**LEGAL AUTHORITIES SUPPORTING THE ACTIVITIES OF THE  
 NATIONAL SECURITY AGENCY DESCRIBED BY THE PRESIDENT**

As the President has explained, since shortly after the attacks of September 11, 2001, he has authorized the National Security Agency (“NSA”) to intercept international communications into and out of the United States of persons linked to al Qaeda or related terrorist organizations. The purpose of these intercepts is to establish an early warning system to detect and prevent another catastrophic terrorist attack on the United States. This paper addresses, in an unclassified form, the legal basis for the NSA activities described by the President (“NSA activities”).

**SUMMARY**

On September 11, 2001, the al Qaeda terrorist network launched the deadliest foreign attack on American soil in history. Al Qaeda’s leadership repeatedly has pledged to attack the United States again at a time of its choosing, and these terrorist organizations continue to pose a grave threat to the United States. In response to the September 11th attacks and the continuing threat, the President, with broad congressional approval, has acted to protect the Nation from another terrorist attack. In the immediate aftermath of September 11th, the President promised that “[w]e will direct every resource at our command—every means of diplomacy, every tool of intelligence, every tool of law enforcement, every financial influence, and every weapon of war—to the destruction of and to the defeat of the global terrorist network.” President Bush Address to a Joint Session of Congress (Sept. 20, 2001). The NSA activities are an indispensable aspect of this defense of the Nation. By targeting the international communications into and out of the United States of persons reasonably believed to be linked to al Qaeda, these activities provide the United States with an early warning system to help avert the next attack. For the following reasons, the NSA activities are lawful and consistent with civil liberties.

The NSA activities are supported by the President’s well-recognized inherent constitutional authority as Commander in Chief and sole organ for the Nation in foreign affairs to conduct warrantless surveillance of enemy forces for intelligence purposes to detect and disrupt armed attacks on the United States. The President has the chief responsibility under the Constitution to protect America from attack, and the Constitution gives the President the authority necessary to fulfill that solemn responsibility. The President has made clear that he will exercise all authority available to him, consistent with the Constitution, to protect the people of the United States.

In the specific context of the current armed conflict with al Qaeda and related terrorist organizations, Congress by statute has confirmed and supplemented the President's recognized authority under Article II of the Constitution to conduct such warrantless surveillance to prevent further catastrophic attacks on the homeland. In its first legislative response to the terrorist attacks of September 11th, Congress authorized the President to "use all necessary and appropriate force against those nations, organizations, or persons he determines planned, authorized, committed, or aided the terrorist attacks" of September 11th in order to prevent "any future acts of international terrorism against the United States." Authorization for Use of Military Force, Pub. L. No. 107-40, § 2(a), 115 Stat. 224, 224 (Sept. 18, 2001) (reported as a note to 50 U.S.C.A. § 1541) ("AUMF"). History conclusively demonstrates that warrantless communications intelligence targeted at the enemy in time of armed conflict is a traditional and fundamental incident of the use of military force authorized by the AUMF. The Supreme Court's interpretation of the AUMF in *Hamdi v. Rumsfeld*, 542 U.S. 507 (2004), confirms that Congress in the AUMF gave its express approval to the military conflict against al Qaeda and its allies and thereby to the President's use of all traditional and accepted incidents of force in this current military conflict—including warrantless electronic surveillance to intercept enemy communications both at home and abroad. This understanding of the AUMF demonstrates Congress's support for the President's authority to protect the Nation and, at the same time, adheres to Justice O'Connor's admonition that "a state of war is not a blank check for the President," *Hamdi*, 542 U.S. at 536 (plurality opinion), particularly in view of the narrow scope of the NSA activities.

The AUMF places the President at the zenith of his powers in authorizing the NSA activities. Under the tripartite framework set forth by Justice Jackson in *Youngstown Sheet & Tube Co. v. Sawyer*, 343 U.S. 579, 635-38 (1952) (Jackson, J., concurring), Presidential authority is analyzed to determine whether the President is acting in accordance with congressional authorization (category I), whether he acts in the absence of a grant or denial of authority by Congress (category II), or whether he uses his own authority under the Constitution to take actions incompatible with congressional measures (category III). Because of the broad authorization provided in the AUMF, the President's action here falls within category I of Justice Jackson's framework. Accordingly, the President's power in authorizing the NSA activities is at its height because he acted "pursuant to an express or implied authorization of Congress," and his power "includes all that he possesses in his own right plus all that Congress can delegate." *Id.* at 635.

The NSA activities are consistent with the preexisting statutory framework generally applicable to the interception of communications in the United States—the Foreign Intelligence Surveillance Act ("FISA"), as amended, 50 U.S.C. §§ 1801-1862 (2000 & Supp. II 2002), and relevant related provisions in chapter 119 of title 18.<sup>1</sup> Although FISA generally requires judicial approval of electronic surveillance, FISA also contemplates that Congress may authorize such surveillance by a statute other than FISA. See 50 U.S.C. § 1809(a) (prohibiting any person from intentionally "engag[ing] . . . in electronic surveillance under color of law except as authorized

<sup>1</sup> Chapter 119 of title 18, which was enacted by Title III of the Omnibus Crime Control and Safe Streets Act of 1968, as amended, 18 U.S.C. §§ 2510-2521 (2000 & West Supp. 2005), is often referred to as "Title III."

by statute”). The AUMF, as construed by the Supreme Court in *Hamdi* and as confirmed by the history and tradition of armed conflict, is just such a statute. Accordingly, electronic surveillance conducted by the President pursuant to the AUMF, including the NSA activities, is fully consistent with FISA and falls within category I of Justice Jackson’s framework.

Even if there were ambiguity about whether FISA, read together with the AUMF, permits the President to authorize the NSA activities, the canon of constitutional avoidance requires reading these statutes in harmony to overcome any restrictions in FISA and Title III, at least as they might otherwise apply to the congressionally authorized armed conflict with al Qaeda. Indeed, were FISA and Title III interpreted to impede the President’s ability to use the traditional tool of electronic surveillance to detect and prevent future attacks by a declared enemy that has already struck at the homeland and is engaged in ongoing operations against the United States, the constitutionality of FISA, as applied to that situation, would be called into very serious doubt. In fact, if this difficult constitutional question had to be addressed, FISA would be unconstitutional as applied to this narrow context. Importantly, the FISA Court of Review itself recognized just three years ago that the President retains constitutional authority to conduct foreign surveillance apart from the FISA framework, and the President is certainly entitled, at a minimum, to rely on that judicial interpretation of the Constitution and FISA.

Finally, the NSA activities fully comply with the requirements of the Fourth Amendment. The interception of communications described by the President falls within a well-established exception to the warrant requirement and satisfies the Fourth Amendment’s fundamental requirement of reasonableness. The NSA activities are thus constitutionally permissible and fully protective of civil liberties.

## BACKGROUND

### A. THE ATTACKS OF SEPTEMBER 11, 2001

On September 11, 2001, the al Qaeda terrorist network launched a set of coordinated attacks along the East Coast of the United States. Four commercial jetliners, each carefully selected to be fully loaded with fuel for a transcontinental flight, were hijacked by al Qaeda operatives. Two of the jetliners were targeted at the Nation’s financial center in New York and were deliberately flown into the Twin Towers of the World Trade Center. The third was targeted at the headquarters of the Nation’s Armed Forces, the Pentagon. The fourth was apparently headed toward Washington, D.C., when passengers struggled with the hijackers and the plane crashed in Shanksville, Pennsylvania. The intended target of this fourth jetliner was evidently the White House or the Capitol, strongly suggesting that its intended mission was to strike a decapitation blow on the Government of the United States—to kill the President, the Vice President, or Members of Congress. The attacks of September 11th resulted in approximately 3,000 deaths—the highest single-day death toll from hostile foreign attacks in the Nation’s history. These attacks shut down air travel in the United States, disrupted the Nation’s financial markets and government operations, and caused billions of dollars in damage to the economy.

On September 14, 2001, the President declared a national emergency “by reason of the terrorist attacks at the World Trade Center, New York, New York, and the Pentagon, and the continuing and immediate threat of further attacks on the United States.” Proclamation No. 7463, 66 Fed. Reg. 48,199 (Sept. 14, 2001). The same day, Congress passed a joint resolution authorizing the President “to use all necessary and appropriate force against those nations, organizations, or persons he determines planned, authorized, committed, or aided the terrorist attacks” of September 11th, which the President signed on September 18th. AUMF § 2(a). Congress also expressly acknowledged that the attacks rendered it “necessary and appropriate” for the United States to exercise its right “to protect United States citizens both at home and abroad,” and in particular recognized that “the President has authority under the Constitution to take action to deter and prevent acts of international terrorism against the United States.” *Id.* pmb1. Congress emphasized that the attacks “continue to pose an unusual and extraordinary threat to the national security and foreign policy of the United States.” *Id.* The United States also launched a large-scale military response, both at home and abroad. In the United States, combat air patrols were immediately established over major metropolitan areas and were maintained 24 hours a day until April 2002. The United States also immediately began plans for a military response directed at al Qaeda’s base of operations in Afghanistan. Acting under his constitutional authority as Commander in Chief, and with the support of Congress, the President dispatched forces to Afghanistan and, with the assistance of the Northern Alliance, toppled the Taliban regime.

As the President made explicit in his Military Order of November 13, 2001, authorizing the use of military commissions to try terrorists, the attacks of September 11th “created a state of armed conflict.” Military Order § 1(a), 66 Fed. Reg. 57,833 (Nov. 13, 2001). Indeed, shortly after the attacks, NATO—for the first time in its 46-year history—invoked article 5 of the North Atlantic Treaty, which provides that an “armed attack against one or more of [the parties] shall be considered an attack against them all.” North Atlantic Treaty, Apr. 4, 1949, art. 5, 63 Stat. 2241, 2244, 34 U.N.T.S. 243, 246; *see also* Statement by NATO Secretary General Lord Robertson (Oct. 2, 2001), *available at* <http://www.nato.int/docu/speech/2001/s011002a.htm> (“[I]t has now been determined that the attack against the United States on 11 September was directed from abroad and shall therefore be regarded as an action covered by Article 5 of the Washington Treaty . . .”). The President also determined in his Military Order that al Qaeda and related terrorists organizations “possess both the capability and the intention to undertake further terrorist attacks against the United States that, if not detected and prevented, will cause mass deaths, mass injuries, and massive destruction of property, and may place at risk the continuity of the operations of the United States Government,” and concluded that “an extraordinary emergency exists for national defense purposes.” Military Order, § 1(c), (g), 66 Fed. Reg. at 57,833-34.

## B. THE NSA ACTIVITIES

Against this unfolding background of events in the fall of 2001, there was substantial concern that al Qaeda and its allies were preparing to carry out another attack within the United States. Al Qaeda had demonstrated its ability to introduce agents into the United States undetected and to perpetrate devastating attacks, and it was suspected that additional agents were

likely already in position within the Nation's borders. As the President has explained, unlike a conventional enemy, al Qaeda has infiltrated "our cities and communities and communicated from here in America to plot and plan with bin Laden's lieutenants in Afghanistan, Pakistan and elsewhere." Press Conference of President Bush (Dec. 19, 2005), *available at* <http://www.whitehouse.gov/news/releases/2005/12/20051219-2.html> ("President's Press Conference"). To this day, finding al Qaeda sleeper agents in the United States remains one of the paramount concerns in the War on Terror. As the President has explained, "[t]he terrorists want to strike America again, and they hope to inflict even more damage than they did on September the 11th." *Id.*

The President has acknowledged that, to counter this threat, he has authorized the NSA to intercept international communications into and out of the United States of persons linked to al Qaeda or related terrorist organizations. The same day, the Attorney General elaborated and explained that in order to intercept a communication, there must be "a reasonable basis to conclude that one party to the communication is a member of al Qaeda, affiliated with al Qaeda, or a member of an organization affiliated with al Qaeda." Press Briefing by Attorney General Alberto Gonzales and General Michael Hayden, Principal Deputy Director for National Intelligence, *available at* <http://www.whitehouse.gov/news/releases/2005/12/20051219-1.html> (Dec. 19, 2005) (statement of Attorney General Gonzales). The purpose of these intercepts is to establish an early warning system to detect and prevent another catastrophic terrorist attack on the United States. The President has stated that the NSA activities "ha[ve] been effective in disrupting the enemy, while safeguarding our civil liberties." President's Press Conference.

The President has explained that the NSA activities are "critical" to the national security of the United States. *Id.* Confronting al Qaeda "is not simply a matter of [domestic] law enforcement"—we must defend the country against an enemy that declared war against the United States. *Id.* To "effectively detect enemies hiding in our midst and prevent them from striking us again . . . we must be able to act fast and to detect conversations [made by individuals linked to al Qaeda] so we can prevent new attacks." *Id.* The President pointed out that "a two-minute phone conversation between somebody linked to al Qaeda here and an operative overseas could lead directly to the loss of thousands of lives." *Id.* The NSA activities are intended to help "connect the dots" between potential terrorists. *Id.* In addition, the Nation is facing "a different era, a different war . . . people are changing phone numbers . . . and they're moving quick[ly]." *Id.* As the President explained, the NSA activities "enable[] us to move faster and quicker. And that's important. We've got to be fast on our feet, quick to detect and prevent." *Id.* "This is an enemy that is quick and it's lethal. And sometimes we have to move very, very quickly." *Id.* FISA, by contrast, is better suited "for long-term monitoring." *Id.*

As the President has explained, the NSA activities are "carefully reviewed approximately every 45 days to ensure that [they are] being used properly." *Id.* These activities are reviewed for legality by the Department of Justice and are monitored by the General Counsel and Inspector General of the NSA to ensure that civil liberties are being protected. *Id.* Leaders in Congress from both parties have been briefed more than a dozen times on the NSA activities.

### C. THE CONTINUING THREAT POSED BY AL QAEDA

Before the September 11th attacks, al Qaeda had promised to attack the United States. In 1998, Osama bin Laden declared a “religious” war against the United States and urged that it was the moral obligation of all Muslims to kill U.S. civilians and military personnel. *See* Statement of Osama bin Laden, Ayman al-Zawahiri, et al., *Fatwah Urging Jihad Against Americans*, published in *Al-Quds al-'Arabi* (Feb. 23, 1998) (“To kill the Americans and their allies—civilians and military—is an individual duty for every Muslim who can do it in any country in which it is possible to do it, in order to liberate the al-Aqsa Mosque and the holy mosque from their grip, and in order for their armies to move out of all the lands of Islam, defeated and unable to threaten any Muslim.”). Al Qaeda carried out those threats with a vengeance; they attacked the U.S.S. Cole in Yemen, the United States Embassy in Nairobi, and finally the United States itself in the September 11th attacks.

It is clear that al Qaeda is not content with the damage it wrought on September 11th. As recently as December 7, 2005, Ayman al-Zawahiri professed that al Qaeda “is spreading, growing, and becoming stronger,” and that al Qaeda is “waging a great historic battle in Iraq, Afghanistan, Palestine, and even in the Crusaders’ own homes.” Ayman al-Zawahiri, videotape released on Al-Jazeera television network (Dec. 7, 2005). Indeed, since September 11th, al Qaeda leaders have repeatedly promised to deliver another, even more devastating attack on America. *See, e.g.*, Osama bin Laden, videotape released on Al-Jazeera television network (Oct. 24, 2004) (warning United States citizens of further attacks and asserting that “your security is in your own hands”); Osama bin Laden, videotape released on Al-Jazeera television network (Oct. 18, 2003) (“We, God willing, will continue to fight you and will continue martyrdom operations inside and outside the United States . . . .”); Ayman Al-Zawahiri, videotape released on the Al-Jazeera television network (Oct. 9, 2002) (“I promise you [addressing the ‘citizens of the United States’] that the Islamic youth are preparing for you what will fill your hearts with horror”). Given that al Qaeda’s leaders have repeatedly made good on their threats and that al Qaeda has demonstrated its ability to insert foreign agents into the United States to execute attacks, it is clear that the threat continues. Indeed, since September 11th, al Qaeda has staged several large-scale attacks around the world, including in Indonesia, Madrid, and London, killing hundreds of innocent people.

## ANALYSIS

### I. THE PRESIDENT HAS INHERENT CONSTITUTIONAL AUTHORITY TO ORDER WARRANTLESS FOREIGN INTELLIGENCE SURVEILLANCE

As Congress expressly recognized in the AUMF, “the President has authority under the Constitution to take action to deter and prevent acts of international terrorism against the United States,” AUMF pmb1., especially in the context of the current conflict. Article II of the Constitution vests in the President all executive power of the United States, including the power to act as Commander in Chief of the Armed Forces, *see* U.S. Const. art. II, § 2, and authority over the conduct of the Nation’s foreign affairs. As the Supreme Court has explained, “[t]he President is the sole organ of the nation in its external relations, and its sole representative with

foreign nations.” *United States v. Curtiss-Wright Export Corp.*, 299 U.S. 304, 319 (1936) (internal quotation marks and citations omitted). In this way, the Constitution grants the President inherent power to protect the Nation from foreign attack, *see, e.g., The Prize Cases*, 67 U.S. (2 Black) 635, 668 (1863), and to protect national security information, *see, e.g., Department of the Navy v. Egan*, 484 U.S. 518, 527 (1988).

To carry out these responsibilities, the President must have authority to gather information necessary for the execution of his office. The Founders, after all, intended the federal Government to be clothed with all authority necessary to protect the Nation. *See, e.g., The Federalist* No. 23, at 147 (Alexander Hamilton) (Jacob E. Cooke ed. 1961) (explaining that the federal Government will be “cloathed with all the powers requisite to the complete execution of its trust”); *id.* No. 41, at 269 (James Madison) (“Security against foreign danger is one of the primitive objects of civil society . . . . The powers requisite for attaining it must be effectually confided to the federal councils.”). Because of the structural advantages of the Executive Branch, the Founders also intended that the President would have the primary responsibility and necessary authority as Commander in Chief and Chief Executive to protect the Nation and to conduct the Nation’s foreign affairs. *See, e.g., The Federalist* No. 70, at 471-72 (Alexander Hamilton); *see also Johnson v. Eisentrager*, 339 U.S. 763, 788 (1950) (“this [constitutional] grant of war power includes all that is necessary and proper for carrying these powers into execution”) (citation omitted). Thus, it has been long recognized that the President has the authority to use secretive means to collect intelligence necessary for the conduct of foreign affairs and military campaigns. *See, e.g., Chicago & S. Air Lines v. Waterman S.S. Corp.*, 333 U.S. 103, 111 (1948) (“The President, both as Commander-in-Chief and as the Nation’s organ for foreign affairs, has available intelligence services whose reports are not and ought not to be published to the world.”); *Curtiss-Wright*, 299 U.S. at 320 (“He has his confidential sources of information. He has his agents in the form of diplomatic, consular and other officials.”); *Totten v. United States*, 92 U.S. 105, 106 (1876) (President “was undoubtedly authorized during the war, as commander-in-chief . . . to employ secret agents to enter the rebel lines and obtain information respecting the strength, resources, and movements of the enemy”).

