to replace the existing 1500 UPS with the 3000 models / and ERM's (Extended Run Modules) Each of these is a 4u rack mount so verify that you have rack space as well.

b6
b7C

Please let us know if/when the additional power ckts may be ready .

below would ensure success in accomplishing one of the goals established for our annual conference – to provide a forum for the exchange of information on the current status and future vision of key programs of interest to attendees.

We have identified several SME topics for presentation this year and will allocate approximately ¼ of the day on Sunday, 16 October, to the SME presentations. We anticipate 50 minute sessions that would include the presentation and a question/discussion period. There will be 10 minutes between sessions. We have secured sufficient space to accommodate each of the topics noted below.

The proposed SME topics are:

1. DCS3000 [redacted]
2. Analytical Tools [redacted]
3. EDMS [redacted]
4. DCS5000 [redacted]
5. Language Services [redacted]
6. CART SAN [redacted]
7. DCS6000 [redacted]
8. RCFI [redacted]
9. PMO/RMS [redacted]

b6
b7c

Please contact [redacted] to confirm your participation in the ETMU Annual Business Conference as an SME by 24 June. If you are unable to participate, please consider an alternate to attend and present on your behalf. Please include anticipated audio-visual requirements with your response so that we can plan accordingly. We will schedule a meeting with the SME team in advance of the conference to review details of the SME portion of the agenda and answer any questions you may have. Please feel free to contact [redacted] at 540-[redacted] if you need any additional information.

[Redacted] Unit Chief of the ELSUR Technology Management Unit (ETMU), requests your

participation in the 2005 ETMU Annual Business Conference. This year's conference is scheduled for 14-16 October, in Skokie, IL, at the Hilton's Skokie Hotel and Executive Conference Center.

The 2004 conference planning committee received extremely positive feedback regarding the Subject Matter Expert (SME) presentations. The compelling message was to continue the presentations in 2005 and to expand on the topics and time allocated for presentations. There is a high level of interest in your area of expertise. Your participation as an SME on the topic noted below would ensure success in accomplishing one of the goals established for our annual conference – to provide a forum for the exchange of information on the current status and future vision of key programs of interest to attendees.

We have identified several SME topics for presentation this year and will allocate approximately ¼ of the day on Sunday, 16 October, to the SME presentations. We anticipate 50 minute sessions that would include the presentation and a question/discussion period. There will be 10 minutes between sessions. We have secured sufficient space to accommodate each of the topics noted below.

The proposed SME topics are:

- 1. DCS3000 [redacted]
- 2. Analytical Tools [redacted]

[redacted]

In reference to telcall message left for UC [redacted] on 5/2/2005 re persons available for VB and DCS-3000 expert testimony, JSI has provided the name [redacted] contact numbers [redacted]. As for the DCS-3000 matter, I doubt if someone here will be traveling to your neck of the cacti to testify. It was pointed out to me that a simple way to verify the accuracy of the DCS-3000 is to compare its data with that of the pen register for that line. Still since I believe this is not the answer you are looking for, you may want to contact [redacted] 703 [redacted] or [redacted] 703 [redacted] and either one would be able to assist one of your TTA's in understanding the functions of this equipment so that one of them (or yourself) can testify. I hope this helps.

[redacted]

~~SECRET~~

The first new employee orientation in 2005 is scheduled for May 10 - 12. Your involvement in 2004 was a key factor in the success of all orientations conducted. As our team continues to merge over the coming months I shall appreciate your feedback and involvement in continual enhancements to the orientation program. As evidenced by orientation survey results and management feedback, new employees are being assimilated more effectively and expeditiously.

The Agenda is attached for your review. I hope that your schedule will allow you to participate. The technology manager portion of the program is scheduled for Wednesday 11 May from 1:45-2:45 and 3:00 to 4:00 (a short break scheduled between sessions). Please let me know if you (or a designated alternate) would be available to provide an overview of the following systems:

1:45 - 2:15 DCS3000
2:15 - 2:45 [redacted]
2:45 - 3:00 Break
3:00 - 3:30 DCS5000
3:30 - 4:00 DCS6000

b2
b7E

For planning purposes the remaining 2005 orientations are scheduled for: August 9-11 and November 8-10.

Thanks in advance for your time. I look forward to your feedback on the agenda and your participation. Please call me with any questions you may have.

