b6
b7C

**UNCLASSIFIED
NON-RECORD**

For urgent requirements, the req process can be shortened by having it walked thru the building and up to Headquarters; this requires a couple of days rather than weeks. [redacted] should be able to help the req thru the approval process once it gets to HQ. We should also consider buying whatever equipment possible thru credit card until another vehicle becomes available.

b6
b7C

-----Original Message-----

From: [redacted]

b6
b7C

Subject: RE: Site Surveys
Importance: High

**UNCLASSIFIED
NON-RECORD**

[redacted] - We need to discuss this. The current [redacted] Requisition took several weeks to get thought the approval process, and is now being held until we define our requirements to [redacted] so he can go before the Board to have the ceiling raised for this [redacted] order.

If we go with giving all [redacted] to Raytheon on the existing Requisition our intervals look like this:

b2
b6
b7C
b7E

- [redacted] to go before board (depends on when they meet)..... January 13 (a guess at their next meeting)
- Equipment Order to Raytheon.....January 14
- 120 days After Raytheon's receipt of order to delivery.....May 13
- First possible date of installation.....May 16, 2005

If we go back to the requisition process to have the [redacted] broken into a Raytheon pot and a GSA Schedule pot, we are looking at the following:

- Requisition process...6-8 weeks (Start December 30, 2004)..... February 24
- [redacted] to go before board (depends on when they meet)..... March 4 (a guess at their next meeting)
- Equipment Order to Raytheon.....March 7
- 120 days After Raytheon's receipt of order to delivery.....July 4
- First possible date of installation.....July 11, 2005

b2
b6
b7C
b7E

I'm not recommending giving all [redacted] to Raytheon, but if your desire to have these systems installed by May at the latest, I don't see any other way to do it unless there is some expedited requisition and manufacturing process of which I'm not aware.

SENSITIVE BUT UNCLASSIFIED
RECORD [redacted]

b2

Gentlemen:

The C&A process for the Red Wolf system is progressing [redacted]

[redacted]
[redacted] This will be the next step for [redacted]

[redacted] time (which would also be followed by a round of testing.

b2
b7E

[redacted] I'd like to do this today.
[redacted] has not yet had the
[redacted] will be installed today . I was notified
that we need [redacted] well into the future.

[redacted] and can be accomplished at a later time.

I will need some assistance in testing the REDWOLF system before we go to the next phase of "cures" I am available to assist in this testing whenever is convenient to your schedules.

Just to explain a bit further, I am installing these cures incrementally so as to allow us to determine if we have inflicted any unforeseen problems into the system as we progress This would allow us to backstep

12/7/2006

and eliminate any incompatible patches from our baseline. However, testing of the system after these incremental "cures" is of utmost importance.

Implementing a large number of fixes all at once could cause a great deal of downtime if it were not discovered early-on. This of course would make it very difficult to identify which "cure" caused the resulting problem (were one to occur).

Feel free to send me your comments, suggestions, and/or concerns.

RECORD** [Redacted]

b2

Gentlemen,

I have some questions which need to be addressed to the Redwolf Development team in [Redacted]. I am going to narrow my questions to Network Services for now. First I would like to refer you to the [Redacted]. [Redacted] I have a copy on my desk if anyone would like to look it over. Network Services in discussed starting on page 57 and continues to page 82.

[Redacted]

b2
b7E

aware of, and we can ask them to add this to our "vulnerability list". In particular those services followed by double asterisks require particular attention as I believe these are currently turned on and in use..

[Redacted]

b2
b7E

[Redacted]

[Redacted] This will be a great start.

Thank you for your assistance,

[Redacted]

b2

Increasing the [Redacted]

(S)

[Redacted] If it is going to be that much of a problem, the other two systems could be [Redacted]

It was under our impression from discussions with the [Redacted] engineers that [Redacted]

[redacted] They thought it would be just a simple [redacted] our lab use. Again, we stress lab use. All three systems will be in different lab development areas with different engineers trying to [redacted] the Redwolf system. The [redacted] would be the most cost effective and simple solution [redacted] the Redwolf. CALEA protocol seems to be left at the interpretation of the C.O. manufacturers and Redwolf developers and does not support (in our interpretation) dynamic allocation. Another ERF Engineer, [redacted] is looking at the [redacted] Redwolf and provide a solution for [redacted] engineers informed us [redacted] the best solution for dynamic allocation methods.