In reliance on these principles, a consistent understanding has developed that the President has inherent constitutional authority to conduct warrantless searches and surveillance within the United States for foreign intelligence purposes. Wiretaps for such purposes thus have been authorized by Presidents at least since the administration of Franklin Roosevelt in 1940. *See, e.g., United States v. United States District Court*, 444 F.2d 651, 669-71 (6th Cir. 1971) (reproducing as an appendix memoranda from Presidents Roosevelt, Truman, and Johnson). In a Memorandum to Attorney General Jackson, President Roosevelt wrote on May 21, 1940:

You are, therefore, authorized and directed in such cases as you may approve, after investigation of the need in each case, to authorize the necessary investigation agents that they are at liberty to secure information by listening devices directed to the conversation or other communications of persons suspected of subversive activities against the Government of the United States, including suspected spies. You are requested furthermore to limit these investigations so conducted to a minimum and limit them insofar as

possible to aliens.

*Id.* at 670 (appendix A). President Truman approved a memorandum drafted by Attorney General Tom Clark in which the Attorney General advised that “it is as necessary as it was in 1940 to take the investigative measures” authorized by President Roosevelt to conduct electronic surveillance “in cases vitally affecting the domestic security.” *Id.* Indeed, while FISA was being debated during the Carter Administration, Attorney General Griffin Bell testified that “the current bill recognizes no inherent power of the President to conduct electronic surveillance, and I want to interpolate here to say that *this does not take away the power [of] the President under the Constitution.*” Foreign Intelligence Electronic Surveillance Act of 1978: Hearings on H.R. 5764, H.R. 9745, H.R. 7308, and H.R. 5632 Before the Subcomm. on Legislation of the House Comm. on Intelligence, 95th Cong., 2d Sess. 15 (1978) (emphasis added); *see also Katz v. United States*, 389 U.S. 347, 363 (1967) (White, J., concurring) (“Wiretapping to protect the security of the Nation has been authorized by successive Presidents.”); *cf.* Amending the Foreign Intelligence Surveillance Act: Hearings Before the House Permanent Select Comm. on Intelligence, 103d Cong. 2d Sess. 61 (1994) (statement of Deputy Attorney General Jamie S. Gorelick) (“[T]he Department of Justice believes, and the case law supports, that the President has inherent authority to conduct warrantless physical searches for foreign intelligence purposes . . .”).

The courts uniformly have approved this longstanding Executive Branch practice. Indeed, every federal appellate court to rule on the question has concluded that, even in peacetime, the President has inherent constitutional authority, consistent with the Fourth Amendment, to conduct searches for foreign intelligence purposes without securing a judicial warrant. *See In re Sealed Case*, 310 F.3d 717, 742 (Foreign Intel. Surv. Ct. of Rev. 2002) (“[A]ll the other courts to have decided the issue [have] held that the President did have inherent authority to conduct warrantless searches to obtain foreign intelligence information . . . *We take for granted that the President does have that authority and, assuming that is so, FISA could not encroach on the President’s constitutional power.*”) (emphasis added); *accord, e.g., United States v. Truong Dinh Hung*, 629 F.2d 908 (4th Cir. 1980); *United States v. Butenko*, 494 F.2d 593 (3d Cir. 1974) (en banc); *United States v. Brown*, 484 F.2d 418 (5th Cir. 1973). *But cf. Zweibon v. Mitchell*, 516 F.2d 594 (D.C. Cir. 1975) (en banc) (dictum in plurality opinion suggesting that a warrant would be required even in a foreign intelligence investigation).

In *United States v. United States District Court*, 407 U.S. 297 (1972) (the “*Keith*” case), the Supreme Court concluded that the Fourth Amendment’s warrant requirement applies to investigations of wholly *domestic* threats to security—such as domestic political violence and other crimes. But the Court in the *Keith* case made clear that it was not addressing the President’s authority to conduct *foreign* intelligence surveillance without a warrant and that it was expressly reserving that question: “[T]he instant case requires no judgment on the scope of the President’s surveillance power with respect to the activities of foreign powers, within or without this country.” *Id.* at 308; *see also id.* at 321-22 & n.20 (“We have not addressed, and express no opinion as to, the issues which may be involved with respect to activities of foreign powers or their agents.”). That *Keith* does not apply in the context of protecting against a foreign attack has been confirmed by the lower courts. After *Keith*, each of the three courts of appeals

that have squarely considered the question have concluded—expressly taking the Supreme Court’s decision into account—that the President has inherent authority to conduct warrantless surveillance in the foreign intelligence context. *See, e.g., Truong Dinh Hung*, 629 F.2d at 913-14; *Butenko*, 494 F.2d at 603; *Brown*, 484 F.2d 425-26.

From a constitutional standpoint, foreign intelligence surveillance such as the NSA activities differs fundamentally from the domestic security surveillance at issue in *Keith*. As the Fourth Circuit observed, the President has uniquely strong constitutional powers in matters pertaining to foreign affairs and national security. “Perhaps most crucially, the executive branch not only has superior expertise in the area of foreign intelligence, it is also constitutionally designated as the pre-eminent authority in foreign affairs.” *Truong*, 629 F.2d at 914; *see id.* at 913 (noting that “the needs of the executive are so compelling in the area of foreign intelligence, unlike the area of domestic security, that a uniform warrant requirement would . . . unduly frustrate the President in carrying out his foreign affairs responsibilities”); *cf. Haig v. Agee*, 453 U.S. 280, 292 (1981) (“Matters intimately related to foreign policy and national security are rarely proper subjects for judicial intervention.”).<sup>2</sup>

The present circumstances that support recognition of the President’s inherent constitutional authority to conduct the NSA activities are considerably stronger than were the circumstances at issue in the earlier courts of appeals cases that recognized this power. All of the cases described above addressed inherent executive authority under the foreign affairs power to conduct surveillance in a peacetime context. The courts in these cases therefore had no occasion even to consider the fundamental authority of the President, as Commander in Chief, to gather intelligence in the context of an ongoing armed conflict in which the United States already had suffered massive civilian casualties and in which the intelligence gathering efforts at issue were specifically designed to thwart further armed attacks. Indeed, intelligence gathering is particularly important in the current conflict, in which the enemy attacks largely through clandestine activities and which, as Congress recognized, “pose[s] an unusual and extraordinary threat,” AUMF pmbl.

Among the President’s most basic constitutional duties is the duty to protect the Nation from armed attack. The Constitution gives him all necessary authority to fulfill that responsibility. The courts thus have long acknowledged the President’s inherent authority to take action to protect Americans abroad, *see, e.g., Durand v. Hollins*, 8 F. Cas. 111, 112 (C.C.S.D.N.Y. 1860) (No. 4186), and to protect the Nation from attack, *see, e.g., The Prize Cases*, 67 U.S. at 668. *See generally Ex parte Quirin*, 317 U.S. 1, 28 (1942) (recognizing that

---

<sup>2</sup> *Keith* made clear that one of the significant concerns driving the Court’s conclusion in the domestic security context was the inevitable connection between perceived threats to domestic security and political dissent. As the Court explained: “Fourth Amendment protections become the more necessary when the targets of official surveillance may be those suspected of unorthodoxy in their political beliefs. The danger to political dissent is acute where the Government attempts to act under so vague a concept as the power to protect ‘domestic security.’” *Keith*, 407 U.S. at 314; *see also id.* at 320 (“Security surveillances are especially sensitive because of the inherent vagueness of the domestic security concept, the necessarily broad and continuing nature of intelligence gathering, and the temptation to utilize such surveillances to oversee political dissent.”). Surveillance of domestic groups raises a First Amendment concern that generally is not present when the subjects of the surveillance are foreign powers or their agents.

the President has authority under the Constitution “to direct the performance of those functions which may constitutionally be performed by the military arm of the nation in time of war,” including “important incident[s] to the conduct of war,” such as “the adoption of measures by the military command . . . to repel and defeat the enemy”). As the Supreme Court emphasized in the *Prize Cases*, if the Nation is invaded, the President is “bound to resist force by force”; “[h]e must determine what degree of force the crisis demands” and need not await congressional sanction to do so. *The Prize Cases*, 67 U.S. at 670; *see also Campbell v. Clinton*, 203 F.3d 19, 27 (D.C. Cir. 2000) (Silberman, J., concurring) (“[T]he *Prize Cases* . . . stand for the proposition that the President has independent authority to repel aggressive acts by third parties even without specific congressional authorization, and courts may not review the level of force selected.”); *id.* at 40 (Tatel, J., concurring) (“[T]he President, as commander in chief, possesses emergency authority to use military force to defend the nation from attack without obtaining prior congressional approval.”). Indeed, “in virtue of his rank as head of the forces, [the President] has certain powers and duties with which Congress cannot interfere.” *Training of British Flying Students in the United States*, 40 Op. Att’y Gen. 58, 61 (1941) (Attorney General Robert H. Jackson) (internal quotation marks omitted). In exercising his constitutional powers, the President has wide discretion, consistent with the Constitution, over the methods of gathering intelligence about the Nation’s enemies in a time of armed conflict.

## II. THE AUMF CONFIRMS AND SUPPLEMENTS THE PRESIDENT’S INHERENT POWER TO USE WARRANTLESS SURVEILLANCE AGAINST THE ENEMY IN THE CURRENT ARMED CONFLICT

In the Authorization for Use of Military Force enacted in the wake of September 11th, Congress confirms and supplements the President’s constitutional authority to protect the Nation, including through electronic surveillance, in the context of the current post-September 11th armed conflict with al Qaeda and its allies. The broad language of the AUMF affords the President, at a minimum, discretion to employ the traditional incidents of the use of military force. The history of the President’s use of warrantless surveillance during armed conflicts demonstrates that the NSA surveillance described by the President is a fundamental incident of the use of military force that is necessarily included in the AUMF.

### A. THE TEXT AND PURPOSE OF THE AUMF AUTHORIZE THE NSA ACTIVITIES

On September 14, 2001, in its first legislative response to the attacks of September 11th, Congress gave its express approval to the President’s military campaign against al Qaeda and, in the process, confirmed the well-accepted understanding of the President’s Article II powers. *See* AUMF § 2(a).<sup>3</sup> In the preamble to the AUMF, Congress stated that “the President has authority under the Constitution to take action to deter and prevent acts of international terrorism against the United States,” AUMF pmbl., and thereby acknowledged the President’s inherent constitutional authority to defend the United States. This clause “constitutes an extraordinarily

<sup>3</sup> America’s military response began before the attacks of September 11th had been completed. *See The 9/11 Commission Report* 20 (2004). Combat air patrols were established and authorized “to engage inbound aircraft if they could verify that the aircraft was hijacked.” *Id.* at 42.

sweeping recognition of independent presidential *constitutional* power to employ the war power to combat terrorism.” Michael Stokes Paulsen, *Youngstown Goes to War*, 19 Const. Comment. 215, 252 (2002). This striking recognition of presidential authority cannot be discounted as the product of excitement in the immediate aftermath of September 11th, for the same terms were repeated by Congress more than a year later in the Authorization for Use of Military Force Against Iraq Resolution of 2002. Pub. L. No. 107-243, pmb., 116 Stat. 1498, 1500 (Oct. 16, 2002) (“[T]he President has authority under the Constitution to take action in order to deter and prevent acts of international terrorism against the United States . . .”). In the context of the conflict with al Qaeda and related terrorist organizations, therefore, Congress has acknowledged a broad executive authority to “deter and prevent” further attacks against the United States.

The AUMF passed by Congress on September 14, 2001, does not lend itself to a narrow reading. Its expansive language authorizes the President “to use *all necessary and appropriate force* against those nations, organizations, or persons *he determines* planned, authorized, committed, or aided the terrorist attacks that occurred on September 11, 2001.” AUMF § 2(a) (emphases added). In the field of foreign affairs, and particularly that of war powers and national security, congressional enactments are to be broadly construed where they indicate support for authority long asserted and exercised by the Executive Branch. *See, e.g., Haig v. Agee*, 453 U.S. 280, 293-303 (1981); *United States ex rel. Knauff v. Shaughnessy*, 338 U.S. 537, 543-45 (1950); *cf. Loving v. United States*, 517 U.S. 748, 772 (1996) (noting that the usual “limitations on delegation [of congressional powers] do not apply” to authorizations linked to the Commander in Chief power); *Dames & Moore v. Regan*, 453 U.S. 654, 678-82 (1981) (even where there is no express statutory authorization for executive action, legislation in related field may be construed to indicate congressional acquiescence in that action). Although Congress’s war powers under Article I, Section 8 of the Constitution empower Congress to legislate regarding the raising, regulation, and material support of the Armed Forces and related matters, rather than the prosecution of military campaigns, the AUMF indicates Congress’s endorsement of the President’s use of his constitutional war powers. This authorization transforms the struggle against al Qaeda and related terrorist organizations from what Justice Jackson called “a zone of twilight,” in which the President and the Congress may have concurrent powers whose “distribution is uncertain,” *Youngstown Sheet & Tube Co. v. Sawyer*, 343 U.S. 579, 637 (1952) (Jackson, J., concurring), into a situation in which the President’s authority is at its maximum because “it includes all that he possesses in his own right plus all that Congress can delegate,” *id.* at 635. With regard to these fundamental tools of warfare—and, as demonstrated below, warrantless electronic surveillance against the declared enemy is one such tool—the AUMF places the President’s authority at its zenith under *Youngstown*.

It is also clear that the AUMF confirms and supports the President’s use of those traditional incidents of military force against the enemy, wherever they may be—on United States soil or abroad. The nature of the September 11th attacks—launched on United States soil by foreign agents secreted in the United States—necessitates such authority, and the text of the AUMF confirms it. The operative terms of the AUMF state that the President is authorized to use force “in order to prevent any future acts of international terrorism against the United States,” *id.*, an objective which, given the recent attacks within the Nation’s borders and the continuing use of air defense throughout the country at the time Congress acted, undoubtedly

contemplated the possibility of military action within the United States. The preamble, moreover, recites that the United States should exercise its rights “to protect United States citizens both *at home* and abroad.” *Id.* pmbl. (emphasis added). To take action against those linked to the September 11th attacks involves taking action against individuals within the United States. The United States had been attacked on its own soil—not by aircraft launched from carriers several hundred miles away, but by enemy agents who had resided in the United States for months. A crucial responsibility of the President—charged by the AUMF and the Constitution—was and is to identify and attack those enemies, especially if they were in the United States, ready to strike against the Nation.

The text of the AUMF demonstrates in an additional way that Congress authorized the President to conduct warrantless electronic surveillance against the enemy. The terms of the AUMF not only authorized the President to “use all necessary and appropriate force” against those responsible for the September 11th attacks; it also authorized the President to “determine[]” the persons or groups responsible for those attacks and to take all actions necessary to prevent further attacks. AUMF § 2(a) (“the President is authorized to use all necessary and appropriate force against those nations, organizations, or persons *he determines* planned, authorized, committed, or aided the terrorist attacks that occurred on September 11th, 2001, or harbored such organizations or persons”) (emphasis added). Of vital importance to the use of force against the enemy is locating the enemy and identifying its plans of attack. And of vital importance to identifying the enemy and detecting possible future plots was the authority to intercept communications to or from the United States of persons with links to al Qaeda or related terrorist organizations. Given that the agents who carried out the initial attacks resided in the United States and had successfully blended into American society and disguised their identities and intentions until they were ready to strike, the necessity of using the most effective intelligence gathering tools against such an enemy, including electronic surveillance, was patent. Indeed, Congress recognized that the enemy in this conflict poses an “unusual and extraordinary threat.” AUMF pmbl.

The Supreme Court’s interpretation of the scope of the AUMF in *Hamdi v. Rumsfeld*, 542 U.S. 507 (2004), strongly supports this reading of the AUMF. In *Hamdi*, five members of the Court found that the AUMF authorized the detention of an American within the United States, notwithstanding a statute that prohibits the detention of U.S. citizens “except pursuant to an Act of Congress,” 18 U.S.C. § 4001(a). *See Hamdi*, 542 U.S. at 519 (plurality opinion); *id.* at 587 (Thomas, J., dissenting). Drawing on historical materials and “longstanding law-of-war principles,” *id.* at 518-21, a plurality of the Court concluded that detention of combatants who fought against the United States as part of an organization “known to have supported” al Qaeda “is so fundamental and accepted an incident to war as to be an exercise of the ‘necessary and appropriate force’ Congress has authorized the President to use.” *Id.* at 518; *see also id.* at 587 (Thomas, J., dissenting) (agreeing with the plurality that the joint resolution authorized the President to “detain those arrayed against our troops”); *accord Quirin*, 317 U.S. at 26-29, 38 (recognizing the President’s authority to capture and try agents of the enemy in the United States even if they had never “entered the theatre or zone of active military operations”). Thus, even though the AUMF does not say anything expressly about detention, the Court nevertheless found that it satisfied section 4001(a)’s requirement that detention be congressionally authorized.

The conclusion of five Justices in *Hamdi* that the AUMF incorporates fundamental “incidents” of the use of military force makes clear that the absence of any specific reference to signals intelligence activities in the resolution is immaterial. *See Hamdi*, 542 U.S. at 519 (“[I]t is of no moment that the AUMF does not use specific language of detention.”) (plurality opinion). Indeed, given the circumstances in which the AUMF was adopted, it is hardly surprising that Congress chose to speak about the President’s authority in general terms. The purpose of the AUMF was for Congress to sanction and support the military response to the devastating terrorist attacks that had occurred just three days earlier. Congress evidently thought it neither necessary nor appropriate to attempt to catalog every specific aspect of the use of the forces it was authorizing and every potential preexisting statutory limitation on the Executive Branch. Rather than engage in that difficult and impractical exercise, Congress authorized the President, in general but intentionally broad terms, to use the traditional and fundamental incidents of war and to determine how best to identify and engage the enemy in the current armed conflict. Congress’s judgment to proceed in this manner was unassailable, for, as the Supreme Court has recognized, even in normal times involving no major national security crisis, “Congress cannot anticipate and legislate with regard to every possible action the President may find it necessary to take.” *Dames & Moore*, 453 U.S. at 678. Indeed, Congress often has enacted authorizations to use military force using general authorizing language that does not purport to catalogue in detail the specific powers the President may employ. The need for Congress to speak broadly in recognizing and augmenting the President’s core constitutional powers over foreign affairs and military campaigns is of course significantly heightened in times of national emergency. *See Zemel v. Rusk*, 381 U.S. 1, 17 (1965) (“[B]ecause of the changeable and explosive nature of contemporary international relations . . . Congress—in giving the Executive authority over matters of foreign affairs—must of necessity paint with a brush broader than that it customarily wields in domestic areas.”).

