

June 21, 2013

The Honorable Roderick D. Wright
Chair
Senate Government Organization Committee

Dear Senator Wright,

We, the undersigned companies and organizations, are writing to express our support for the **Taxpayer Access to Publicly Funded Research Act (AB 609)**. This bill will give Californians and the wider public, including researchers, patients, students, educators, journalists, inventors, and small businesses, better access to peer-reviewed scientific articles reporting on research funded by the State of California.

Improving access to this information will benefit Californians and California businesses. **AB 609** will advance the pace of discovery and speed the translation of knowledge into innovative new services and products. That, in turn, will fuel job creation in broad sectors of the economy, from agriculture to energy to medical technology.

AB 609 is a simple, cost-effective measure based on a proven model. Contrary to the claims of its opponents, this legislation would not result in millions of dollars in additional costs to California universities. It implements a model already proven by the National Institutes of Health (NIH), which, in 2008, instituted a broad policy requiring public access to taxpayer-funded research after 12 months of publication. To date, over 2.4 million articles have been deposited in the NIH repository, PubMed Central. That policy has been widely celebrated by the public—with over 700,000 unique visitors to their online repository per day—and has not resulted in significant costs to universities or publishers.

AB 609 balances the interests of all stakeholders. By improving access to research outputs, it will facilitate innovation, improve education, accelerate scientific discovery, and fuel California's economy.

Access to research is good public policy and important legislation for California. We urge all members of the California State Senate to support the **Taxpayer Access to Publicly Funded Research Act (AB 609)**.

Sincerely,

CREDO Action
