

## DEPARTMENT OF THE AIR FORCE

Headquarters, 88th Air Base Wing (AFMC)  
Wright-Patterson Air Force Base Ohio

19 May 2005

**MEMORANDUM FOR ASC/RAJA**

**ATTENTION:**

(b) (6)

**FROM:** 88 CG/SCXI

**SUBJECT:** Approved Equipment Frequency Allocation Papers for the AeroVironment Data and Video Links, ASC 2004-23 and ASC 2004-24.

1. The US Military Communications Electronics Board (MCEB) has issued guidance for use of the AeroVironment Data and Video Links. Please retain the attached MCEB guidance letters and the equipment frequency allocation papers for your files and future reference. This is your operational equipment certification documentation for these systems.
2. For the AeroVironment Data Link, please note frequency assignment requests must be submitted and specific frequencies identified prior to selection of factory fixed frequencies.
3. For the AeroVironment Video Link, please note:
  - a. This document is not your license/authorization to transmit. Frequency assignment requests must be submitted and coordinated with the cognizant Area Frequency Coordinator (AFC) prior to activation.
  - b. The 1755-1850 MHz band is a heavily used band and use of this system within this band will require extensive coordination and/or EMC analysis to prevent any potential mutual interference to or from other systems (for each location).
  - c. Be aware that this system does not comply with frequency tolerance as specified in Table 5.2.1 of the NTIA manual and therefore, if interference occurs, mitigating interference normally rests with the station in non-conformance.
4. AFI 33-118 requires customers to acknowledge receipt of MCEB guidance within 60 days. Please sign and return attachment 1 (endorsement only) by COB 06 Jun 2005.

3. If you have any questions about the attached documentation please contact (b) (6) at extension (b) (6)

(b) (6)

**Attachments:**

1. Endorsement Letter
2. J/F 12/8057/5, MCEB Guidance dated Apr 20 2005
3. J/F 12/8057/4, Equipment Frequency Allocation dated 08-18-2004
4. J/F 12/8252/1, MCEB Guidance dated May 04 2005
5. J/F 12/8252, Equipment Frequency Allocation dated 09-13-2004

1<sup>st</sup> Ind. to 88 CG/SCXI Letter, 19 May 2005, Approved Equipment Frequency Allocation Papers for the AeroVironment Data and Video Links, ASC 2004-23 and ASC 2004-24.

ASC/RAJA

24 May 05  
Date

TO: 88 CG/SCXI

In accordance with AFI 33-118 para 11.5.4, I acknowledge receipt and understanding of MCEB guidance contained in MCEB Memos J/F 12/8057/5 and J/F 12/8252/1

(b) (6)

<b>MILITARY COMMUNICATIONS ELECTRONICS BOARD (MCEB)</b> <b>EQUIPMENT FREQUENCY ALLOCATION GUIDANCE</b>				
<b>Military Department</b>  Air Force Navy Army	<b>Equipment</b>  AeroVironment Video Link			<b>Stage</b>  4 - Operational
<b>Section 1: ENCLOSURES</b>				
<b>Enclosure Number</b>  1	<b>Description</b>  J/F 12/8252			<b>Dated</b>  13 September 2004
<b>Section 2: OPERATING CHARACTERISTICS FOR WHICH SUPPORT IS CERTIFIED</b>				
<b>Frequency (MHz)</b>  1755-1850	<b>Emission</b>  14M8F9W	<b>Power (Mean)</b>  1.5 W	<b>Type of Service</b>  Aeronautical Mobile	<b>Operating Location</b>  US&P
<b>Section 3: MCEB GUIDANCE</b>				
<p>1. The enclosed application is approved for operational systems at the above locations subject to the guidance provided in the following paragraphs.</p> <p>2. For the intended operation in the Aeronautical Mobile service, the subject equipment is in accordance with the ITU and US Tables of Frequency Allocation.</p> <p>3. Based on the information provided,</p> <p style="margin-left: 40px;">a. The transmitter does not comply with NTIA Manual, Sections 5.2.1, requirements for frequency tolerance.</p> <p style="margin-left: 40px;">b. The transmitter complies with NTIA Manual, Sections 5.2.2, requirements for unwanted emission bandwidth, spurious emission and harmonic levels.</p> <p style="margin-left: 40px;">c. The transmitter does comply with MIL-STD-461E requirements for spurious emissions and harmonic levels.</p> <p>4. In any instance of harmful interference caused by nonconformance with NTIA Manual, Section 5.2.1, the responsibility for eliminating the harmful interference shall rest with the agency operating in nonconformance.</p>