*Hamdi* thus establishes the proposition that the AUMF “clearly and unmistakably” authorizes the President to take actions against al Qaeda and related organizations that amount to “fundamental incident[s] of waging war.” *Hamdi*, 542 U.S. at 519 (plurality opinion); *see also id.* at 587 (Thomas, J., dissenting). In other words, “[t]he clear inference is that the AUMF authorizes what the laws of war permit.” Curtis A. Bradley & Jack L. Goldsmith, *Congressional Authorization and the War on Terrorism*, 118 Harv. L. Rev. 2048, 2092 (2005) (emphasis added). Congress is presumed to be aware of the Supreme Court’s precedents. Indeed, Congress recently enacted legislation in response to the Court’s decision in *Rasul v. Bush*, 542 U.S. 466 (2004)—which was issued the same day as the *Hamdi* decision—removing habeas corpus jurisdiction over claims filed on behalf of confined enemy combatants held at Guantanamo Bay. Congress, however, has not expressed any disapproval of the Supreme Court’s commonsense and plain-meaning interpretation of the AUMF in *Hamdi*.<sup>4</sup>

---

<sup>4</sup> This understanding of the AUMF is consistent with Justice O’Connor’s admonition that “a state of war is not a blank check for the President,” *Hamdi*, 542 U.S. at 536 (plurality opinion). In addition to constituting a fundamental and accepted incident of the use of military force, the NSA activities are consistent with the law of armed conflict principle that the use of force be necessary and proportional. *See* Dieter Fleck, *The Handbook of Humanitarian Law in Armed Conflicts* 115 (1995). The NSA activities are proportional because they are minimally invasive and narrow in scope, targeting only the international communications of persons reasonably believed to be linked to al Qaeda, and are designed to protect the Nation from a devastating attack.

**B. WARRANTLESS ELECTRONIC SURVEILLANCE AIMED AT INTERCEPTING ENEMY COMMUNICATIONS HAS LONG BEEN RECOGNIZED AS A FUNDAMENTAL INCIDENT OF THE USE OF MILITARY FORCE**

The history of warfare—including the consistent practice of Presidents since the earliest days of the Republic—demonstrates that warrantless intelligence surveillance against the enemy is a fundamental incident of the use of military force, and this history confirms the statutory authority provided by the AUMF. Electronic surveillance is a fundamental tool of war that must be included in any natural reading of the AUMF’s authorization to use “all necessary and appropriate force.”

As one author has explained:

It is *essential* in warfare for a belligerent to be as fully informed as possible about the enemy—his strength, his weaknesses, measures taken by him and measures contemplated by him. This applies not only to military matters, but . . . anything which bears on and is material to his ability to wage the war in which he is engaged. *The laws of war recognize and sanction this aspect of warfare.*

Morris Greenspan, *The Modern Law of Land Warfare* 325 (1959) (emphases added); *see also* Memorandum for Members of the House Permanent Select Comm. on Intel., from Jeffrey H. Smith, *Re: Legal Authorities Regarding Warrantless Surveillance of U.S. Persons* 6 (Jan. 3, 2006) (“Certainly, the collection of intelligence is understood to be necessary to the execution of the war.”). Similarly, article 24 of the Hague Regulations of 1907 expressly states that “the employment of measures necessary for obtaining information about the enemy and the country [is] considered permissible.” *See also* L. Oppenheim, *International Law* vol. II § 159 (7th ed. 1952) (“War cannot be waged without all kinds of information, about the forces and the intentions of the enemy . . . . To obtain the necessary information, it has always been considered lawful to employ spies . . . .”); Joseph R. Baker & Henry G. Crocker, *The Laws of Land Warfare* 197 (1919) (“Every belligerent has a right . . . to discover the signals of the enemy and . . . to seek to procure information regarding the enemy through the aid of secret agents.”); *cf.* J.M. Spaight, *War Rights on Land* 205 (1911) (“[E]very nation employs spies; were a nation so quixotic as to refrain from doing so, it might as well sheathe its sword for ever. . . . Spies . . . are indispensably necessary to a general; and, other things being equal, that commander will be victorious who has the best secret service.”) (internal quotation marks omitted).

In accordance with these well-established principles, the Supreme Court has consistently recognized the President’s authority to conduct intelligence activities. *See, e.g., Totten v. United States*, 92 U.S. 105, 106 (1876) (recognizing President’s authority to hire spies); *Tenet v. Doe*, 544 U.S. 1 (2005) (reaffirming *Totten* and counseling against judicial interference with such matters); *see also Chicago & S. Air Lines v. Waterman S.S. Corp.*, 333 U.S. 103, 111 (1948) (“The President, both as Commander-in-Chief and as the Nation’s organ for foreign affairs, has available intelligence services whose reports neither are not and ought not to be published to the world.”); *United States v. Curtiss-Wright Export Corp.*, 299 U.S. 304, 320 (1936) (The President “has his confidential sources of information. He has his agents in the form of diplomatic,

consular, and other officials.”). Chief Justice John Marshall even described the gathering of intelligence as a military duty. *See Tatum v. Laird*, 444 F.2d 947, 952-53 (D.C. Cir. 1971) (“As Chief Justice John Marshall said of Washington, ‘A general must be governed by his intelligence and must regulate his measures by his information. It is his duty to obtain correct information . . . .’”) (quoting Foreword, U.S. Army Basic Field Manual, Vol. X, circa 1938), *rev’d on other grounds*, 408 U.S. 1 (1972).

The United States, furthermore, has a long history of wartime surveillance—a history that can be traced to George Washington, who “was a master of military espionage” and “made frequent and effective use of secret intelligence in the second half of the eighteenth century.” Rhodri Jeffreys-Jones, *Cloak and Dollar: A History of American Secret Intelligence* 11 (2002); *see generally id.* at 11-23 (recounting Washington’s use of intelligence); *see also Haig v. Agee*, 471 U.S. 159, 172 n.16 (1981) (quoting General Washington’s letter to an agent embarking upon an intelligence mission in 1777: “The necessity of procuring good intelligence, is apparent and need not be further urged.”). As President in 1790, Washington obtained from Congress a “secret fund” to deal with foreign dangers and to be spent at his discretion. Jeffreys-Jones, *supra*, at 22. The fund, which remained in use until the creation of the Central Intelligence Agency in the mid-twentieth century and gained “longstanding acceptance within our constitutional structure,” *Halperin v. CIA*, 629 F.2d 144, 158-59 (D.C. Cir. 1980), was used “for all purposes to which a secret service fund should or could be applied for the public benefit,” including “for persons sent publicly and secretly to search for important information, political or commercial,” *id.* at 159 (quoting Statement of Senator John Forsyth, Cong. Debates 295 (Feb. 25, 1831)). *See also Totten*, 92 U.S. at 107 (refusing to examine payments from this fund lest the publicity make a “secret service” “impossible”).

The interception of communications, in particular, has long been accepted as a fundamental method for conducting wartime surveillance. *See, e.g., Greenspan, supra*, at 326 (accepted and customary means for gathering intelligence “include air reconnaissance and photography; ground reconnaissance; observation of enemy positions; *interception of enemy messages, wireless and other*; examination of captured documents; . . . and interrogation of prisoners and civilian inhabitants”) (emphasis added). Indeed, since its independence, the United States has intercepted communications for wartime intelligence purposes and, if necessary, has done so within its own borders. During the Revolutionary War, for example, George Washington received and used to his advantage reports from American intelligence agents on British military strength, British strategic intentions, and British estimates of American strength. *See Jeffreys-Jones, supra*, at 13. One source of Washington’s intelligence was intercepted British mail. *See Central Intelligence Agency, Intelligence in the War of Independence* 31, 32 (1997). In fact, Washington himself proposed that one of his Generals “contrive a means of opening [British letters] without breaking the seals, take copies of the contents, and then let them go on.” *Id.* at 32 (“From that point on, Washington was privy to British intelligence pouches between New York and Canada.”); *see generally* Final Report of the Select Committee to Study Governmental Operations with respect to Intelligence Activities (the “Church Committee”), S. Rep. No. 94-755, at Book VI, 9-17 (Apr. 23, 1976) (describing Washington’s intelligence activities).

More specifically, warrantless electronic surveillance of wartime communications has been conducted in the United States since electronic communications have existed, *i.e.*, since at least the Civil War, when “[t]elegraph wiretapping was common, and an important intelligence source for both sides.” G.J.A. O’Toole, *The Encyclopedia of American Intelligence and Espionage* 498 (1988). Confederate General J.E.B. Stuart even “had his own personal wiretapper travel along with him in the field” to intercept military telegraphic communications. Samuel Dash, et al., *The Eavesdroppers* 23 (1971); *see also* O’Toole, *supra*, at 121, 385-88, 496-98 (discussing Civil War surveillance methods such as wiretaps, reconnaissance balloons, semaphore interception, and cryptanalysis). Similarly, there was extensive use of electronic surveillance during the Spanish-American War. *See* Bruce W. Bidwell, *History of the Military Intelligence Division, Department of the Army General Staff: 1775-1941*, at 62 (1986). When an American expeditionary force crossed into northern Mexico to confront the forces of Pancho Villa in 1916, the Army “frequently intercepted messages of the regime in Mexico City or the forces contesting its rule.” David Alvarez, *Secret Messages* 6-7 (2000). Shortly after Congress declared war on Germany in World War I, President Wilson (citing only his constitutional powers and the joint resolution declaring war) ordered the censorship of messages sent outside the United States via submarine cables, telegraph, and telephone lines. *See* Exec. Order No. 2604 (Apr. 28, 1917). During that war, wireless telegraphy “enabled each belligerent to tap the messages of the enemy.” Bidwell, *supra*, at 165 (quoting statement of Col. W. Nicolai, former head of the Secret Service of the High Command of the German Army, *in* W. Nicolai, *The German Secret Service* 21 (1924)).

As noted in Part I, on May 21, 1940, President Roosevelt authorized warrantless electronic surveillance of persons suspected of subversive activities, including spying, against the United States. In addition, on December 8, 1941, the day after the attack on Pearl Harbor, President Roosevelt gave the Director of the FBI “temporary powers to direct all news censorship and to *control all other telecommunications traffic* in and out of the United States.” Jack A. Gottschalk, “*Consistent with Security*” . . . *A History of American Military Press Censorship*, 5 *Comm. & L.* 35, 39 (1983) (emphasis added). *See* Memorandum for the Secretaries of War, Navy, State, and Treasury, the Postmaster General, and the Federal Communications Commission from Franklin D. Roosevelt (Dec. 8, 1941). President Roosevelt soon supplanted that temporary regime by establishing an office for conducting such electronic surveillance in accordance with the War Powers Act of 1941. *See* Pub. L. No. 77-354, § 303, 55 Stat. 838, 840-41 (Dec. 18, 1941); Gottschalk, 5 *Comm. & L.* at 40. The President’s order gave the Government of the United States access to “communications by mail, cable, radio, or other means of transmission passing between the United States and any foreign country.” *Id.* *See also* Exec. Order No. 8985, § 1, 6 Fed. Reg. 6625, 6625 (Dec. 19, 1941). In addition, the United States systematically listened surreptitiously to electronic communications as part of the war effort. *See* Dash, *Eavesdroppers* at 30. During World War II, signals intelligence assisted in, among other things, the destruction of the German U-boat fleet by the Allied naval forces, *see id.* at 27, and the war against Japan, *see* O’Toole, *supra*, at 32, 323-24. In general, signals intelligence “helped to shorten the war by perhaps two years, reduce the loss of life, and make inevitable an eventual Allied victory.” Carl Boyd, *American Command of the Sea Through Carriers, Codes, and the Silent Service: World War II and Beyond* 27 (1995); *see also* Alvarez, *supra*, at 1 (“There can be little doubt that signals intelligence contributed significantly to the

military defeat of the Axis.”). Significantly, not only was wiretapping in World War II used “extensively by military intelligence and secret service personnel in combat areas abroad,” but also “by the FBI and secret service in this country.” Dash, *supra*, at 30.

In light of the long history of prior wartime practice, the NSA activities fit squarely within the sweeping terms of the AUMF. The use of signals intelligence to identify and pinpoint the enemy is a traditional component of wartime military operations—or, to use the terminology of *Hamdi*, a “fundamental and accepted . . . incident to war,” 542 U.S. at 518 (plurality opinion)—employed to defeat the enemy and to prevent enemy attacks in the United States. Here, as in other conflicts, the enemy may use public communications networks, and some of the enemy may already be in the United States. Although those factors may be present in this conflict to a greater degree than in the past, neither is novel. Certainly, both factors were well known at the time Congress enacted the AUMF. Wartime interception of international communications made by the enemy thus should be understood, no less than the wartime detention at issue in *Hamdi*, as one of the basic methods of engaging and defeating the enemy that Congress authorized in approving “*all* necessary and appropriate force” that the President would need to defend the Nation. AUMF § 2(a) (emphasis added).

\* \* \*

Accordingly, the President has the authority to conduct warrantless electronic surveillance against the declared enemy of the United States in a time of armed conflict. That authority derives from the Constitution, and is reinforced by the text and purpose of the AUMF, the nature of the threat posed by al Qaeda that Congress authorized the President to repel, and the long-established understanding that electronic surveillance is a fundamental incident of the use of military force. The President’s power in authorizing the NSA activities is at its zenith because he has acted “pursuant to an express or implied authorization of Congress.” *Youngstown*, 343 U.S. at 635 (Jackson, J., concurring).

### III. THE NSA ACTIVITIES ARE CONSISTENT WITH THE FOREIGN INTELLIGENCE SURVEILLANCE ACT

The President’s exercise of his constitutional authority to conduct warrantless wartime electronic surveillance of the enemy, as confirmed and supplemented by statute in the AUMF, is fully consistent with the requirements of the Foreign Intelligence Surveillance Act (“FISA”).<sup>5</sup> FISA is a critically important tool in the War on Terror. The United States makes full use of the authorities available under FISA to gather foreign intelligence information, including authorities to intercept communications, conduct physical searches, and install and use pen registers and trap and trace devices. While FISA establishes certain procedures that must be followed for these authorities to be used (procedures that usually involve applying for and obtaining an order from a special court), FISA also expressly contemplates that a later legislative enactment could

<sup>5</sup> To avoid revealing details about the operation of the program, it is assumed for purposes of this paper that the activities described by the President constitute “electronic surveillance,” as defined by FISA, 50 U.S.C. § 1801(f).

authorize electronic surveillance outside the procedures set forth in FISA itself. The AUMF constitutes precisely such an enactment. To the extent there is any ambiguity on this point, the canon of constitutional avoidance requires that such ambiguity be resolved in favor of the President's authority to conduct the communications intelligence activities he has described. Finally, if FISA could not be read to allow the President to authorize the NSA activities during the current congressionally authorized armed conflict with al Qaeda, FISA would be unconstitutional as applied in this narrow context.

#### A. THE REQUIREMENTS OF FISA

FISA was enacted in 1978 to regulate "electronic surveillance," particularly when conducted to obtain "foreign intelligence information," as those terms are defined in section 101 of FISA, 50 U.S.C. § 1801. As a general matter, the statute requires that the Attorney General approve an application for an order from a special court composed of Article III judges and created by FISA—the Foreign Intelligence Surveillance Court ("FISC"). *See* 50 U.S.C. §§ 1803-1804. The application must demonstrate, among other things, that there is probable cause to believe that the target is a foreign power or an agent of a foreign power. *See id.* § 1805(a)(3)(A). It must also contain a certification from the Assistant to the President for National Security Affairs or an officer of the United States appointed by the President with the advice and consent of the Senate and having responsibilities in the area of national security or defense that the information sought is foreign intelligence information and cannot reasonably be obtained by normal investigative means. *See id.* § 1804(a)(7). FISA further requires the Government to state the means that it proposes to use to obtain the information and the basis for its belief that the facilities at which the surveillance will be directed are being used or are about to be used by a foreign power or an agent of a foreign power. *See id.* § 1804(a)(4), (a)(8).

FISA was the first congressional measure that sought to impose restrictions on the Executive Branch's authority to engage in electronic surveillance for foreign intelligence purposes, an authority that, as noted above, had been repeatedly recognized by the federal courts. *See* Americo R. Cinquegrana, *The Walls (and Wires) Have Ears: The Background and First Ten Years of the Foreign Intelligence Surveillance Act of 1978*, 137 U. Penn. L. Rev. 793, 810 (1989) (stating that the "status of the President's inherent authority" to conduct surveillance "formed the core of subsequent legislative deliberations" leading to the enactment of FISA). To that end, FISA modified a provision in Title III that previously had disclaimed any intent to have laws governing wiretapping interfere with the President's constitutional authority to gather foreign intelligence. Prior to the passage of FISA, section 2511(3) of title 18 had stated that "[n]othing contained in this chapter or in section 605 of the Communications Act of 1934 . . . shall limit the constitutional power of the President to take such measures as he deems necessary to protect the Nation against actual or potential attack or other hostile acts of a foreign power, to obtain foreign intelligence information deemed essential to the security of the United States, or to protect national security information against foreign intelligence activities." 18 U.S.C. § 2511(3) (1970). FISA replaced that provision with an important, though more limited, preservation of authority for the President. *See* Pub. L. No. 95-511, § 201(b), (c), 92 Stat. 1783, 1797 (1978), codified at 18 U.S.C. § 2511(2)(f) (West Supp. 2005) (carving out from statutory regulation only the acquisition of intelligence information from "international or foreign communications" and

“foreign intelligence activities . . . involving a foreign electronic communications system” as long as they are accomplished “utilizing a means other than electronic surveillance as defined in section 101” of FISA). Congress also defined “electronic surveillance,” 50 U.S.C. § 1801(f), carefully and somewhat narrowly.<sup>6</sup>

In addition, Congress addressed, to some degree, the manner in which FISA might apply after a formal declaration of war by expressly allowing warrantless surveillance for a period of fifteen days following such a declaration. Section 111 of FISA allows the President to “authorize electronic surveillance without a court order under this subchapter to acquire foreign intelligence information for a period not to exceed fifteen calendar days following a declaration of war by the Congress.” 50 U.S.C. § 1811.