I've been at Reston the last few days, but had [redacted] get in touch with [redacted] directly to pass their wish list re the meeting in Ottawa. I assume you have received that by now, if not I can print their topics and will bring you a hardcopy. I finally received them on Wednesday.

I also know they are trying to come down here to talk with you on Monday 25 April. Do you have a time and location established? My understanding, the visitors will include the following:

b1
b2
b6
b7C

- (S) [redacted] (staff, telephony ops officer)
- [redacted] (contractor, current telephony program PMOE)
- [redacted] (staff)
- [redacted] (staff, telephony ops officer)
- [redacted] (staff, C/Athtech Technical Surveillance Branch)
- [redacted] (staff, C/Bangtech Technical Surveillance Branch)

I'll take care of clearances, meet at ERF and getting them to the meeting location. Let me know.

I also understand [redacted] and [redacted] will be going to Ottawa to meet with [redacted] and JSI Management. I have their itineraries if you need that information. Just let me know. [redacted] was sending a cable out in our channels, to our Ottawa Chief of Station, to advise him of our visit and meet with JSI.

Hopefully this is all in sink. Let me know if something is needed from you view. [redacted]

[redacted]
In talking with the DCS-5000 team, there is no "book" which has logged trouble calls for Raytheon. They do have a monthly database from which they can gather information, but this would have to be done individually and would take too long to assemble. I saw [redacted] who advised that 1129 RMSs were submitted re [redacted] for 2004, and 194 were submitted for VB during the same period. These numbers do not reflect trouble calls only (it includes requests for DCSP support, MOs, work stations, etc.) [redacted] will be providing you with JSI's book.

b2
b6
b7C
b7E

I have attached bullets re Raytheon which [redacted] and [redacted] provided me.

In talking with [redacted] there is currently [redacted] active [redacted] systems and [redacted] inactive [redacted] e.g., equipment migration/in-transit) systems.

[redacted] advised that the \$2.8 million recently approved by the CRB was for a one year GOLD PLAN maintenance agreement with JSI which includes all software upgrades/updates/patches and hardware repairs/replacements. [redacted] added that for the past few years JSI has been inquiring about JSI doing remote maintenance for us, but we have always refused to pursue this issue. Apparently, there are security concerns (we insist any remoting has to be done from here only), and the DCS-3000 team will have difficulty allowing JSI to have access to DCS-NET.

Subject: Portable Voicebox

SENSITIVE BUT UNCLASSIFIED
NON-RECORD

[redacted]

Several months ago, I spoke to you regarding our task force squad that purchased its own Voicebox digital collection system and needed the OK from Security Division to use it on FBI cases. This is still in the works on our end, but we have a similar situation regarding a portable system and require the input of Security Division before we move forward.

Quantico ERF has supplied our division with a portable Voicebox system, but it is currently in use in our Toledo RA. The case agent in our Youngstown RA would like to conduct an upcoming FBI T-III on a digital system (rather than cassette tapes), but we do not have another system available (niether does ERF). The local HIDTA has purchased a portable Voicebox system and has agreed to let the Youngstown RA use it for this T-III. The system will be operated in the RA space and would be connected to our DCS-3000 network to obtain telephone target data. According to ERF, there is an acceptable configuration which enables secure transfer of the data. The issue arises in regards to conducting an FBI case on a system that is not owned by the FBI. As far as the data and audio that will be stored on the system is concerned, if necessary, we could remove the hard drives from the system before it is returned to HIDTA (replacements would have to be supplied by the FBI and software reloaded by the manufacturer).

b6
b7C

From the security standpoint, can we use this system to conduct this upcoming T-III? Are there any other issues that must be resolved?

If you have any questions, please feel free to call me.

Thanks,
[redacted]

NON-RECORD

[Redacted]

[Redacted] TICTU) and I collaborated on this issue and agree that the course of action is acceptable. Such that: the Hard disk drive must either be FBI property before the start of the operation or seized, kept/controlled by the FBI before the end of the T-III intercept. We expect that the drive will be replaced by the bureau at our expense if we choose to "borrow the unit."

Follow-on concerns should be addressed to the TICTU PM for resolution.