b1
b2
b4
b6
b7C
b7E

This request for the four items is to allow us to begin to evaluate [redacted] From this, we can determine what [redacted] support and return our recommendations for better support [redacted] We have to get the systems first to be able to preform this evaluation. These four items, in our view based upon our exposure [redacted] during training, would provide a quick way to get started on evaluation for future use. We already have other changes that we would like to have designed into the Redwolf but knew it would require major engineering changes/development [redacted] These items would be discussed at a later time with [redacted] and other engineers [redacted] We do agree that there may and will be problems with [redacted] but we will find them through our testing. Again it was our understanding that [redacted] Engineers at [redacted]

[redacted] is not left out. Right now, we need to see what [redacted] so that we can come to the table with engineering changes. During this same time, [redacted] can define the [redacted] requirements of her systems. But this would be major engineering design changes/effort on [redacted] part.

SSA [redacted] will be contacting [redacted] for further management discussions. The above statements are in concurrence with all [redacted].

All,

I don't intend to make any further preparations until management has a discussion and determine what our involvement is, if any. Also, how does [redacted] responsibilities [redacted] fit into this project, if any? Are her development/testing efforts combined with your efforts? This too needs to be addressed by management.

With that aside, [redacted] is working the initial four requests [redacted]

[redacted]

You may have to assume some RISK in order to proceed with your testing. In order to help expedite things, can we perform the four requests on one [redacted]

This may determine if the system can perform reliably enough to upgrade the others and proceed with more robust testing. This will be the first of many benchmark tests. Let me know your thoughts..

(S)

Status

* TIU SW upgrade has been performed on each [redacted]

* MOAS SW upgrade has been performed on each [redacted]

[redacted]

TBD

[redacted]

[redacted] TBD.

I am working your RMS # 099670 for the DCS5000 Program Office, and need some additional information to properly respond to the Program Office regarding your request. Questions include:

o My records indicate that you still have [Redacted] units assigned to your office. Is this correct?

Yes.

o Is it possible to use one of your existing [Redacted] units to prepare the CDs you need?

Yes. We made the request because of the potential to have more [Redacted] than normal. The timing for this is critical as well. We will not have the luxury of time to get [Redacted]

o What is the volume of [Redacted] Red Wolf?

[Redacted]

o What would be the impact if this request for a [Redacted] were NOT satisfied?

This cannot be answered accurately until the requests to convert more media comes in from the courts.

Thank you

Hello [redacted]

I think that you pulled the short description, the ticket reads: 100533

The LSTC requests additional Red Wolf (RW) workstations for new personnel.

Justification

The LSTC is rapidly increasing the number of linguists and monitors to support the mission. [redacted] informed me that six new hirers are expected in the next 30 days, and that addition RW workstations are needed to furnish new work areas. In addition to the new linguists, there are two additional Unit Chiefs assigned to the LSTC that will require RW stations as well. This office request a total of 10 additional workstations to meet new personnel demands.

We do not require footswitches or UPS, we could use new flat panel monitors for these desks. I did not request them because I thought that Language Services was responsible for providing the peripheral devices ([redacted] monitors, etc), and we could get by with the traditional [redacted] we have. Yes, they do have [redacted] workstations. As for the start dates of the people (most have already started as the request is nearly 45 days old), but [redacted] can shed more light on personnel issues

I just went into the ticket and changed what data I could. Thanks for your assistance

Always Forward,

When you get back we need to work out the order [redacted]
Right now the plan is to get 10-25 [redacted] workstations - I guess these will be GOE workstations (with their [redacted] for testing - [redacted] would prefer to test this 1st batch with a known//proven [redacted] install. At least that was the impression I got from the meeting ????

We also need to get a couple loaded with the [redacted]
[redacted] I have spoken with [redacted] who has been in contact with [redacted] (guardian of the Bureau licensing). She tells me that we will have to load the [redacted]
[redacted] I don't think that should be an issue but we may discover some driver issues --- [redacted] Anyway - I would like to have [redacted] load the [redacted]
[redacted] - either the one in the lab or from somewhere in the field. This will most closely duplicate what we will be doing once we get to deployment. So we need to have at least one [redacted] delivered here.

We probably should also give [redacted] one with the [redacted] configured so they can fight that battle now rather than later.

Lots of issues - things to talk about

As most of you know, we (OTD) have been working with the vendor to develop and field a [redacted] version of the Red Wolf // DCS-5000 workstation. We have conducted several user group meetings with Language Services and have implemented many of the recommendations of those meetings.