The legislative history of FISA shows that Congress understood it was legislating on fragile constitutional ground and was pressing or even exceeding constitutional limits in regulating the President’s authority in the field of foreign intelligence. The final House Conference Report, for example, recognized that the statute’s restrictions might well impermissibly infringe on the President’s constitutional powers. That report includes the extraordinary acknowledgment that “[t]he conferees agree that the establishment by this act of exclusive means by which the President may conduct electronic surveillance does not foreclose a different decision by the Supreme Court.” H.R. Conf. Rep. No. 95-1720, at 35, *reprinted in* 1978 U.S.C.C.A.N. 4048, 4064. But, invoking Justice Jackson’s concurrence in the *Steel Seizure* case, the Conference Report explained that Congress intended in FISA to exert whatever power Congress constitutionally had over the subject matter to restrict foreign intelligence surveillance and to leave the President solely with whatever inherent constitutional authority he might be able to invoke against Congress’s express wishes. *Id.* The Report thus explains that “[t]he intent of the conferees is to apply the standard set forth in Justice Jackson’s concurring opinion in the *Steel Seizure* Case: ‘When a President takes measures incompatible with the express or implied

---

<sup>6</sup> FISA’s legislative history reveals that these provisions were intended to exclude certain intelligence activities conducted by the National Security Agency from the coverage of FISA. According to the report of the Senate Judiciary Committee on FISA, “this provision [referencing what became the first part of section 2511(2)(f)] is designed to make clear that the legislation does not deal with international signals intelligence activities as currently engaged in by the National Security Agency and electronic surveillance conducted outside the United States.” S. Rep. No. 95-604, at 64 (1978), *reprinted in* 1978 U.S.C.C.A.N. 3904, 3965. The legislative history also makes clear that the definition of “electronic surveillance” was crafted for the same reason. *See id.* at 33-34, 1978 U.S.C.C.A.N. at 3934-36. FISA thereby “adopts the view expressed by the Attorney General during the hearings that enacting statutory controls to regulate the National Security Agency and the surveillance of Americans abroad raises problems best left to separate legislation.” *Id.* at 64, 1978 U.S.C.C.A.N. at 3965. Such legislation placing limitations on traditional NSA activities was drafted, but never passed. *See* National Intelligence Reorganization and Reform Act of 1978: Hearings Before the Senate Select Committee on Intelligence, 95th Cong., 2d Sess. 999-1007 (1978) (text of unenacted legislation). And Congress understood that the NSA surveillance that it intended categorically to exclude from FISA could include the monitoring of international communications into or out of the United States of U.S. citizens. The report specifically referred to the Church Committee report for its description of the NSA’s activities, S. Rep. No. 95-604, at 64 n.63, 1978 U.S.C.C.A.N. at 3965-66 n.63, which stated that “the NSA intercepts messages passing over international lines of communication, some of which have one terminal within the United States. Traveling over these lines of communication, especially those with one terminal in the United States, are messages of Americans . . .” S. Rep. 94-755, at Book II, 308 (1976). Congress’s understanding in the legislative history of FISA that such communications could be intercepted outside FISA procedures is notable.

will of Congress, his power is at the lowest ebb, for then he can rely only upon his own constitutional power minus any constitutional power of Congress over the matter.” *Id.* (quoting *Youngstown Sheet & Tube Co. v. Sawyer*, 343 U.S. 579, 637 (1952) (Jackson, J., concurring)); see also S. Rep. No. 95-604, at 64, reprinted in 1978 U.S.C.C.A.N. at 3966 (same); see generally Elizabeth B. Bazen et al., Congressional Research Service, *Re: Presidential Authority to Conduct Warrantless Electronic Surveillance to Gather Foreign Intelligence Information* 28-29 (Jan. 5, 2006). It is significant, however, that Congress did not decide conclusively to continue to push the boundaries of its constitutional authority in wartime. Instead, Congress reserved the question of the appropriate procedures to regulate electronic surveillance in time of war, and established a fifteen-day period during which the President would be permitted to engage in electronic surveillance without complying with FISA’s express procedures and during which Congress would have the opportunity to revisit the issue. See 50 U.S.C. § 1811; H.R. Conf. Rep. No. 95-1720, at 34, reprinted in 1978 U.S.C.C.A.N. at 4063 (noting that the purpose of the fifteen-day period following a declaration of war in section 111 of FISA was to “allow time for consideration of any amendment to this act that may be appropriate during a wartime emergency”).

#### B. FISA CONTEMPLATES AND ALLOWS SURVEILLANCE AUTHORIZED “BY STATUTE”

Congress did not attempt through FISA to prohibit the Executive Branch from using electronic surveillance. Instead, Congress acted to bring the exercise of that power under more stringent congressional control. See, e.g., H. Conf. Rep. No. 95-1720, at 32, reprinted in 1978 U.S.C.C.A.N. 4048, 4064. Congress therefore enacted a regime intended to supplant the President’s reliance on his own constitutional authority. Consistent with this overriding purpose of bringing the use of electronic surveillance under *congressional* control and with the commonsense notion that the Congress that enacted FISA could not bind future Congresses, FISA expressly contemplates that the Executive Branch may conduct electronic surveillance outside FISA’s express procedures if and when a subsequent statute authorizes such surveillance.

Thus, section 109 of FISA prohibits any person from intentionally “engag[ing] . . . in electronic surveillance under color of law *except as authorized by statute.*” 50 U.S.C. § 1809(a)(1) (emphasis added). Because FISA’s prohibitory provision broadly exempts surveillance “authorized by statute,” the provision demonstrates that Congress did not attempt to regulate through FISA electronic surveillance authorized by Congress through a subsequent enactment. The use of the term “statute” here is significant because it strongly suggests that *any* subsequent authorizing statute, not merely one that amends FISA itself, could legitimately authorize surveillance outside FISA’s standard procedural requirements. Compare 18 U.S.C. § 2511(1) (“Except as otherwise specifically provided *in this chapter* any person who—(a) intentionally intercepts . . . any wire, oral, or electronic communication[] . . . shall be punished . . .”) (emphasis added); *id.* § 2511(2)(e) (providing a defense to liability to individuals “conduct[ing] electronic surveillance, . . . as authorized by *that Act [FISA]*”) (emphasis added). In enacting FISA, therefore, Congress contemplated the possibility that the President might be permitted to conduct electronic surveillance pursuant to a later-enacted statute that did not

incorporate all of the procedural requirements set forth in FISA or that did not expressly amend FISA itself.

To be sure, the scope of this exception is rendered less clear by the conforming amendments that FISA made to chapter 119 of title 18—the portion of the criminal code that provides the mechanism for obtaining wiretaps for law enforcement purposes. Before FISA was enacted, chapter 119 made it a criminal offense for any person to intercept a communication except as specifically provided in that chapter. *See* 18 U.S.C. § 2511(1)(a), (4)(a). Section 201(b) of FISA amended that chapter to provide an exception from criminal liability for activities conducted pursuant to FISA. Specifically, FISA added 18 U.S.C. § 2511(2)(e), which provides that it is not unlawful for “an officer, employee, or agent of the United States . . . to conduct electronic surveillance, as defined in section 101 of the Foreign Intelligence Surveillance Act of 1978, as authorized by that Act.” *Id.* § 2511(2)(e). Similarly, section 201(b) of FISA amended chapter 119 to provide that “procedures in this chapter [or chapter 121 (addressing access to stored wire and electronic communications and customer records)] and the Foreign Intelligence Surveillance Act of 1978 shall be the exclusive means by which electronic surveillance, as defined in section 101 of such Act, and the interception of domestic wire, oral, and electronic communications may be conducted.” *Id.* § 2511(2)(f) (West Supp. 2005).<sup>7</sup>

The amendments that section 201(b) of FISA made to title 18 are fully consistent, however, with the conclusion that FISA contemplates that a subsequent statute could authorize electronic surveillance outside FISA’s express procedural requirements. Section 2511(2)(e) of title 18, which provides that it is “not unlawful” for an officer of the United States to conduct electronic surveillance “as authorized by” FISA, is best understood as a safe-harbor provision. Because of section 109, the protection offered by section 2511(2)(e) for surveillance “authorized by” FISA extends to surveillance that is authorized by any other statute and therefore excepted from the prohibition of section 109. In any event, the purpose of section 2511(2)(e) is merely to make explicit what would already have been implicit—that those authorized by statute to engage in particular surveillance do not act unlawfully when they conduct such surveillance. Thus, even if that provision had not been enacted, an officer conducting surveillance authorized by statute (whether FISA or some other law) could not reasonably have been thought to be violating Title III. Similarly, section 2511(2)(e) cannot be read to require a result that would be manifestly unreasonable—exposing a federal officer to criminal liability for engaging in surveillance authorized by statute, merely because the authorizing statute happens not to be FISA itself.

Nor could 18 U.S.C. § 2511(2)(f), which provides that the “procedures in this chapter . . . and the Foreign Intelligence Surveillance Act of 1978 shall be the exclusive means by which electronic surveillance . . . may be conducted,” have been intended to trump the commonsense approach of section 109 and preclude a subsequent Congress from authorizing the President to engage in electronic surveillance through a statute other than FISA, using procedures other than those outlined in FISA or chapter 119 of title 18. The legislative history of section 2511(2)(f) clearly indicates an intent to prevent the President from engaging in surveillance except as

---

<sup>7</sup> The bracketed portion was added in 1986 amendments to section 2511(2)(f). *See* Pub. L. No. 99-508 § 101(b)(3), 100 Stat. 1848, 1850.

authorized by Congress, see H.R. Conf. Rep. No. 95-1720, at 32, *reprinted in* 1978 U.S.C.C.A.N. 4048, 4064, which explains why section 2511(2)(f) set forth all then-existing statutory restrictions on electronic surveillance. Section 2511(2)(f)'s reference to "exclusive means" reflected the state of statutory authority for electronic surveillance in 1978 and cautioned the President not to engage in electronic surveillance outside congressionally sanctioned parameters. It is implausible to think that, in attempting to limit the *President's* authority, Congress also limited its own future authority by barring subsequent Congresses from authorizing the Executive to engage in surveillance in ways not specifically enumerated in FISA or chapter 119, or by requiring a subsequent Congress specifically to amend FISA and section 2511(2)(f). There would be a serious question as to whether the Ninety-Fifth Congress could have so tied the hands of its successors. See, e.g., *Fletcher v. Peck*, 10 U.S. (6 Cranch) 87, 135 (1810) (noting that "one legislature cannot abridge the powers of a succeeding legislature"); *Reichelderfer v. Quinn*, 287 U.S. 315, 318 (1932) ("[T]he will of a particular Congress . . . does not impose itself upon those to follow in succeeding years"); *Lockhart v. United States*, 126 S. Ct. 699, 703 (2005) (Scalia, J., concurring) (collecting precedent); 1 W. Blackstone, *Commentaries on the Laws of England* 90 (1765) ("Acts of parliament derogatory from the power of subsequent parliaments bind not"). In the absence of a clear statement to the contrary, it cannot be presumed that Congress attempted to abrogate its own authority in such a way.

Far from a clear statement of congressional intent to bind itself, there are indications that section 2511(2)(f) cannot be interpreted as requiring that *all* electronic surveillance and domestic interception be conducted under FISA's enumerated procedures or those of chapter 119 of title 18 until and unless those provisions are repealed or amended. Even when section 2511(2)(f) was enacted (and no subsequent authorizing statute existed), it could not reasonably be read to preclude all electronic surveillance conducted outside the procedures of FISA or chapter 119 of title 18. In 1978, use of a pen register or trap and trace device constituted electronic surveillance as defined by FISA. See 50 U.S.C. §§ 1801(f), (n). Title I of FISA provided procedures for obtaining court authorization for the use of pen registers to obtain foreign intelligence information. But the Supreme Court had, just prior to the enactment of FISA, held that chapter 119 of title 18 did not govern the use of pen registers. See *United States v. New York Tel. Co.*, 434 U.S. 159, 165-68 (1977). Thus, if section 2511(2)(f) were to be read to permit of no exceptions, the use of pen registers for purposes other than to collect foreign intelligence information would have been unlawful because such use would not have been authorized by the "exclusive" procedures of section 2511(2)(f), *i.e.*, FISA and chapter 119. But no court has held that pen registers could not be authorized outside the foreign intelligence context. Indeed, FISA appears to have recognized this issue by providing a defense to liability for any official who engages in electronic surveillance under a search warrant or court order. See 50 U.S.C. § 1809(b). (The practice when FISA was enacted was for law enforcement officers to obtain search warrants under the Federal Rules of Criminal Procedure authorizing the installation and use of pen registers. See S. 1667, *A Bill to Amend Title 18, United States Code, with Respect to the Interception of Certain Communications, Other Forms of Surveillance, and for Other Purposes: Hearing Before the Subcomm. On Patents, Copyrights and Trademarks of the Senate*

*Comm. on the Judiciary*, 99th Cong. 57 (1985) (prepared statement of James Knapp, Deputy Assistant Attorney General, Criminal Division)).<sup>8</sup>

In addition, section 2511(2)(a)(ii) authorizes telecommunications providers to assist officers of the Government engaged in electronic surveillance when the Attorney General certifies that “no warrant or court order is required by law [and] that all statutory requirements have been met.” 18 U.S.C. § 2511(2)(a)(ii).<sup>9</sup> If the Attorney General can certify, in good faith, that the requirements of a subsequent statute authorizing electronic surveillance are met, service providers are affirmatively and expressly authorized to assist the Government. Although FISA does allow the Government to proceed without a court order in several situations, *see* 50 U.S.C. § 1805(f) (emergencies); *id.* § 1802 (certain communications between foreign governments), this provision specifically lists only Title III’s emergency provision but speaks generally to Attorney General certification. That reference to Attorney General certification is consistent with the historical practice in which Presidents have delegated to the Attorney General authority to approve warrantless surveillance for foreign intelligence purposes. *See, e.g., United States v. United States District Court*, 444 F.2d 651, 669-71 (6th Cir. 1971) (reproducing as an appendix memoranda from Presidents Roosevelt, Truman, and Johnson). Section 2511(2)(a)(ii) thus suggests that telecommunications providers can be authorized to assist with warrantless electronic surveillance when such surveillance is authorized by law outside FISA.

In sum, by expressly and broadly excepting from its prohibition electronic surveillance undertaken “as authorized by statute,” section 109 of FISA permits an exception to the “procedures” of FISA referred to in 18 U.S.C. § 2511(2)(f) where authorized by another statute, even if the other authorizing statute does not specifically amend section 2511(2)(f).

### C. THE AUMF IS A “STATUTE” AUTHORIZING SURVEILLANCE OUTSIDE THE CONFINES OF FISA

The AUMF qualifies as a “statute” authorizing electronic surveillance within the meaning of section 109 of FISA.

First, because the term “statute” historically has been given broad meaning, the phrase “authorized by statute” in section 109 of FISA must be read to include joint resolutions such as

<sup>8</sup> Alternatively, section 109(b) may be read to constitute a “procedure” in FISA or to incorporate procedures from sources other than FISA (such as the Federal Rules of Criminal Procedure or state court procedures), and in that way to satisfy section 2511(2)(f). But if section 109(b)’s defense can be so read, section 109(a) should also be read to constitute a procedure or incorporate procedures not expressly enumerated in FISA.

<sup>9</sup> Section 2511(2)(a)(ii) states:

Notwithstanding any other law, providers of wire or electronic communication service, . . . are authorized by law to provide information, facilities, or technical assistance to persons authorized by law to intercept . . . communications or to conduct electronic surveillance, as defined [by FISA], if such provider . . . has been provided with . . . a certification in writing by [specified persons proceeding under Title III’s emergency provision] or the Attorney General of the United States that no warrant or court order is required by law, that all statutory requirements have been met, and that the specific assistance is required.

the AUMF. See *American Fed'n of Labor v. Watson*, 327 U. S. 582, 592-93 (1946) (finding the term “statute” as used in 28 U.S.C. § 380 to mean “a compendious summary of various enactments, by whatever method they may be adopted, to which a State gives her sanction”); Black’s Law Dictionary 1410 (6th ed. 1990) (defining “statute” broadly to include any “formal written enactment of a legislative body,” and stating that the term is used “to designate the legislatively created laws in contradistinction to court decided or unwritten laws”). It is thus of no significance to this analysis that the AUMF was enacted as a joint resolution rather than a bill. See, e.g., *Ann Arbor R.R. Co. v. United States*, 281 U.S. 658, 666 (1930) (joint resolutions are to be construed by applying “the rules applicable to legislation in general”); *United States ex rel. Levey v. Stockslager*, 129 U.S. 470, 475 (1889) (joint resolution had “all the characteristics and effects” of statute that it suspended); *Padilla ex rel. Newman v. Bush*, 233 F. Supp. 2d 564, 598 (S.D.N.Y. 2002) (in analyzing the AUMF, finding that there is “no relevant constitutional difference between a bill and a joint resolution”), *rev’d sub nom. on other grounds, Rumsfeld v. Padilla*, 352 F.3d 695 (2d Cir. 2003), *rev’d*, 542 U.S. 426 (2004); see also Letter for the Hon. John Conyers, Jr., U.S. House of Representatives, from Prof. Laurence H. Tribe at 3 (Jan. 6, 2006) (term “statute” in section 109 of FISA “of course encompasses a joint resolution presented to and signed by the President”).