MILITARY COMMUNICATIONS ELECTRONICS BOARD (MCEB)		
EQUIPMENT FREQUENCY GUIDANCE		
MCEB GUIDANCE	Equipment	
CONTINUATION PAGE	AeroVironment Video Link	
Section 3: MCEB GUIDANCE (continued)		
<p>5. Frequency assignment requests must be submitted using Standard Frequency Action Format (SFAF) and coordinated with the cognizant Area Frequency Coordinator (AFC) in accordance with ACP 190 US SUPP-1(C), Guide to Frequency Planning, prior to activation.</p> <p>6. The 1755-1850 MHz band is heavily used by other DoD and Federal Government systems. It may be possible to accommodate the use of this system in the 1755-1850 MHz band on a case-by-case, location-by-location basis; however, it will require extensive coordination and/or EMC analysis to prevent any potential mutual interference to or from the many DoD systems (e.g. Space Ground Link Subsystem (SGLS), Mobile subscriber Equipment (MSE), Tactical Control Link/Precision Guided Munitions, Air Combat Training Systems, Digital Wideband Transmission System, Point-to-Point Microwave Systems, etc.).</p> <p>7. Coordination with NTIA/SPS was completed and the following US certification statements were received:</p> <ul style="list-style-type: none"><li>a. The Spectrum Planning Subcommittee (SPS) has reviewed this system under the provisions of Chapter 10 of the NTIA Manual, the SPS recommends that:</li><li>b. NTIA certify Stage 4 spectrum support for the AeroVironment Video Link as specified in Section 2.</li><li>c. Air Force be aware that mitigating interference caused by the nonconforming frequency tolerance of 30 ppm (vs. 20 ppm as specified in Table 5.2.1 of the NTIA Manual) shall normally rest with the agency operating in nonconformance, in accordance with Section 5.1.2 of the NTIA Manual.</li><li>d. Air Force be aware that it may be difficult or impossible to successfully coordinate assignments at some locations, due to the congested electromagnetic environment in the operating band of the subject system and the relatively wide bandwidth required for transmissions from an airborne station.</li></ul> <p>8. Authorization for use outside of the US&amp;P is dependent on receiving a statement of supportability from the appropriate COCOM. Host nation frequency support coordination has been initiated.</p>

CONTINUATION PAGE	AeroVironment Data Link	
Section 3: MCEB GUIDANCE (continued)		
<p>5. Use of this system must be in accordance with the channeling plans for the 225-399.9 MHz band. Assignments that do not fit the wideband channels in the 380-399.9 MHz band may be very difficult to obtain. Per SECDEF Memo, 1 Aug 2001, Subj: Policy for Land Mobile Radio, the band 380-399.9 MHz will be heavily used by Land Mobile Radio (LMR) systems in the future. The Program Office might consider moving the uplink of this system to operate in the 225-380 MHz band at the earliest opportunity to ensure future frequency assignments availability. The 225-380 MHz band is heavily used by various space, ground, airborne and sea communication systems; however, there are more channels available in this band than in the 380-399.9 MHz bands.</p> <p>6. Coordination with NTIA/SPS was completed and the following US certification statements were received:</p> <ul style="list-style-type: none"><li>a. The Spectrum Planning Subcommittee (SPS) has reviewed this system under the provisions of Chapter 10 of the NTIA Manual, the SPS recommends that:</li><li>b. NTIA certify Stage 4 spectrum support for the AeroVironment Data Link as specified in Section 2.</li><li>c. Air Force work with Military Assignment Group (MAG) to process all frequency assignment actions in accordance with Section 1.4.1 of the NTIA Manual.</li><li>d. Air Force ensure that personnel are protected from radiation levels that exceed generally accepted exposure criteria.</li></ul> <p>7. Authorization for use outside of the US&amp;P is dependent on receiving a statement of supportability from the appropriate COCOM. Host nation frequency support coordination has been initiated.</p>

<b>24. REMARKS</b> (U) <div style="margin-top: 10px;">           Item 1: For DoD requirement, AeroVironment modified Part No. 55025             Item 5/7: The module has 4 factory preset channels; per module, all 4 channels must be within a 10 MHz band. This 10 MHz window can be set in the 350-399.9 MHz frequency range.             Item 10: 2 pole low pass Butterworth filter with the 3 dB point at approximately 425 MHz. The insertion loss is 2 dB.         </div>

MHz frequency range.

Use of this system must be in accordance with the channeling plans for the 225-399.9 MHz band. Assignments that do not fit the wideband channels in the 380-399.9 MHz band may be difficult to obtain.