We are now prepared to field test a [redacted] workstations and are looking for candidates at [redacted] HQ-LSTC. We hope to field 10 -25 workstations for this test phase. These workstations will be in addition to existing workstations and can be either set up in a separate area or co-located with existing RW workstations depending on the space available and preferences of the supervisors.

Please let me know your thoughts, concerns, suggestions. We want to make this a positive experience which results in a better system.

Your help and cooperation is appreciated.

As most of you know, we (OTD) have been working with the vendor to develop and field a [redacted] version of the Red Wolf // DCS-5000 workstation. We have conducted several user group meetings with Language Services and have implemented many of the recommendations of those meetings.

We are now prepared to field test a [redacted] workstations and are looking for candidates at [redacted] HQ-LSTC. We hope to field [redacted] workstations for this test phase. These workstations will be in addition to existing workstations and can be either set up in a separate area or co-located with existing RW workstations depending on the space available and preferences of the supervisors.

Please let me know your thoughts, concerns, suggestions. We want to make this a positive experience which results in a better system.

Your help and cooperation is appreciated.

The attached spreadsheet shows the balances left on open equipment POs. The items that have been tasked have the task order numbers listed. All others are projected/planned. The items (other than ancillary equipment) listed for PO #3 have been given to [redacted] as definite items to purchase, if there is a change the time to do it is now - before he cuts the PO.

Do we have any RTN equipt money available for twenty-five [redacted] WS today? I know we all discussed this for FY06, but [redacted] can't seem to find it allocated anywhere. The monies would have to be non-cap equipt. Could you please check on this and let all parties aware of your findings?

thnx,

[redacted]

When you get back we need to work out the order [redacted]
Right now the plan is to get [redacted] workstations - I guess these will be GOE workstations
(with their [redacted] for testing - [redacted] would prefer to test this 1st batch with a known//proven
[redacted] install. At least that was the impression I got from the meeting ????

We also need to get a couple loaded with the [redacted]
[redacted] I have spoken with [redacted] who has been in contact with [redacted] (guardian of the Bureau licensing). She tells me that we will have to load the [redacted]
[redacted] I don't think that should be an issue but we may discover some driver issues --- [redacted] Anyway - I would like to have [redacted]
load the [redacted] on two systems [redacted] out of GOE stock and a [redacted]
[redacted] system - either the one in the lab or from somewhere in the field. This will most closely duplicate what we will be doing once we get to deployment. So we need to have at least one [redacted] system delivered here.

We probably should also give [redacted] one with the [redacted] configured so they can fight that battle now rather than later.

Lots of issues - things to talk about

~~SECRET//NOFORN~~
RECORD [redacted]

[redacted]
I have just been made aware of this. As much as I would like to use FY2007 monies on this, I have a feeling FY2006 monies will be involved (even though our budget is set). Regardless, we will need to get proactive with this situation by planning to procure a [redacted] sooner (2006) than later (2007). There seems to be a [redacted]

[redacted] Please do a [redacted] once this effort is a go. As [redacted] mentioned below, a purchase like this will have an impact on program monies which are already allocated for FY2006. Please send this response to whomever you deem necessary since TICTU has only now been invited to this party. TICTU will determine the size of the system to be placed at [redacted] so keep the information coming. Also, remind those you talk to that RW is classified at the secret level only.
Thanks.

All,

I want to clarify what [redacted] provided earlier. [redacted] was tasked to "fully utilize the capabilities of the Red Wolf system." This was told to AGC [redacted] through the AD of CTD. [redacted] with that in mind, we want to initiate the Red Wolf [redacted] and have asked [redacted] personnel to [redacted]

[redacted]

Obviously, software upgrades to Red Wolf may be needed.

Now I want to address the future needs of [redacted] Myself and my AGC believe that the dual system currently in use [redacted] Red Wolf) is outdated and headed for failure. As you may already know, [redacted]

[redacted]

[redacted] With that in mind, I propose that the dual system be phased out in favor of a more functional and fully capable Red Wolf system [redacted] As near as we can tell, [redacted] is not going away [redacted]

[redacted] Although I realize an up to date Red Wolf system is expensive, we will eventually have to do something [redacted] More importantly, a new Red Wolf system will have better audio, better service, and the ability to [redacted]

If there are any questions realted to this, please call myself or AGC [redacted]