Second, the longstanding history of communications intelligence as a fundamental incident of the use of force and the Supreme Court’s decision in *Hamdi v. Rumsfeld* strongly suggest that the AUMF satisfies the requirement of section 109 of FISA for statutory authorization of electronic surveillance. As explained above, it is not necessary to demarcate the outer limits of the AUMF to conclude that it encompasses electronic surveillance targeted at the enemy. Just as a majority of the Court concluded in *Hamdi* that the AUMF authorizes detention of U.S. citizens who are enemy combatants without expressly mentioning the President’s long-recognized power to detain, so too does it authorize the use of electronic surveillance without specifically mentioning the President’s equally long-recognized power to engage in communications intelligence targeted at the enemy. And just as the AUMF satisfies the requirement in 18 U.S.C. § 4001(a) that no U.S. citizen be detained “except pursuant to an Act of Congress,” so too does it satisfy section 109’s requirement for statutory authorization of electronic surveillance.<sup>10</sup> In authorizing the President’s use of force in response to the September 11th attacks, Congress did not need to comb through the United States Code looking for those restrictions that it had placed on national security operations during times of peace and designate with specificity each traditional tool of military force that it sought to authorize the President to use. There is no historical precedent for such a requirement: authorizations to use

<sup>10</sup> It might be argued that Congress dealt more comprehensively with electronic surveillance in FISA than it did with detention in 18 U.S.C. § 4001(a). Thus, although Congress prohibited detention “except pursuant to an Act of Congress,” it combined the analogous prohibition in FISA (section 109(a)) with section 2511(2)(f)’s exclusivity provision. See Letter to the Hon. Bill Frist, Majority Leader, U.S. Senate, from Professor Curtis A. Bradley *et al.* at 5 n.6 (Jan. 9, 2006) (noting that section 4001(a) does not “attempt[] to create an exclusive mechanism for detention”). On closer examination, however, it is evident that Congress has regulated detention far more meticulously than these arguments suggest. Detention is the topic of much of the Criminal Code, as well as a variety of other statutes, including those providing for civil commitment of the mentally ill and confinement of alien terrorists. The existence of these statutes and accompanying extensive procedural safeguards, combined with the substantial constitutional issues inherent in detention, see, e.g., *Hamdi*, 542 U.S. at 574-75 (Scalia, J., dissenting), refute any such argument.

military force traditionally have been couched in general language. Indeed, prior administrations have interpreted joint resolutions declaring war and authorizing the use of military force to authorize expansive collection of communications into and out of the United States.<sup>11</sup>

Moreover, crucial to the Framers' decision to vest the President with primary constitutional authority to defend the Nation from foreign attack is the fact that the Executive can act quickly, decisively, and flexibly as needed. For Congress to have a role in that process, it must be able to act with similar speed, either to lend its support to, or to signal its disagreement with, proposed military action. Yet the need for prompt decisionmaking in the wake of a devastating attack on the United States is fundamentally inconsistent with the notion that to do so Congress must legislate at a level of detail more in keeping with a peacetime budget reconciliation bill. In emergency situations, Congress must be able to use broad language that effectively sanctions the President's use of the core incidents of military force. That is precisely what Congress did when it passed the AUMF on September 14, 2001—just three days after the deadly attacks on America. The Capitol had been evacuated on September 11th, and Congress was meeting in scattered locations. As an account emerged of who might be responsible for these attacks, Congress acted quickly to authorize the President to use “all necessary and appropriate force” against the enemy that he determines was involved in the September 11th attacks. Under these circumstances, it would be unreasonable and wholly impractical to demand that Congress specifically amend FISA in order to assist the President in defending the Nation. Such specificity would also have been self-defeating because it would have apprised our adversaries of some of our most sensitive methods of intelligence gathering.<sup>12</sup>

Section 111 of FISA, 50 U.S.C. § 1811, which authorizes the President, “[n]otwithstanding any other law,” to conduct “electronic surveillance without a court order under this subchapter to acquire foreign intelligence information for a period not to exceed fifteen calendar days following a declaration of war by Congress,” does not require a different reading of the AUMF. *See also id.* § 1844 (same provision for pen registers); *id.* § 1829 (same provision for physical searches). Section 111 cannot reasonably be read as Congress's final word on electronic surveillance during wartime, thus permanently limiting the President in all

---

<sup>11</sup> As noted above, in intercepting communications, President Wilson relied on his constitutional authority and the joint resolution declaring war and authorizing the use of military force, which, as relevant here, provided “that the President [is] authorized and directed to employ the entire naval and military forces of the United States and the resources of the Government to carry on war against the Imperial German Government; and to bring the conflict to a successful termination all of the resources of the country are hereby pledged by the Congress of the United States.” Joint Resolution of Apr. 6, 1917, ch. 1, 40 Stat. 1. The authorization did not explicitly mention interception of communications.

<sup>12</sup> Some have suggested that the Administration declined to seek a specific amendment to FISA allowing the NSA activities “because it was advised that Congress would reject such an amendment,” Letter to the Hon. Bill Frist, Majority Leader, U.S. Senate, from Professor Curtis A. Bradley *et al.* 4 & n.4 (Jan. 9, 2005), and they have quoted in support of that assertion the Attorney General's statement that certain Members of Congress advised the Administration that legislative relief “would be difficult, if not impossible.” *Id.* at 4 n.4. As the Attorney General subsequently indicated, however, the difficulty with such specific legislation was that it could not be enacted “without compromising the program.” *See* Remarks by Homeland Security Secretary Chertoff and Attorney General Gonzales on the USA PATRIOT Act (Dec. 21, 2005), available at <http://www.dhs.gov/dhspublic/display?content=5285>.

circumstances to a mere fifteen days of warrantless military intelligence gathering targeted at the enemy following a declaration of war. Rather, section 111 represents Congress's recognition that it would likely have to return to the subject and provide additional authorization to conduct warrantless electronic surveillance outside FISA during time of war. The Conference Report explicitly stated the conferees' "inten[t] that this [fifteen-day] period will allow time for consideration of any amendment to this act that may be appropriate during a wartime emergency." H.R. Conf. Rep. No. 95-1720, at 34, *reprinted in* 1978 U.S.C.C.A.N. at 4063. Congress enacted section 111 so that the President could conduct warrantless surveillance while Congress considered supplemental wartime legislation.

Nothing in the terms of section 111 disables Congress from authorizing such electronic surveillance as a traditional incident of war through a broad, conflict-specific authorization for the use of military force, such as the AUMF. Although the legislative history of section 111 indicates that in 1978 some Members of Congress believed that any such authorization would come in the form of a particularized amendment to FISA itself, section 111 does not require that result. Nor could the Ninety-Fifth Congress tie the hands of a subsequent Congress in this way, at least in the absence of far clearer statutory language expressly requiring that result. *See supra*, pp. 21-22; *compare, e.g.*, War Powers Resolution, § 8, 50 U.S.C. § 1547(a) ("Authority to introduce United States Armed Forces into hostilities . . . shall not be inferred . . . from any provision of law . . . unless such provision specifically authorizes [such] introduction . . . and states that it is intended to constitute specific statutory authorization within the meaning of this chapter."); 10 U.S.C. § 401 (stating that any other provision of law providing assistance to foreign countries to detect and clear landmines shall be subject to specific limitations and may be construed as superseding such limitations "only if, and to the extent that, such provision specifically refers to this section and specifically identifies the provision of this section that is to be considered superseded or otherwise inapplicable"). An interpretation of section 111 that would disable Congress from authorizing broader electronic surveillance in that form can be reconciled neither with the purposes of section 111 nor with the well-established proposition that "one legislature cannot abridge the powers of a succeeding legislature." *Fletcher v. Peck*, 10 U.S. (6 Cranch) at 135; *see supra* Part II.B. For these reasons, the better interpretation is that section 111 was not intended to, and did not, foreclose Congress from using the AUMF as the legal vehicle for supplementing the President's existing authority under FISA in the battle against al Qaeda.

The contrary interpretation of section 111 also ignores the important differences between a formal declaration of war and a resolution such as the AUMF. As a historical matter, a formal declaration of war was no longer than a sentence, and thus Congress would not expect a declaration of war to outline the extent to which Congress authorized the President to engage in various incidents of waging war. Authorizations for the use of military force, by contrast, are typically more detailed and are made for the *specific purpose* of reciting the manner in which Congress has authorized the President to act. Thus, Congress could reasonably expect that an authorization for the use of military force would address the issue of wartime surveillance, while a declaration of war would not. Here, the AUMF declares that the Nation faces "an unusual and extraordinary threat," acknowledges that "the President has authority under the Constitution to take action to deter and prevent acts of international terrorism against the United States," and

provides that the President is authorized “to use all necessary and appropriate force” against those “he determines” are linked to the September 11th attacks. AUMF pmb., § 2. This sweeping language goes far beyond the bare terms of a declaration of war. *Compare, e.g.*, Act of Apr. 25, 1898, ch. 189, 30 Stat. 364 (“First. That war be, and the same is hereby declared to exist . . . between the United States of America and the Kingdom of Spain.”).

Although legislation that has included a declaration of war has often also included an authorization of the President to use force, these provisions are separate and need not be combined in a single statute. *See, e.g., id.* (“Second. That the President of the United States be, and he hereby is, directed and empowered to use the entire land and naval forces of the United States, and to call into the actual service of the United States the militia of the several states, *to such extent as may be necessary to carry this Act into effect.*”) (emphasis added). Moreover, declarations of war have legal significance independent of any additional authorization of force that might follow. *See, e.g.*, Louis Henkin, *Foreign Affairs and the U.S. Constitution* 75 (2d ed. 1996) (explaining that a formal state of war has various legal effects, such as terminating diplomatic relations, and abrogating or suspending treaty obligations and international law rights and duties); *see also id.* at 370 n.65 (speculating that one reason to fight an undeclared war would be to “avoid the traditional consequences of declared war on relations with third nations or even . . . belligerents”).

In addition, section 111 does not cover the vast majority of modern military conflicts. The last declared war was World War II. Indeed, the most recent conflict prior to the passage of FISA, Vietnam, was fought without a formal declaration of war. In addition, the War Powers Resolution, enacted less than five years before FISA, clearly recognizes the distinctions between formal declarations of war and authorizations of force and demonstrates that, if Congress had wanted to include such authorizations in section 111, it knew how to do so. *See, e.g.*, 50 U.S.C. § 1544(b) (attempting to impose certain consequences 60 days after reporting the initiation of hostilities to Congress “unless the Congress . . . has declared war *or has enacted a specific authorization for such use*” of military force) (emphasis added). It is possible that, in enacting section 111, Congress intended to make no provision for even the temporary use of electronic surveillance without a court order for what had become the legal regime for most military conflicts. A better reading, however, is that Congress assumed that such a default provision would be unnecessary because, if it had acted through an authorization for the use of military force, the more detailed provisions of that authorization would resolve the extent to which Congress would attempt to authorize, or withhold authorization for, the use of electronic surveillance.<sup>13</sup>

---

<sup>13</sup> Some have pointed to the specific amendments to FISA that Congress made shortly after September 11th in the USA PATRIOT Act, Pub. L. No. 107-56, §§ 204, 218, 115 Stat. 272, 281, 291 (2001), to argue that Congress did not contemplate electronic surveillance outside the parameters of FISA. *See Memorandum for Members of the House Permanent Select Comm. on Intel. from Jeffrey H. Smith, Re: Legal Authorities Regarding Warrantless Surveillance of U.S. Persons* 6-7 (Jan. 3, 2006). The USA PATRIOT Act amendments, however, do not justify giving the AUMF an unnaturally narrow reading. The USA PATRIOT Act amendments made important corrections in the general application of FISA; they were not intended to define the precise incidents of military force that would be available to the President in prosecuting the current armed conflict against al Qaeda and its allies. Many removed long-standing impediments to the effectiveness of FISA that had contributed to the

\* \* \*

The broad text of the AUMF, the authoritative interpretation that the Supreme Court gave it in *Hamdi*, and the circumstances in which it was passed demonstrate that the AUMF is a statute authorizing electronic surveillance under section 109 of FISA. When the President authorizes electronic surveillance against the enemy pursuant to the AUMF, he is therefore acting at the height of his authority under *Youngstown*, 343 U.S. at 637 (Jackson, J., concurring).

**D. THE CANON OF CONSTITUTIONAL AVOIDANCE REQUIRES RESOLVING IN FAVOR OF THE PRESIDENT'S AUTHORITY ANY AMBIGUITY ABOUT WHETHER FISA FORBIDS THE NSA ACTIVITIES**

As explained above, the AUMF fully authorizes the NSA activities. Because FISA contemplates the possibility that subsequent statutes could authorize electronic surveillance without requiring FISA's standard procedures, the NSA activities are also consistent with FISA and related provisions in title 18. Nevertheless, some might argue that sections 109 and 111 of FISA, along with section 2511(2)(f)'s "exclusivity" provision and section 2511(2)(e)'s liability exception for officers engaged in FISA-authorized surveillance, are best read to suggest that FISA requires that subsequent authorizing legislation specifically amend FISA in order to free the Executive from FISA's enumerated procedures. As detailed above, this is not the better reading of FISA. But even if these provisions were ambiguous, any doubt as to whether the AUMF and FISA should be understood to allow the President to make tactical military decisions to authorize surveillance outside the parameters of FISA must be resolved to avoid the serious constitutional questions that a contrary interpretation would raise.

It is well established that the first task of any interpreter faced with a statute that may present an unconstitutional infringement on the powers of the President is to determine whether the statute may be construed to avoid the constitutional difficulty. "[I]f an otherwise acceptable

---

maintenance of an unnecessary "wall" between foreign intelligence gathering and criminal law enforcement; others were technical clarifications. See *In re Sealed Case*, 310 F.3d 717, 725-30 (Foreign Int. Surv. Ct. Rev. 2002). The "wall" had been identified as a significant problem hampering the Government's efficient use of foreign intelligence information well before the September 11th attacks and in contexts unrelated to terrorism. See, e.g., *Final Report of the Attorney General's Review Team on the Handling of the Los Alamos National Laboratory Investigation* 710, 729, 732 (May 2000); General Accounting Office, *FBI Intelligence Investigations: Coordination Within Justice on Counterintelligence Criminal Matters Is Limited* (GAO-01-780) 3, 31 (July 2001). Finally, it is worth noting that Justice Souter made a similar argument in *Hamdi* that the USA PATRIOT Act all but compelled a narrow reading of the AUMF. See 542 U.S. at 551 ("It is very difficult to believe that the same Congress that carefully circumscribed Executive power over alien terrorists on home soil [in the USA PATRIOT Act] would not have meant to require the Government to justify clearly its detention of an American citizen held on home soil incommunicado."). Only Justice Ginsburg joined this opinion, and the position was rejected by a majority of Justices.

Nor do later amendments to FISA undermine the conclusion that the AUMF authorizes electronic surveillance outside the procedures of FISA. Three months after the enactment of the AUMF, Congress enacted certain "technical amendments" to FISA which, *inter alia*, extended the time during which the Attorney General may issue an emergency authorization of electronic surveillance from 24 to 72 hours. See Intelligence Authorization Act for Fiscal Year 2002, Pub. L. No. 107-108, § 314, 115 Stat. 1394, 1402 (2001). These modifications to FISA do not in any way undermine Congress's previous authorization in the AUMF for the President to engage in electronic surveillance outside the parameters of FISA in the specific context of the armed conflict with al Qaeda.

construction of a statute would raise serious constitutional problems, and where an alternative interpretation of the statute is ‘fairly possible,’ we are obligated to construe the statute to avoid such problems.” *INS v. St. Cyr*, 533 U.S. 289, 299-300 (2001) (citations omitted); *Ashwander v. TVA*, 297 U.S. 288, 345-48 (1936) (Brandeis, J., concurring). Moreover, the canon of constitutional avoidance has particular importance in the realm of national security, where the President’s constitutional authority is at its highest. See *Department of the Navy v. Egan*, 484 U.S. 518, 527, 530 (1988); William N. Eskridge, Jr., *Dynamic Statutory Interpretation* 325 (1994) (describing “[s]uper-strong rule against congressional interference with the President’s authority over foreign affairs and national security”). Thus, courts and the Executive Branch typically construe a general statute, even one that is written in unqualified terms, to be implicitly limited so as not to infringe on the President’s Commander in Chief powers.

Reading FISA to prohibit the NSA activities would raise two serious constitutional questions, both of which must be avoided if possible: (1) whether the signals intelligence collection the President determined was necessary to undertake is such a core exercise of Commander in Chief control over the Armed Forces during armed conflict that Congress cannot interfere with it at all and (2) whether the particular restrictions imposed by FISA are such that their application would impermissibly impede the President’s exercise of his constitutionally assigned duties as Commander in Chief. Constitutional avoidance principles require interpreting FISA, at least in the context of the military conflict authorized by the AUMF, to avoid these questions, if “fairly possible.” Even if Congress intended FISA to use the full extent of its constitutional authority to “occupy the field” of “electronic surveillance,” as FISA used that term, during peacetime, the legislative history indicates that Congress had not reached a definitive conclusion about its regulation during wartime. See H.R. Conf. Rep. No. 95-1720, at 34, *reprinted in* 1978 U.S.C.C.A.N. at 4063 (noting that the purpose of the fifteen-day period following a declaration of war in section 111 of FISA was to “allow time for consideration of any amendment to this act that may be appropriate during a wartime emergency”). Therefore, it is not clear that Congress, in fact, intended to test the limits of its constitutional authority in the context of wartime electronic surveillance.

Whether Congress may interfere with the President’s constitutional authority to collect foreign intelligence information through interception of communications reasonably believed to be linked to the enemy poses a difficult constitutional question. As explained in Part I, it had long been accepted at the time of FISA’s enactment that the President has inherent constitutional authority to conduct warrantless electronic surveillance for foreign intelligence purposes. Congress recognized at the time that the enactment of a statute purporting to eliminate the President’s ability, even during peacetime, to conduct warrantless electronic surveillance to collect foreign intelligence was near or perhaps beyond the limit of Congress’s Article I powers. The NSA activities, however, involve signals intelligence performed in the midst of a congressionally authorized armed conflict undertaken to prevent further hostile attacks on the United States. The NSA activities lie at the very core of the Commander in Chief power, especially in light of the AUMF’s explicit authorization for the President to take *all* necessary and appropriate military action to stop al Qaeda from striking again. The constitutional principles at stake here thus involve not merely the President’s well-established inherent

authority to conduct warrantless surveillance for foreign intelligence purposes during peacetime, but also the powers and duties expressly conferred on him as Commander in Chief by Article II.

Even outside the context of wartime surveillance of the enemy, the source and scope of Congress's power to restrict the President's inherent authority to conduct foreign intelligence surveillance is unclear. As explained above, the President's role as sole organ for the Nation in foreign affairs has long been recognized as carrying with it preeminent authority in the field of national security and foreign intelligence. The source of this authority traces to the Vesting Clause of Article II, which states that "[t]he executive Power shall be vested in a President of the United States of America." U.S. Const. art. II, § 1. The Vesting Clause "has long been held to confer on the President plenary authority to represent the United States and to pursue its interests outside the borders of the country, subject only to limits specifically set forth in the Constitution itself and to such statutory limitations as the Constitution permits Congress to impose by exercising one of its enumerated powers." *The President's Compliance with the "Timely Notification" Requirement of Section 501(b) of the National Security Act*, 10 Op. O.L.C. 159, 160-61 (1986) ("*Timely Notification Requirement Op.*").

