

**MILITARY COMMUNICATIONS ELECTRONICS BOARD (MCEB)  
EQUIPMENT FREQUENCY ALLOCATION GUIDANCE**

Military Department Navy, Air Force	Equipment <b>PREDATOR C-Band MAE UAV</b> Medium Altitude Endurance Unmanned Aerial Vehicle	Stage 4- Operational
--	--	-------------------------

**Section 1 ENCLOSURE**

Enclosure Number 1	Description J/F 12/07253	Dated 04/09/2003
-----------------------	-----------------------------	---------------------

**Section 2 OPERATING CHARACTERISTICS FOR WHICH SUPPORT IS CERTIFIED**

Frequency (MHz)	Emissions	Power (Watts) Mean	Type of Services Mobile (Aeronautical Mobile)	Operating Locations
5250-5850	88K3F1D 560KF1D	10.0		Phoenix, AZ ( <i>only ground Testing</i> ); Ft. Huachuca, AZ; Yuma Proving Grounds, AZ; El Mirage Flight Test Facility, Adelanto, CA; Edwards AFB, CA ( <i>including China Lake, CA</i> ); Aeronautical Systems, San Diego, CA; Marina, CA; Camp Roberts, CA; San Clemente Island, CA; San Nicholas Island, CA; NTC Fort Irwin, CA; NAS Key West, FL; MacDill AFB, FL; Kauai, HI; Fort Polk, LA; Roswell, NM; Tinker AFB, OK; Fort Sill, OK; Nellis AFB, NV; Indian Springs, NV; Nevada Test Site, NV; Fallon, NV; El Paso, TX; Langley AFB, VA
	4M72F1D 17M0F9F		Mobile	

**Section 3 MCEB GUIDANCE**

- The enclosed application is approved for operational use at the above locations subject to the guidance provided in the following paragraphs.
- For the intended use in the Aeronautical Mobile and Aeronautical Fixed service, the subject equipment is not in accordance with the US and ITU Table of Frequency Allocations over its tuning range. Operations will be on an unprotected, non-interference basis to the established services at the above locations.
- The provisions of NTIA manual Sections 5.2 and 5.3.3 are considered applicable to the operation of the subject equipment. Based on the information provided, the subject equipment does comply with NTIA Manual Sections 5.2 requirement for frequency tolerances and unwanted emissions and, Section 5.3.3 requirement for spurious, and harmonics emission levels, unwanted emissions bandwidth and receiver's IF selectivity and spurious rejection. In any instance of harmful interference caused by nonconformance with these provisions, the responsibility for eliminating the harmful interference normally shall rest with the agency operating in nonconformance.
- The subject equipment does not comply with the requirements of MIL-STD-461E for harmonic levels. Compliance is not mandatory but the standard may be used as a design objective.
- Frequency assignments request must be submitted using Standard Frequency Action Format (SFAF) and coordinated with the cognizant area frequency coordinator in accordance with ACP 190 US SUPP-1 (C), Guide to Frequency Planning, prior to activation.

## Section 2 MCEB GUIDANCE

6. Coordination with the NTIA Spectrum Planning Subcommittee was requested.
7. Operational use within the appropriate theater commands outside the United States has not been approved. Approval for operational use in the intended deployment area requires appropriate CINC's statement(s) that the subject system has been deemed frequency supportable.

<b>2. SYSTEM NOMENCLATURE (U)</b> MAE UAV C-Band Line-of-Sight Command/Video Links		
<b>3. STAGE OF ALLOCATION (U)</b> <div style="display: flex; justify-content: space-around; align-items: flex-start;"> <div style="text-align: center;"> <input type="checkbox"/> <b>a. STAGE 1 CONCEPTUAL</b> </div> <div style="text-align: center;"> <input type="checkbox"/> <b>b. STAGE 2 EXPERIMENTAL</b> </div> <div style="text-align: center;"> <input type="checkbox"/> <b>c. STAGE 3 DEVELOPMENTAL</b> </div> <div style="text-align: center;"> <input checked="" type="checkbox"/> <b>d. STAGE 4 OPERATIONAL</b> </div> </div>		
<b>4. FREQUENCY REQUIREMENTS</b> <div style="display: flex; justify-content: space-between;"> <div style="width: 25%;"> <b>a. FREQUENCY(IES) (U)</b> 5250 MHz - 5850 MHz         </div> <div style="width: 25%;">5250 MHz - 5850 MHz</div> <div style="width: 25%;">5250 MHz - 5850 MHz</div> </div> <div style="display: flex; justify-content: space-between; margin-top: 5px;"> <div style="width: 25%;"> <b>b. EMISSION DESIGNATORS (U)</b> 560KF1D         </div> <div style="width: 25%;">17M0F9F</div> <div style="width: 25%;">4M72F1D</div> </div>		
<b>5. PURPOSE OF SYSTEM, OPERATIONAL AND SYSTEM CONCEPTS (U)</b> Provide command and control of unmanned aerial vehicle, transmit payload imagery and system telemetry data. <div style="text-align: right; margin-top: 5px;"> <b>(WARTIME USE)</b> <input checked="" type="checkbox"/> <b>a. YES</b> <input type="checkbox"/> <b>b. NO</b> </div>		
<b>6. INFORMATION TRANSFER REQUIREMENTS (U)</b> 19.2/200 Kbps FSK uplink; FM analog video with 19.2 kbps on subcarriers or 3.2 Mbps FSK data downlink		
<b>7. ESTIMATED INITIAL COST OF THE SYSTEM (U)</b> \$75k per aerial vehicle system		
<b>8. TARGET DATE FOR</b>		
<b>a. APPLICATION APPROVAL (U)</b> 03/01/1998	<b>b. SYSTEM ACTIVATION (U)</b> 04/01/1998	<b>c. SYSTEM TERMINATION (U)</b> 12/31/2015
<b>9. SYSTEM RELATIONSHIP AND ESSENTIALITY (U)</b> This system controls the MAE UAV "PREDATOR" within Line-of-Sight, and is critical to the mission.		
<b>10. REPLACEMENT INFORMATION (U)</b> None		
<b>11. RELATED ANALYSIS AND/OR TEST DATA (U)</b> None		
<b>12. NUMBER OF MOBILE UNITS (U)</b> 64		
<b>13. GEOGRAPHICAL AREA FOR</b>		
<b>a. STAGE 2 (U)</b> NA		
<b>b. STAGE 3 (U)</b> NA		
<b>c. STAGE 4 (U)</b> US&P; Korea; Contingency operations in Central/South America		
<b>14. LINE DIAGRAM (U)</b> See Page(s) 12		<b>15. SPACE SYSTEMS (U)</b> See Page(s) NA
<b>16. TYPE OF SERVICE(S) FOR STAGE 4 (U)</b> Aeronautical Mobile Mobile		<b>17. STATION CLASS(ES) FOR STAGE 4 (U)</b> FAD MOEA
<b>18. REMARKS (U)</b> <p>Item 4b: The transmitters and receivers are configurable via software setup for either 88K3F1D, 560KF1D, 4M72F1D, or 17M0F9F.</p> <p>Item 13c: Operations in conflict areas.</p>		
<b>DOWNGRADING INSTRUCTIONS</b>		<b>J/F 12/07253</b>  <b>CLASSIFICATION UNCLASSIFIED</b>