Cheers [Redacted]

~~RECORD~~

[redacted]

~~SECRET~~

~~SECRET~~

I forwarded all the [redacted] sessions I had for 8/8-9/06 (up through about 1530 hrs) and attached is a copy of the DCS3000 report for this same period. You will see that DCS shows Associated DNs in some sessions and [redacted] does not. You will see that DCS3000 shows more calls than [redacted] reports. Thanks for all you've already done.

We tried it on a couple of lines and we still get 0 second sessions, but there are a lot less of them being generated. We will need to keep exploring options for fixing the problem.

Subject: DCS-3000 One-Way Push - Status Update (2/7/05)

~~SENSITIVE BUT UNCLASSIFIED~~
~~NON-RECORD~~

All,

b2
b7E

The one-way push is currently being field tested at site [redacted] and [redacted]. There are field issues involving the performance between the one-way push and the [redacted]. All parties involved are working to correct and improve the systems performance. In parallel [redacted] testing is soon to begin within the ERF facility. This is a complex and integral part of the overall solution.

Upon completion, this functionality shall be field tested as stated above.

To date, [redacted] field offices have received the one-way push equipment for installation. Twenty sites have completed the install, but not yet activated for connectivity. Remaining sites can expect to receive equipment throughout the year and prepare for installation. Each site shall be informed in advance regarding installation and activation. ERF is committed to minimize both operational risk and system failures. There shall certainly be growing pains as we expand the amount of users incorporating CALEA into the FCI cases. There is a vast number of telco providers and switch vendors that make an exhaustive in-house test virtually impossible. So some point in time, additional sites will be connected in order to field test as needed. We appreciate your cooperation and patience regarding this development process.

b2
b7E

Regards,

[redacted]

Subject: DCS-3000 One-Way Push - Status Update (2/7/05)

~~SENSITIVE BUT UNCLASSIFIED~~
~~NON-RECORD~~

All,

The one-way push is currently being field tested at sites [redacted] and [redacted]. There are field issues involving the performance between the one-way push and the [redacted]. All parties involved are working to correct and improve the systems performance. In parallel, [redacted] testing is soon to begin within the ERF facility. This is a complex and integral part of the overall solution. Upon completion, this functionality shall be field tested as stated above.

b2
b6
b7C
b7E

To date, [redacted] field offices have received the one-way push equipment for installation. Twenty sites have completed the install, but not yet activated for connectivity. Remaining sites can expect to receive equipment throughout the year and prepare for installation. Each site shall be informed in advance regarding installation and activation. ERF is committed to minimize both operational risk and system failures. There shall certainly be growing pains as we expand the amount of users incorporating CALEA into the FCI cases. There is a vast number of telco providers and switch vendors that make an exhaustive in-house test virtually impossible. So some point in time, additional sites will be connected in order to field test as needed. We appreciate your cooperation and patience regarding this development process.

Regards,
[redacted]

Disregard the phone message I left you. You guys installed the equipment recently. We just haven't had anything up lately on that. The next install we're waiting for is our [Redacted] line install in June.

Your communication was as "complex" as the solution, and uncomprehensible for some of out in the field :-). Please define, or explain the following:

One Way Push sites and [redacted]

[redacted] (just kidding-at least this one I think I know)
In the future please don't use acronyms and phrases without identifying what they mean.
Thanks,
[redacted]

Subject: DCS-3000 One-Way Push - Status Update (2/7/05)

~~SENSITIVE BUT UNCLASSIFIED~~
~~NON-RECORD~~

All,

The one-way push is currently being field tested at sites [redacted] and [redacted]. There are field issues involving the performance between the one-way push and the [redacted]. All parties involved are working to correct and improve the systems performance. In parallel, [redacted] testing is soon to begin within the ERF facility. This is a complex and integral part of the overall solution. Upon completion, this functionality shall be field tested as stated above.

b2
b7E

To date [redacted] field offices have received the one-way push equipment for installation. Twenty sites have completed the install, but not yet activated for connectivity. Remaining sites can expect to receive equipment throughout the year and prepare for installation. Each site shall be informed in advance regarding installation and activation. ERF is committed to minimize both operational risk and system failures. There shall certainly be growing pains as we expand the amount of users incorporating CALEA into the FCI cases. There is a vast number of telco providers and switch vendors that make an exhaustive in-house test virtually impossible. So some point in time, additional sites will be connected in order to field test as needed. We appreciate your cooperation and patience regarding this development process.

Regards,

[redacted]