Moreover, it is clear that some presidential authorities in this context are beyond Congress's ability to regulate. For example, as the Supreme Court explained in *Curtiss-Wright*, the President "*makes* treaties with the advice and consent of the Senate; but he alone negotiates. Into the field of negotiation the Senate cannot intrude; and Congress itself is powerless to invade it." 299 U.S. at 319. Similarly, President Washington established early in the history of the Republic the Executive's absolute authority to maintain the secrecy of negotiations with foreign powers, even against congressional efforts to secure information. *See id.* at 320-21. Recognizing presidential authority in this field, the Executive Branch has taken the position that "congressional legislation authorizing extraterritorial diplomatic and intelligence activities is superfluous, and . . . statutes infringing the President's inherent Article II authority would be unconstitutional." *Timely Notification Requirement Op.*, 10 Op. O.L.C. at 164.

There are certainly constitutional limits on Congress's ability to interfere with the President's power to conduct foreign intelligence searches, consistent with the Constitution, within the United States. As explained above, intelligence gathering is at the heart of executive functions. Since the time of the Founding it has been recognized that matters requiring secrecy—and intelligence in particular—are quintessentially executive functions. *See, e.g., The Federalist No. 64*, at 435 (John Jay) (Jacob E. Cooke ed. 1961) ("The convention have done well therefore in so disposing of the power of making treaties, that although the president must in forming them act by the advice and consent of the senate, yet he will be able to manage the business of intelligence in such manner as prudence may suggest."); *see also Timely Notification Requirement Op.*, 10 Op. O.L.C. at 165; *cf. New York Times Co. v. United States*, 403 U.S. 713, 729-30 (1971) (Stewart, J., concurring) ("[I]t is the constitutional duty of the Executive—as a matter of sovereign prerogative and not as a matter of law as the courts know law—through the promulgation and enforcement of executive regulations, to protect the confidentiality necessary to carry out its responsibilities in the field of international relations and national defense.").

Because Congress has rarely attempted to intrude in this area and because many of these questions are not susceptible to judicial review, there are few guideposts for determining exactly where the line defining the President's sphere of exclusive authority lies. Typically, if a statute is in danger of encroaching upon exclusive powers of the President, the courts apply the constitutional avoidance canon, if a construction avoiding the constitutional issue is "fairly possible." See, e.g., *Egan*, 484 U.S. at 527, 530. The only court that squarely has addressed the relative powers of Congress and the President in this field suggested that the balance tips decidedly in the President's favor. The Foreign Intelligence Surveillance Court of Review recently noted that all courts to have addressed the issue of the President's inherent authority have "held that the President did have inherent authority to conduct warrantless searches to obtain foreign intelligence information." *In re Sealed Case*, 310 F.3d 717, 742 (Foreign Intel. Surv. Ct. of Rev. 2002). On the basis of that unbroken line of precedent, the court "[took] for granted that the President does have that authority," and concluded that, "assuming that is so, FISA could not encroach on the President's constitutional power." *Id.*<sup>14</sup> Although the court did not provide extensive analysis, it is the only judicial statement on point, and it comes from the specialized appellate court created expressly to deal with foreign intelligence issues under FISA.

But the NSA activities are not simply exercises of the President's general foreign affairs powers. Rather, they are primarily an exercise of the President's authority as Commander in Chief during an armed conflict that Congress expressly has authorized the President to pursue. The NSA activities, moreover, have been undertaken specifically to prevent a renewed attack at the hands of an enemy that has already inflicted the single deadliest foreign attack in the Nation's history. The core of the Commander in Chief power is the authority to direct the Armed Forces in conducting a military campaign. Thus, the Supreme Court has made clear that the "President alone" is "constitutionally invested with the entire charge of hostile operations." *Hamilton v. Dillin*, 88 U.S. (21 Wall.) 73, 87 (1874); *The Federalist* No. 74, at 500 (Alexander Hamilton). "As commander-in-chief, [the President] is authorized to direct the movements of the naval and military forces placed by law at his command, and to employ them in the manner he may deem most effectual to harass and conquer and subdue the enemy." *Fleming v. Page*, 50 U.S. (9 How.) 603, 615 (1850). As Chief Justice Chase explained in 1866, although Congress has authority to legislate to support the prosecution of a war, Congress may not "*interfere[] with the command of the forces and the conduct of campaigns*. That power and duty belong to the President as commander-in-chief." *Ex parte Milligan*, 71 U.S. (4 Wall.) 2, 139 (1866) (Chase, C.J., concurring in judgment) (emphasis added).

The Executive Branch uniformly has construed the Commander in Chief and foreign affairs powers to grant the President authority that is beyond the ability of Congress to regulate. In 1860, Attorney General Black concluded that an act of Congress, if intended to constrain the President's discretion in assigning duties to an officer in the army, would be unconstitutional:

As commander-in-chief of the army it is your right to decide according to your

---

<sup>14</sup> In the past, other courts have declined to express a view on that issue one way or the other. See, e.g., *Butenko*, 494 F.2d at 601 ("We do not intimate, at this time, any view whatsoever as the proper resolution of the possible clash of the constitutional powers of the President and Congress.").

own judgment what officer shall perform any particular duty, and as the supreme executive magistrate you have the power of appointment. Congress could not, if it would, take away from the President, or in anywise diminish the authority conferred upon him by the Constitution.

*Memorial of Captain Meigs*, 9 Op. Att’y Gen. 462, 468 (1860). Attorney General Black went on to explain that, in his view, the statute involved there could probably be read as simply providing “a recommendation” that the President could decline to follow at his discretion. *Id.* at 469-70.<sup>15</sup>

Supreme Court precedent does not support claims of congressional authority over core military decisions during armed conflicts. In particular, the two decisions of the Supreme Court that address a conflict between asserted wartime powers of the Commander in Chief and congressional legislation and that resolve the conflict in favor of Congress—*Little v. Barreme*, 6 U.S. (2 Cranch) 170 (1804), and *Youngstown Sheet & Tube Co. v. Sawyer*, 343 U.S. 579 (1952)—are both distinguishable from the situation presented by the NSA activities in the conflict with al Qaeda. Neither supports the constitutionality of the restrictions in FISA as applied here.

*Barreme* involved a suit brought to recover a ship seized by an officer of the U.S. Navy on the high seas during the so-called “Quasi War” with France in 1799. The seizure had been based upon the officer’s orders implementing an act of Congress suspending commerce between the United States and France and authorizing the seizure of American ships bound to a French port. The ship in question was suspected of sailing from a French port. The Supreme Court held that the orders given by the President could not authorize a seizure beyond the terms of the

---

<sup>15</sup> Executive practice recognizes, consistent with the Constitution, some congressional control over the Executive’s decisions concerning the Armed Forces. *See, e.g.*, U.S. Const. art. I, § 8, cl. 12 (granting Congress power “to raise and support Armies”). But such examples have not involved congressional attempts to regulate the actual conduct of a military campaign, and there is no comparable textual support for such interference. For example, just before World War II, Attorney General Robert Jackson concluded that the Neutrality Act prohibited President Roosevelt from selling certain armed naval vessels and sending them to Great Britain. *See Acquisition of Naval and Air Bases in Exchange for Over-Age Destroyers*, 39 Op. Att’y Gen. 484, 496 (1940). Jackson’s apparent conclusion that Congress could control the President’s ability to transfer war material does not imply acceptance of direct congressional regulation of the Commander in Chief’s control of the means and methods of engaging the enemy in conflict. Similarly, in *Youngstown Sheet & Tube Co. v. Sawyer*, the Truman Administration readily conceded that, if Congress had prohibited the seizure of steel mills by statute, Congress’s action would have been controlling. *See* Brief for Petitioner at 150, *Youngstown*, 343 U.S. 579 (1952) (Nos. 744 and 745). This concession implies nothing concerning congressional control over the methods of engaging the enemy.

Likewise, the fact that the Executive Branch has, at times, sought congressional ratification after taking unilateral action in a wartime emergency does not reflect a concession that the Executive lacks authority in this area. A decision to seek congressional support can be prompted by many motivations, including a desire for political support. In modern times, several administrations have sought congressional authorization for the use of military force while preserving the ability to assert the unconstitutionality of the War Powers Resolution. *See, e.g.*, *Statement on Signing the Resolution Authorizing the Use of Military Force Against Iraq*, 1 Pub. Papers of George Bush 40 (1991) (“[M]y request for congressional support did not . . . constitute any change in the long-standing positions of the executive branch on either the President’s constitutional authority to use the Armed Forces to defend vital U.S. interests or the constitutionality of the War Powers Resolution.”). Moreover, many actions for which congressional support has been sought—such as President Lincoln’s action in raising an Army in 1861—quite likely fall primarily under Congress’s core Article I powers.

statute and therefore that the seizure of the ship not in fact bound to a French port was unlawful. *See* 6 U.S. at 177-78. Although some commentators have broadly characterized *Barreme* as standing for the proposition that Congress may restrict by statute the means by which the President can direct the Nation's Armed Forces to carry on a war, the Court's holding was limited in at least two significant ways. First, the operative section of the statute in question applied only to *American* merchant ships. *See id.* at 170 (quoting Act of February 9, 1799). Thus, the Court simply had no occasion to rule on whether, even in the limited and peculiar circumstances of the Quasi War, Congress could have placed some restriction on the orders the Commander in Chief could issue concerning direct engagements with enemy forces. Second, it is significant that the statute in *Barreme* was cast expressly, not as a limitation on the conduct of warfare by the President, but rather as regulation of a subject within the core of Congress's enumerated powers under Article I—the regulation of foreign commerce. *See* U.S. Const., art. I, § 8, cl. 3. The basis of Congress's authority to act was therefore clearer in *Barreme* than it is here.

*Youngstown* involved an effort by the President—in the face of a threatened work stoppage—to seize and to run steel mills. Congress had expressly considered the possibility of giving the President power to effect such a seizure during national emergencies. It rejected that option, however, instead providing different mechanisms for resolving labor disputes and mechanisms for seizing industries to ensure production vital to national defense.

For the Court, the connection between the seizure and the core Commander in Chief function of commanding the Armed Forces was too attenuated. The Court pointed out that the case did not involve authority over “day-to-day fighting in a theater of war.” *Id.* at 587. Instead, it involved a dramatic extension of the President's authority over military operations to exercise control over an industry that was vital for producing equipment needed overseas. Justice Jackson's concurring opinion also reveals a concern for what might be termed foreign-to-domestic presidential bootstrapping. The United States became involved in the Korean conflict through President Truman's unilateral decision to commit troops to the defense of South Korea. The President then claimed authority, based upon this foreign conflict, to extend presidential control into vast sectors of the domestic economy. Justice Jackson expressed “alarm[]” at a theory under which “a President whose conduct of foreign affairs is so largely uncontrolled, and often even is unknown, can vastly enlarge his mastery over the internal affairs of the country by his own commitment of the Nation's armed forces to some foreign venture.” *Id.* at 642.

Moreover, President Truman's action extended the President's authority into a field that the Constitution predominantly assigns to Congress. *See id.* at 588 (discussing Congress's commerce power and noting that “[t]he Constitution does not subject this lawmaking power of Congress to presidential or military supervision or control”); *see also id.* at 643 (Jackson, J., concurring) (explaining that Congress is given express authority to “raise and support Armies” and “to provide and maintain a Navy”) (quoting U.S. Const. art. I, § 8, cls. 12, 13). Thus, *Youngstown* involved an assertion of executive power that not only stretched far beyond the

President's core Commander in Chief functions, but that did so by intruding into areas where Congress had been given an express, and apparently dominant, role by the Constitution.<sup>16</sup>

The present situation differs dramatically. The exercise of executive authority involved in the NSA activities is not several steps removed from the actual conduct of a military campaign. As explained above, it is an essential part of the military campaign. Unlike the activities at issue in *Youngstown*, the NSA activities are directed at the enemy, and not at domestic activity that might incidentally aid the war effort. An assertion of executive authority here does not involve extending presidential power into areas reserved for Congress. Moreover, the theme that appeared most strongly in Justice Jackson's concurrence in *Youngstown*—the fear of presidential bootstrapping—does not apply in this context. Whereas President Truman had used his inherent constitutional authority to commit U.S. troops, here Congress expressly provided the President sweeping authority to use “all necessary and appropriate force” to protect the Nation from further attack. AUMF § 2(a). There is thus no bootstrapping concern.

Finally, *Youngstown* cannot be read to suggest that the President's authority for engaging the enemy is less extensive inside the United States than abroad. To the contrary, the extent of the President's Commander in Chief authority necessarily depends on where the enemy is found and where the battle is waged. In World War II, for example, the Supreme Court recognized that the President's authority as Commander in Chief, as supplemented by Congress, included the power to capture and try agents of the enemy in the United States, even if they never had “entered the theatre or zone of active military operations.” *Quirin*, 317 U.S. at 38.<sup>17</sup> In the present conflict, unlike in the Korean War, the battlefield was brought to the United States in the most literal way, and the United States continues to face a threat of further attacks on its soil. In short, therefore, *Youngstown* does not support the view that Congress may constitutionally prohibit the President from authorizing the NSA activities.

The second serious constitutional question is whether the particular restrictions imposed by FISA would impermissibly hamper the President's exercise of his constitutionally assigned duties as Commander in Chief. The President has determined that the speed and agility required to carry out the NSA activities successfully could not have been achieved under FISA.<sup>18</sup> Because the President also has determined that the NSA activities are necessary to the defense of

---

<sup>16</sup> *Youngstown* does demonstrate that the mere fact that Executive action might be placed in Justice Jackson's category III does not obviate the need for further analysis. Justice Jackson's framework therefore recognizes that Congress might impermissibly interfere with the President's authority as Commander in Chief or to conduct the Nation's foreign affairs.

<sup>17</sup> It had been recognized long before *Youngstown* that, in a large-scale conflict, the area of operations could readily extend to the continental United States, even when there are no major engagements of armed forces here. Thus, in the context of the trial of a German officer for spying in World War I, it was recognized that “[w]ith the progress made in obtaining ways and means for devastation and destruction, the territory of the United States was certainly within the field of active operations” during the war, particularly in the port of New York, and that a spy in the United States might easily have aided the “hostile operation” of U-boats off the coast. *United States ex rel. Wessels v. McDonald*, 265 F. 754, 764 (E.D.N.Y. 1920).

<sup>18</sup> In order to avoid further compromising vital national security activities, a full explanation of the basis for the President's determination cannot be given in an unclassified document.

the United States from a subsequent terrorist attack in the armed conflict with al Qaeda, FISA would impermissibly interfere with the President's most solemn constitutional obligation—to defend the United States against foreign attack.

Indeed, if an interpretation of FISA that allows the President to conduct the NSA activities were not “fairly possible,” FISA would be unconstitutional as applied in the context of this congressionally authorized armed conflict. In that event, FISA would purport to *prohibit* the President from undertaking actions necessary to fulfill his constitutional obligation to protect the Nation from foreign attack in the context of a congressionally authorized armed conflict with an enemy that has already staged the most deadly foreign attack in our Nation's history. A statute may not “*impede* the President's ability to perform his constitutional duty,” *Morrison v. Olson*, 487 U.S. 654, 691 (1988) (emphasis added); *see also id.* at 696-97, particularly not the President's most solemn constitutional obligation—the defense of the Nation. *See also In re Sealed Case*, 310 F.3d at 742 (explaining that “FISA could not encroach on the President's constitutional power”).

Application of the avoidance canon would be especially appropriate here for several reasons beyond the acute constitutional crises that would otherwise result. First, as noted, Congress did not intend FISA to be the final word on electronic surveillance conducted during armed conflicts. Instead, Congress expected that it would revisit the subject in subsequent legislation. Whatever intent can be gleaned from FISA's text and legislative history to set forth a comprehensive scheme for regulating electronic surveillance during peacetime, that same intent simply does not extend to armed conflicts and declared wars.<sup>19</sup> Second, FISA was enacted during the Cold War, not during active hostilities with an adversary whose mode of operation is to blend in with the civilian population until it is ready to strike. These changed circumstances have seriously altered the constitutional calculus, one that FISA's enactors had already recognized might suggest that the statute was unconstitutional. Third, certain technological changes have rendered FISA still more problematic. As discussed above, when FISA was enacted in 1978, Congress expressly declined to regulate through FISA certain signals intelligence activities conducted by the NSA. *See supra*, at pp. 18-19 & n.6.<sup>20</sup> These same factors weigh heavily in favor of concluding that FISA would be unconstitutional as applied to the current conflict if the canon of constitutional avoidance could not be used to head off a collision between the Branches.

---

<sup>19</sup> FISA exempts the President from its procedures for fifteen days following a congressional declaration of war. *See* 50 U.S.C. § 1811. If an adversary succeeded in a decapitation strike, preventing Congress from declaring war or passing subsequent authorizing legislation, it seems clear that FISA could not constitutionally continue to apply in such circumstances.

<sup>20</sup> Since FISA's enactment in 1978, the means of transmitting communications has undergone extensive transformation. In particular, many communications that would have been carried by wire are now transmitted through the air, and many communications that would have been carried by radio signals (including by satellite transmissions) are now transmitted by fiber optic cables. It is such technological advancements that have broadened FISA's reach, not any particularized congressional judgment that the NSA's traditional activities in intercepting such international communications should be subject to FISA's procedures. A full explanation of these technological changes would require a discussion of classified information.

\* \* \*

As explained above, FISA is best interpreted to allow a statute such as the AUMF to authorize electronic surveillance outside FISA's enumerated procedures. The strongest counterarguments to this conclusion are that various provisions in FISA and title 18, including section 111 of FISA and section 2511(2)(f) of title 18, together require that subsequent legislation must reference or amend FISA in order to authorize electronic surveillance outside FISA's procedures and that interpreting the AUMF as a statute authorizing electronic surveillance outside FISA procedures amounts to a disfavored repeal by implication. At the very least, however, interpreting FISA to allow a subsequent statute such as the AUMF to authorize electronic surveillance without following FISA's express procedures is "fairly possible," and that is all that is required for purposes of invoking constitutional avoidance. In the competition of competing canons, particularly in the context of an ongoing armed conflict, the constitutional avoidance canon carries much greater interpretative force.<sup>21</sup>

#### IV. THE NSA ACTIVITIES ARE CONSISTENT WITH THE FOURTH AMENDMENT

The Fourth Amendment prohibits "unreasonable searches and seizures" and directs that "no Warrants shall issue, but upon probable cause, supported by Oath or affirmation, and

<sup>21</sup> If the text of FISA were clear that nothing other than an amendment to FISA could authorize additional electronic surveillance, the AUMF would impliedly repeal as much of FISA as would prevent the President from using "all necessary and appropriate force" in order to prevent al Qaeda and its allies from launching another terrorist attack against the United States. To be sure, repeals by implication are disfavored and are generally not found whenever two statutes are "capable of co-existence." *Ruckelshaus v. Monsanto Co.*, 467 U.S. 986, 1018 (1984). Under this standard, an implied repeal may be found where one statute would "unduly interfere with" the operation of another. *Radzanower v. Touche Ross & Co.*, 426 U.S. 148, 156 (1976). The President's determination that electronic surveillance of al Qaeda outside the confines of FISA was "necessary and appropriate" would create a clear conflict between the AUMF and FISA. FISA's restrictions on the use of electronic surveillance would preclude the President from doing what the AUMF specifically authorized him to do: use all "necessary and appropriate force" to prevent al Qaeda from carrying out future attacks against the United States. The ordinary restrictions in FISA cannot continue to apply if the AUMF is to have its full effect; those constraints would "unduly interfere" with the operation of the AUMF.

Contrary to the recent suggestion made by several law professors and former government officials, the ordinary presumption against implied repeals is overcome here. *Cf.* Letter to the Hon. Bill Frist, Majority Leader, U.S. Senate, from Professor Curtis A. Bradley et al. at 4 (Jan. 9, 2006). First, like other canons of statutory construction, the canon against implied repeals is simply a presumption that may be rebutted by other factors, including conflicting canons. *Connecticut National Bank v. Germain*, 503 U.S. 249, 253 (1992); *see also Chickasaw Nation v. United States*, 534 U.S. 84, 94 (2001); *Circuit City Stores, Inc. v. Adams*, 532 U.S. 105, 115 (2001). Indeed, the Supreme Court has declined to apply the ordinary presumption against implied repeals where other canons apply and suggest the opposite result. *See Montana v. Blackfeet Tribe of Indians*, 471 U.S. 759, 765-66 (1985). Moreover, *Blackfeet* suggests that where the presumption against implied repeals would conflict with other, more compelling interpretive imperatives, it simply does not apply at all. *See* 471 U.S. at 766. Here, in light of the constitutional avoidance canon, which imposes the overriding imperative to use the tools of statutory interpretation to avoid constitutional conflicts, the implied repeal canon either would not apply at all or would apply with significantly reduced force. Second, the AUMF was enacted during an acute national emergency, where the type of deliberation and detail normally required for application of the canon against implied repeals was neither practical nor warranted. As discussed above, in these circumstances, Congress cannot be expected to work through every potential implication of the U.S. Code and to define with particularity each of the traditional incidents of the use of force available to the President.

particularly describing the place to be searched, and the persons or things to be seized.” U.S. Const. amend. IV. The touchstone for review of government action under the Fourth Amendment is whether the search is “reasonable.” *See, e.g., Vernonia Sch. Dist. v. Acton*, 515 U.S. 646, 653 (1995).

As noted above, *see* Part I, all of the federal courts of appeals to have addressed the issue have affirmed the President’s inherent constitutional authority to collect foreign intelligence without a warrant. *See In re Sealed Case*, 310 F.3d at 742. Properly understood, foreign intelligence collection in general, and the NSA activities in particular, fit within the “special needs” exception to the warrant requirement of the Fourth Amendment. Accordingly, the mere fact that no warrant is secured prior to the surveillance at issue in the NSA activities does not suffice to render the activities unreasonable. Instead, reasonableness in this context must be assessed under a general balancing approach, “by assessing, on the one hand, the degree to which it intrudes upon an individual’s privacy and, on the other, the degree to which it is needed for the promotion of legitimate governmental interests.” *United States v. Knights*, 534 U.S. 112, 118-19 (2001) (quoting *Wyoming v. Houghton*, 526 U.S. 295, 300 (1999)). The NSA activities are reasonable because the Government’s interest, defending the Nation from another foreign attack in time of armed conflict, outweighs the individual privacy interests at stake, and because they seek to intercept only international communications where one party is linked to al Qaeda or an affiliated terrorist organization.

**A. THE WARRANT REQUIREMENT OF THE FOURTH AMENDMENT DOES NOT APPLY TO THE NSA ACTIVITIES**

In “the criminal context,” the Fourth Amendment reasonableness requirement “usually requires a showing of probable cause” and a warrant. *Board of Educ. v. Earls*, 536 U.S. 822, 828 (2002). The requirement of a warrant supported by probable cause, however, is not universal. Rather, the Fourth Amendment’s “central requirement is one of reasonableness,” and the rules the Court has developed to implement that requirement “[s]ometimes . . . require warrants.” *Illinois v. McArthur*, 531 U.S. 326, 330 (2001); *see also, e.g., Earls*, 536 U.S. at 828 (noting that the probable cause standard “is peculiarly related to criminal investigations and may be unsuited to determining the reasonableness of administrative searches where the Government seeks to prevent the development of hazardous conditions”) (internal quotation marks omitted).

In particular, the Supreme Court repeatedly has made clear that in situations involving “special needs” that go beyond a routine interest in law enforcement, the warrant requirement is inapplicable. *See Vernonia*, 515 U.S. at 653 (there are circumstances “when special needs, beyond the normal need for law enforcement, make the warrant and probable-cause requirement impracticable”) (quoting *Griffin v. Wisconsin*, 483 U.S. 868, 873 (1987)); *see also McArthur*, 531 U.S. at 330 (“When faced with special law enforcement needs, diminished expectations of privacy, minimal intrusions, or the like, the Court has found that certain general, or individual, circumstances may render a warrantless search or seizure reasonable.”). It is difficult to encapsulate in a nutshell all of the different circumstances the Court has found to qualify as “special needs” justifying warrantless searches. But one application in which the Court has found the warrant requirement inapplicable is in circumstances in which the Government faces

an increased need to be able to react swiftly and flexibly, or when there are at stake interests in public safety beyond the interests in ordinary law enforcement. One important factor in establishing “special needs” is whether the Government is responding to an emergency that goes beyond the need for general crime control. *See In re Sealed Case*, 310 F.3d at 745-46.

Thus, the Court has permitted warrantless searches of property of students in public schools, *see New Jersey v. T.L.O.*, 469 U.S. 325, 340 (1985) (noting that warrant requirement would “unduly interfere with the maintenance of the swift and informal disciplinary procedures needed in the schools”), to screen athletes and students involved in extracurricular activities at public schools for drug use, *see Vernonia*, 515 U.S. at 654-55; *Earls*, 536 U.S. at 829-38, to conduct drug testing of railroad personnel involved in train accidents, *see Skinner v. Railway Labor Executives’ Ass’n*, 489 U.S. 602, 634 (1989), and to search probationers’ homes, *see Griffin*, 483 U.S. 868. Many special needs doctrine and related cases have upheld *suspicionless* searches or seizures. *See, e.g., Illinois v. Lidster*, 540 U.S. 419, 427 (2004) (implicitly relying on special needs doctrine to uphold use of automobile checkpoint to obtain information about recent hit-and-run accident); *Earls*, 536 U.S. at 829-38 (suspicionless drug testing of public school students involved in extracurricular activities); *Michigan Dep’t of State Police v. Sitz*, 496 U.S. 444, 449-55 (1990) (road block to check all motorists for signs of drunken driving); *United States v. Martinez-Fuerte*, 428 U.S. 543 (1976) (road block near the border to check vehicles for illegal immigrants); *cf. In re Sealed Case*, 310 F.3d at 745-46 (noting that suspicionless searches and seizures in one sense are a greater encroachment on privacy than electronic surveillance under FISA because they are not based on any particular suspicion, but “[o]n the other hand, wiretapping is a good deal more intrusive than an automobile stop accompanied by questioning”). To fall within the “special needs” exception to the warrant requirement, the purpose of the search must be distinguishable from ordinary general crime control. *See, e.g., Ferguson v. Charleston*, 532 U.S. 67 (2001); *City of Indianapolis v. Edmond*, 531 U.S. 32, 41 (2000).

Foreign intelligence collection, especially in the midst of an armed conflict in which the adversary has already launched catastrophic attacks within the United States, fits squarely within the area of “special needs, beyond the normal need for law enforcement” where the Fourth Amendment’s touchstone of reasonableness can be satisfied without resort to a warrant. *Vernonia*, 515 U.S. at 653. The Executive Branch has long maintained that collecting foreign intelligence is far removed from the ordinary criminal law enforcement action to which the warrant requirement is particularly suited. *See, e.g., Amending the Foreign Intelligence Surveillance Act: Hearings Before the House Permanent Select Comm. on Intelligence*, 103d Cong. 2d Sess. 62, 63 (1994) (statement of Deputy Attorney General Jamie S. Gorelick) (“[I]t is important to understand that the rules and methodology for criminal searches are inconsistent with the collection of foreign intelligence and would unduly frustrate the President in carrying out his foreign intelligence responsibilities. . . . [W]e believe that the warrant clause of the Fourth Amendment is inapplicable to such [foreign intelligence] searches.”); *see also In re Sealed Case*, 310 F.3d 745. The object of foreign intelligence collection is securing information necessary to protect the national security from the hostile designs of foreign powers like al Qaeda and affiliated terrorist organizations, including the possibility of another foreign attack on the United States. In foreign intelligence investigations, moreover, the targets of surveillance

often are agents of foreign powers, including international terrorist groups, who may be specially trained in concealing their activities and whose activities may be particularly difficult to detect. The Executive requires a greater degree of flexibility in this field to respond with speed and absolute secrecy to the ever-changing array of foreign threats faced by the Nation.<sup>22</sup>

In particular, the NSA activities are undertaken to prevent further devastating attacks on our Nation, and they serve the highest government purpose through means other than traditional law enforcement.<sup>23</sup> The NSA activities are designed to enable the Government to act quickly and flexibly (and with secrecy) to find agents of al Qaeda and its affiliates—an international terrorist group which has already demonstrated a capability to infiltrate American communities without being detected—in time to disrupt future terrorist attacks against the United States. As explained by the Foreign Intelligence Surveillance Court of Review, the nature of the “emergency” posed by al Qaeda “takes the matter out of the realm of ordinary crime control.” *In re Sealed Case*, 310 F.3d at 746. Thus, under the “special needs” doctrine, no warrant is required by the Fourth Amendment for the NSA activities.

#### B. THE NSA ACTIVITIES ARE REASONABLE

As the Supreme Court has emphasized repeatedly, “[t]he touchstone of the Fourth Amendment is reasonableness, and the reasonableness of a search is determined by assessing, on the one hand, the degree to which it intrudes upon an individual’s privacy and, on the other, the degree to which it is needed for the promotion of legitimate governmental interests.” *Knights*, 534 U.S. at 118-19 (quotation marks omitted); *see also Earls*, 536 U.S. at 829. The Supreme Court has found a search reasonable when, under the totality of the circumstances, the importance of the governmental interests outweighs the nature and quality of the intrusion on the individual’s Fourth Amendment interests. *See Knights*, 534 U.S. at 118-22. Under the standard

---

<sup>22</sup> Even in the domestic context, the Supreme Court has recognized that there may be significant distinctions between wiretapping for ordinary law enforcement purposes and domestic national security surveillance. *See United States v. United States District Court*, 407 U.S. 297, 322 (1972) (“*Keith*”) (explaining that “the focus of domestic [security] surveillance may be less precise than that directed against more conventional types of crime” because often “the emphasis of domestic intelligence gathering is on the prevention of unlawful activity or the enhancement of the Government’s preparedness for some possible future crisis or emergency”); *see also United States v. Duggan*, 743 F.2d 59, 72 (2d Cir. 1984) (reading *Keith* to recognize that “the governmental interests presented in national security investigations differ substantially from those presented in traditional criminal investigations”). Although the Court in *Keith* held that the Fourth Amendment’s warrant requirement does apply to investigations of purely domestic threats to national security—such as domestic terrorism, it suggested that Congress consider establishing a lower standard for such warrants than that set forth in Title III. *See id.* at 322-23 (advising that “different standards” from those applied to traditional law enforcement “may be compatible with the Fourth Amendment if they are reasonable both in relation to the legitimate need of the Government for intelligence information and the protected rights of our citizens”). *Keith*’s emphasis on the need for flexibility applies with even greater force to surveillance directed at foreign threats to national security. *See* S. Rep. No. 95-701, at 16 (“Far more than in domestic security matters, foreign counterintelligence investigations are ‘long range’ and involve ‘the interrelation of various sources and types of information.’”) (quoting *Keith*, 407 U.S. at 322). And flexibility is particularly essential here, where the purpose of the NSA activities is to prevent another armed attack against the United States.

<sup>23</sup> This is not to say that traditional law enforcement has no role in protecting the Nation from attack. The NSA activities, however, are not directed at bringing criminals to justice but at detecting and preventing plots by a declared enemy of the United States to attack it again.

balancing of interests analysis used for gauging reasonableness, the NSA activities are consistent with the Fourth Amendment.

With respect to the individual privacy interests at stake, there can be no doubt that, as a general matter, interception of telephone communications implicates a significant privacy interest of the individual whose conversation is intercepted. The Supreme Court has made clear at least since *Katz v. United States*, 389 U.S. 347 (1967), that individuals have a substantial and constitutionally protected reasonable expectation of privacy that their telephone conversations will not be subject to governmental eavesdropping. Although the individual privacy interests at stake may be substantial, it is well recognized that a variety of governmental interests—including routine law enforcement and foreign-intelligence gathering—can overcome those interests.

On the other side of the scale here, the Government's interest in engaging in the NSA activities is the most compelling interest possible—securing the Nation from foreign attack in the midst of an armed conflict. One attack already has taken thousands of lives and placed the Nation in state of armed conflict. Defending the Nation from attack is perhaps the most important function of the federal Government—and one of the few express obligations of the federal Government enshrined in the Constitution. *See* U.S. Const. art. IV, § 4 (“The United States shall guarantee to every State in this Union a Republican Form of Government, *and shall protect each of them against Invasion . . .*”) (emphasis added); *The Prize Cases*, 67 U.S. (2 Black) 635, 668 (1863) (“If war be made by invasion of a foreign nation, the President is not only authorized but bound to resist force by force.”). As the Supreme Court has declared, “[i]t is ‘obvious and unarguable’ that no governmental interest is more compelling than the security of the Nation.” *Haig v. Agee*, 453 U.S. 280, 307 (1981).

The Government's overwhelming interest in detecting and thwarting further al Qaeda attacks is easily sufficient to make reasonable the intrusion into privacy involved in intercepting one-end foreign communications where there is “a reasonable basis to conclude that one party to the communication is a member of al Qaeda, affiliated with al Qaeda, or a member of an organization affiliated with al Qaeda.” Press Briefing by Attorney General Alberto Gonzales and General Michael Hayden, Principal Deputy Director for National Intelligence, *available at* <http://www.whitehouse.gov/news/releases/2005/12/20051219-1.html> (Dec. 19, 2005) (statement of Attorney General Gonzales); *cf. Edmond*, 531 U.S. at 44 (noting that “the Fourth Amendment would almost certainly permit an appropriately tailored roadblock set up to thwart an imminent terrorist attack” because “[t]he exigencies created by th[at] scenario[] are far removed” from ordinary law enforcement). The United States has already suffered one attack that killed thousands, disrupted the Nation's financial center for days, and successfully struck at the command and control center for the Nation's military. And the President has stated that the NSA activities are “critical” to our national security. Press Conference of President Bush (Dec. 19, 2005). To this day, finding al Qaeda sleeper agents in the United States remains one of the preeminent concerns of the war on terrorism. As the President has explained, “[t]he terrorists want to strike America again, and they hope to inflict even more damage than they did on September 11th.” *Id.*

Of course, because the magnitude of the Government's interest here depends in part upon the threat posed by al Qaeda, it might be possible for the weight that interest carries in the balance to change over time. It is thus significant for the reasonableness of the NSA activities that the President has established a system under which he authorizes the surveillance only for a limited period, typically for 45 days. This process of reauthorization ensures a periodic review to evaluate whether the threat from al Qaeda remains sufficiently strong that the Government's interest in protecting the Nation and its citizens from foreign attack continues to outweigh the individual privacy interests at stake.

Finally, as part of the balancing of interests to evaluate Fourth Amendment reasonableness, it is significant that the NSA activities are limited to intercepting international communications where there is a reasonable basis to conclude that one party to the communication is a member or agent of al Qaeda or an affiliated terrorist organization. This factor is relevant because the Supreme Court has indicated that in evaluating reasonableness, one should consider the "efficacy of [the] means for addressing the problem." *Vernonia*, 515 U.S. at 663; *see also Earls*, 536 U.S. at 834 ("Finally, this Court must consider the nature and immediacy of the government's concerns and the efficacy of the Policy in meeting them."). That consideration does not mean that reasonableness requires the "least intrusive" or most "narrowly tailored" means for obtaining information. To the contrary, the Supreme Court has repeatedly rejected such suggestions. *See, e.g., Earls*, 536 U.S. at 837 ("[T]his Court has repeatedly stated that reasonableness under the Fourth Amendment does not require employing the least intrusive means, because the logic of such elaborate less-restrictive-alternative arguments could raise insuperable barriers to the exercise of virtually all search-and-seizure powers.") (internal quotation marks omitted); *Vernonia*, 515 U.S. at 663 ("We have repeatedly refused to declare that only the 'least intrusive' search practicable can be reasonable under the Fourth Amendment."). Nevertheless, the Court has indicated that some consideration of the efficacy of the search being implemented—that is, some measure of fit between the search and the desired objective—is relevant to the reasonableness analysis. The NSA activities are targeted to intercept international communications of persons reasonably believed to be members or agents of al Qaeda or an affiliated terrorist organization, a limitation which further strongly supports the reasonableness of the searches.

In sum, the NSA activities are consistent with the Fourth Amendment because the warrant requirement does not apply in these circumstances, which involve both "special needs" beyond the need for ordinary law enforcement and the inherent authority of the President to conduct warrantless electronic surveillance to obtain foreign intelligence to protect our Nation from foreign armed attack. The touchstone of the Fourth Amendment is reasonableness, and the NSA activities are certainly reasonable, particularly taking into account the nature of the threat the Nation faces.

#### CONCLUSION

For the foregoing reasons, the President—in light of the broad authority to use military force in response to the attacks of September 11th and to prevent further catastrophic attack expressly conferred on the President by the Constitution and confirmed and supplemented by

Congress in the AUMF—has legal authority to authorize the NSA to conduct the signals intelligence activities he has described. Those activities are authorized by the Constitution and by statute, and they violate neither FISA nor the Fourth Amendment.

#### \*1 INTERESTS OF AMICI CURIAE

The Constitution Project is a bipartisan nonprofit organization that seeks to build consensus on and develop solutions to contemporary legal and constitutional issues through a combination of scholarship and public education. After September 11, 2001, the Project created its Liberty and Security Initiative, a bipartisan, blue-ribbon committee of prominent Americans, to address the importance of preserving civil liberties even as we work to enhance our Nation's security. The Initiative develops policy recommendations on such issues as the use of military commissions and governmental surveillance policies, which emphasize the need for all three branches of government to play a role in safeguarding constitutional rights. In December 2005, the Initiative released a statement criticizing the recently disclosed domestic surveillance program of the National Security Agency ("NSA"). In addition, the Project's Courts Initiative conducts public education on the importance of an independent judiciary and cautions against legislation or executive branch practices that would limit the substantive jurisdiction of courts. The Project's bipartisan blue-ribbon War Powers Initiative also released a report in June 2005 entitled "Deciding to Use Force Abroad: War Powers in a System of Checks and Balances," which makes recommendations regarding the respective war powers of all three branches of government.

\*2 The Center for National Security Studies is a nonpartisan civil liberties organization that was founded in 1974 to ensure that civil liberties are not eroded in the name of national security. The Center seeks solutions to national security problems that protect both the civil liberties of individuals and the legitimate national security interests of the government. For more than thirty years, the Center has worked to protect the Fourth Amendment rights of individuals to be free of unreasonable searches and seizures, especially when conducted in the name of national security. Over the years, the Center has filed briefs and lawsuits concerning the lawfulness of surveillance.

*Amici* have a direct interest in the substantive issues this case presents. *Amici* will not address the threshold questions of whether the plaintiffs in this case have standing or whether the “state secrets” privilege applies, except to state that *amici* believe this Court has both the authority and ability to address the substantive constitutional challenges plaintiffs present to the NSA’s warrantless surveillance activities. The parties have consented to the filing of this brief.

## INTRODUCTION AND SUMMARY OF ARGUMENT

This case involves a challenge to the recently revealed program of the NSA, first authorized by the President in the fall of 2001, to conduct systematic warrantless electronic surveillance of persons in the United States, in direct violation of the Foreign Intelligence Surveillance Act, 50 U.S.C. §§ 1801-1871 (“FISA”). Through FISA and its criminal law enforcement counterparts, Congress has established the “exclusive means by which electronic surveillance ... may be conducted” in the United States. 18 U.S.C. § 2511(2)(f) (emphasis added). Congress did so to ensure that civil liberties are protected when the government carries out the vital task of combating terrorists and other foreign enemies. To that end, FISA expressly prohibits the President, except in certain narrowly defined circumstances, from authorizing domestic electronic surveillance for foreign intelligence purposes unless the Attorney General applies for, and the Foreign Intelligence Surveillance Court (“FISC”) (which FISA established expressly for this purpose) approves, a warrant application. *See id.*; 50 U.S.C. §§ 1802, 1804, 1811. The Attorney General has made no such application and obtained no such approval for the NSA’s surveillance activities. Those activities are thus flatly unlawful.

The NSA’s asserted justifications for disregarding FISA lack merit. Congress has never authorized the President to engage in warrantless electronic surveillance in the United States. The Authorization for the Use of Military Force (“AUMF”) enacted by Congress in the wake of the attacks on September 11, 2001, *see Pub. L. No. 107-40, 115 Stat. 224 (2001)*, neither explicitly nor implicitly supersedes FISA’s warrant requirements. FISA itself conclusively refutes this contention by providing that the statutorily mandated warrant requirements are the “exclusive” means for conducting such electronic surveillance, 18 U.S.C. § 2511(2)(f), and by making clear that even a formal declaration of war would not authorize the President to abrogate the statute, 50 U.S.C. § 1811. Moreover, because the Fourth Amendment requires a warrant for such surveillance and FISA establishes a special court with both the competence and the ability to rule expeditiously, there is no basis for invoking any exception to the warrant requirement here.

By flouting the statutory directives of Congress as well as the Fourth Amendment, the President’s actions raise grave separation of powers concerns, for they “serve[ ] only to *condense* power into a single branch of government.” *Hamdi v. Rumsfeld*, 542 U.S. 507, 536 (2004) (plurality opinion) (emphasis in original). This effort is particularly dangerous because it comes at the expense of both Congress’s and the judiciary’s powers to defend the individual liberties of Americans. “[A] state of war is not a blank check for the President when it comes to the rights of the Nation’s citizens. Whatever power the United States Constitution envisions for the Executive in its exchanges with other nations or with enemy organizations in times of conflict, it most assuredly envisions a role for *all three branches* when individual liberties are at stake.” *Id.* (emphasis added; internal citations omitted).

The issue is not whether the President has the ability to protect the public from terrorists by secretly surveilling them and their agents--for that is exactly what FISA allows. Indeed, FISA was directed at precisely the individuals allegedly targeted under this program: international terrorists. *See* 50 U.S.C. § 1801(b)(2)(C) (international terrorists are “agents ... of a foreign power” whose communications are subject to FISA). It provides ample authority for the Executive to act swiftly and secretly to obtain information about those terrorists, even in wartime. *See, e.g.,* 50 U.S.C. § 1811 (limited exemption for declared war). Rather, the issue is whether the President may disregard an Act of Congress that

safeguards the civil liberties of Americans on American soil.

Congress plainly has the authority to protect the civil liberties of Americans by requiring that the Executive seek a warrant when engaging in electronic surveillance of persons in the United States. In *Youngstown Sheet & Tube Co. v. Sawyer*, 343 U.S. 579 (1952), the Supreme Court established that Congress can, even during time of war, regulate the “inherent power” of the President through duly enacted legislation. *Id.* at 584. That is precisely what FISA does. In authorizing warrantless electronic surveillance in direct violation of FISA, the President is acting not only with power that is at its “lowest ebb,” *see id.* at 637 (Jackson, J., concurring), he is acting in violation of his constitutional duty to enforce the law as enacted by Congress, *see id.* at 633 (“the power to execute the laws starts and ends with the laws Congress has enacted”), as well as the Fourth Amendment’s warrant requirement.

Thus, the district court should be affirmed.

## ARGUMENT

### I. WARRANTLESS ELECTRONIC SURVEILLANCE VIOLATES FISA.

#### A. FISA Is The “Exclusive” Means By Which The United States Government Can Engage In Electronic Surveillance In The United States For Foreign Intelligence Purposes.

The text of FISA could hardly be more clear. Section 201(b) of FISA amended Title III of the Omnibus Crime and Control and Safe Streets Act, 18 U.S.C. §§ 2510 *et seq.* (“Title III”), which generally prohibits electronic surveillance in the United States except pursuant to a warrant issued on probable cause to suspect criminal activity. *See* 18 U.S.C. §§ 2511(1), 2516. FISA amended Title III to explicitly except acquisition of international communications utilizing a means other than electronic surveillance. *See* Foreign Intelligence Surveillance Act of 1978, Pub. L. No. 95-511, § 201(b), 92 Stat. 1783 (“FISA”) (codified at 18 U.S.C. § 2511(2)(f)). The amendment further provides that, along \*7 with Title III and the Stored Communications Act (“SCA”),<sup>[FN1]</sup> the “Foreign Intelligence Surveillance Act of 1978 shall be the exclusive means by which electronic surveillance, as defined in section 101 of such Act, and the interception of domestic wire, oral and electronic communications may be conducted.” 18 U.S.C. § 2511(2)(f) (emphases added).

FN1. The SCA, codified in Chapter 121 of Title 18 of the U.S. Code, was part of the Electronic Communications Privacy Act of 1986, Pub. L. No. 99-508, 100 Stat. 1848.

The statute thus forbids, in the clearest possible terms, electronic surveillance of persons in the United States, except that the Government may engage in such surveillance for foreign intelligence purposes if a warrant is obtained under FISA. Further underscoring the clarity of this prohibition, FISA repealed 18 U.S.C. § 2511(3), which previously had provided that “nothing ... shall limit the constitutional power of the President ... to obtain foreign intelligence information.” Act of June 19, 1968, Pub. L. No. 90-351, § 2511, 82 Stat. 197, 214; *see also* FISA, Pub. L. No. 95-511, § 201(c). The Supreme Court previously read § 25 11(3) to “provide[] that the Act shall not be interpreted to limit or disturb such power as the President may have under the Constitution [to engage in electronic surveillance].” *United States v. United States District Court*, 407 U.S. 297, 303 (1972) (“*Keith*”).

\*8 FISA’s legislative history provides further confirmation that Congress’s dual purpose in enacting FISA was (1) to “provide a legislative authorization for ... electronic surveillance conducted within the United States for foreign intelligence purposes,” and (2) to “moot the debate over the existence or non-existence” of “any Presidential power to authorize warrantless surveillances in the United States.” H.R. Rep. No. 95-1283, pt. I, at 24 (1978); *see also* S. Rep. No. 95-604, pt. 1, at 6-7 (1997), as reprinted in 1978 U.S.C.C.A.N. 3904, 3908. Thus, it is hardly surprising that every court to have considered the question has held that “the Foreign Intelligence Surveillance Act is intended to be exclusive in its domain.” *United States v. Torres*, 751 F.2d 875, 881 (7th Cir. 1984); accord *United States v. Andonian*,

735 F. Supp. 1469, 1474 (C.D. Cal. 1990), aff'd, 29 F.3d 634 (9th Cir. 1994) (unpublished table decision) (emphasis added).

B. FISA Provides Flexible Tools For Obtaining Foreign Intelligence To Prevent And Combat Terrorism, Even In Wartime.

NSA asserts that the exigencies of combating terrorism and a state of war justify its disregard of FISA. That argument fails. FISA contemplates precisely such scenarios and provides the Executive with flexible tools to fight terrorism and conduct wartime actions effectively.

FISA expressly provides for “emergency situation[s]” where intelligence officials would not have time to seek a FISA warrant before engaging in certain electronic surveillance. *See* 50 U.S.C. § 1805(f)(1). It empowers the Attorney \*9 General to authorize such surveillance prior to requesting or obtaining a warrant from the FISC, as long as a request for such warrant was made within 72 hours of any such authorization. *See* 50 U.S.C. § 1805(f)(2). In fact, in response to the Administration's request after the September 11, 2001 attacks, Congress increased the time allotted the Attorney General for submitting a warrant application from 24 to 72 hours in order to provide greater flexibility in combating terrorists. *See* Intelligence Authorization Act of 2002, Pub. L. No. 107-108, § 314(a)(2)(B), 115 Stat. 1402 (2001). Similarly, FISA provides that the Attorney General may authorize warrantless electronic surveillance for up to 15 days following a declaration of war. *See* 50 U.S.C. § 1811. This provision “allow[s] time for consideration of any amendment to this act that may be appropriate during a wartime emergency.” H.R. Conf. Rep. No. 95-1720, at 34 (1978), as reprinted in 1978 U.S.C.C.A.N. 4048, 4063.

Although the AUMF likely did not trigger this provision because it was not a formal declaration of war, the Administration still had the opportunity to seek any necessary amendments to FISA. Indeed, not long after the President first authorized the NSA's surveillance, the Administration sought amendments to FISA in the USA PATRIOT Act, and Congress responded by substantially revising the statute in the wake of the September 11, 2001 attacks, *see* USA PATRIOT Act of 2001, Pub. L. No. 107-56, §§ 206-208, 214-218, 115 Stat. 272; and did so again \*10 in the Intelligence Authorization Act. The President could have made additional requests to Congress for amendments to FISA at any time in the last four years. The President simply chose to defy FISA instead.

II. CONGRESS DID NOT AUTHORIZE WARRANTLESS ELECTRONIC SURVEILLANCE BY THE PRESIDENT.

In the face of this exceptionally clear statute, the NSA contends that Congress authorized warrantless surveillance of persons in the United States when it enacted the AUMF. That contention is meritless.

The authorization in the AUMF provides, in full, [t]hat the President is authorized to use all necessary and appropriate force against those nations, organizations, or persons he determines planned, authorized, committed or aided the terrorists attacks that occurred on September 11, 2001, or harbored such organizations or persons, in order to prevent any future act of international terrorism against the United States by such nations, organizations or persons.

AUMF, Pub. L. No. 107-40, § 2.

This language contains no reference to FISA, much less an express repeal of FISA's warrant requirement. Nor is the AUMF an implied repeal or amendment. “The cardinal rule is that repeals by implication are not favored.” *Posadas v. National City Bank of N.Y.*, 296 U.S. 497, 503 (1936). An implied repeal will “only be found where provisions in two statutes are in ‘irreconcilable conflict,’ or where the latter Act covers the whole subject of the earlier one and ‘is clearly \*11 intended as a substitute.’ ” *Branch v. Smith*, 538 U.S. 254, 273 (2003) (emphasis added; citation omitted). Repeals by implication can be established only by “overwhelming evidence” of such an irreconcilable conflict. *J.E.M.*

*Ag Supply, Inc. v. Pioneer Hi-Bred Int'l Inc.*, 534 U.S. 124, 137 (2001).

FISA and the AUMF are not in conflict, much less irreconcilably so. FISA requires the President to obtain a warrant when engaging in domestic electronic surveillance. The AUMF simply does not address that issue. It cannot reasonably be suggested that Congress *clearly expressed* with its *silence* in the AUMF the intention to repeal FISA. To the contrary, Congress has made perfectly clear its intention that FISA be *amended* in the event a future Congress desired to alter the statute's restrictions. As Justice Frankfurter noted in *Youngstown*, “[i]t is one thing to draw an intention of Congress from general language and to say that Congress would have explicitly written what is inferred, where Congress has not addressed itself to a specific situation. It is quite impossible, however, when Congress did specifically address itself to a problem ... to find secreted in the interstices of legislation the very grant of power which Congress consciously withheld.” 343 U.S. at 609 (Frankfurter, J., concurring).

The Supreme Court's recent decision in *Hamdan v. Rumsfeld*, 126 S. Ct. 2749 (2006), powerfully reinforces this point. There, the Court considered the propriety of the military commission convened by President Bush to try Hamdan, \*12 an enemy combatant detained at Guantanamo Bay. *Id.* at 2759. Hamdan contended that the President's actions violated the Uniform Code of Military Justice (“UCMJ”), 10 U.S.C. § 801, which sets forth the governing principles for military courts and conditions the President's authority to use military commissions. *Id.* at 2786. In particular, Article 21 of the UCMJ requires that the President comply with the American common law of war as well as “with the ‘rules and precepts of the law of nations,’ ” including the Geneva Conventions. *Id.* (quoting *Ex Parte Quirin*, 3 17 U.S. 1, 28 (1947)).

Although the Government argued that the AUMF authorized the President to invoke military commissions as he deems appropriate, the *Hamdan* Court disagreed, holding that “the military commission convened to try Hamdan lacks the power to proceed because its structure and procedures violate both the UCMJ and the Geneva Conventions.” *Id.* at 2759. The Court found “nothing in the text or legislative history of the AUMF even hinting that Congress intended to expand or alter the authorization set forth in Article 21 of the UCMJ.” *Id.* at 2775. Whether or not the AUMF activated the President's war powers, it did not implicitly amend or repeal the UCMJ to authorize military commissions that would otherwise violate the UCMJ. *Id.* In the same way, nothing in the AUMF speaks to FISA. Accordingly, the AUMF does not authorize the President to engage in warrantless domestic electronic surveillance contrary to FISA.

\*13 *Hamdi v. Rumsfeld*, 542 U.S. 507 (2004), is not to the contrary. In *Hamdi*, the Supreme Court considered whether the Government could detain as an enemy combatant an American citizen who was captured in a “foreign combat zone” in light of 18 U.S.C. § 4001 (a), which provides that “no citizen shall be imprisoned or otherwise detained by the United States except pursuant to an Act of Congress.” *Hamdi*, 542 U.S. at 542. The Court concluded that the AUMF was one such “Act of Congress” because it authorized the detention of individuals who are “part of or supporting forces hostile to the United States or coalition partners in Afghanistan and who engaged in armed conflict against the United States there.” *Id.* at 516 (emphasis added; quotation marks omitted). But it did so based on the reasoning that “detention of individuals falling into the limited category we are considering ... is so fundamental and accepted an incident to war as to be an exercise of the ‘necessary and appropriate’ force Congress has authorized the President to use.” *Id.* at 518.

The Court was careful, however, to limit its ruling to “the narrow circumstances considered here,” *id.* at 519, namely, when an American citizen enemy combatant is detained in a “foreign battlefield,” *id.* at 522 n. 1, or a “foreign combat zone,” *id.* at 523 (emphasis in original). *Hamdi* contains no suggestion that Congress had authorized the Executive to engage in comparable activities on domestic soil where domestic law applies. To the contrary, the Court stressed that \*14 “a state of war is not a blank check for the President when it comes to the rights of the Nation's citizens.” *Id.* at 536.

Thus, there is no basis for concluding that the AUMF authorizes the NSA surveillance program at issue here.

### III. THE CONSTITUTION DOES NOT AUTHORIZE THE PRESIDENT TO DISREGARD FISA.

Similarly meritless is the NSA's contention that FISA would be unconstitutional if construed to limit the President's authority to order warrantless surveillance of persons in the United States. In fact, the opposite is true. To the extent the NSA's program conflicts with FISA, it is the program that violates the Constitution.

In the Declaration of Independence, the Founders announced their determination to break from a tyrant king who "ha[d] affected to render the Military independent of and superior to the Civil power." The Declaration of Independence para. 14 (U.S. 1776). Our Constitution was established to end-- not enshrine--this kind of executive overreaching. See *Youngtown*, 343 U.S. at 641 (Jackson, J., concurring) ("The example of such unlimited executive power that must have most impressed the forefathers was the prerogative exercised by George III, and the description of its evils in the Declaration of Independence leads me to doubt that they were creating their new Executive in his image."). Indeed, by separating "governmental powers into three coordinate [d] Branches," the Framers \*15 designed a framework they considered "essential to the preservation of liberty." *Mistretta v. United States*, 488 U.S. 361, 380 (1989). The NSA surveillance program upends the balance among the three branches of government, and thereby threatens bedrock liberties the Constitution and the Bill of Rights are designed to protect.

That the President has unilaterally declared his actions to be in aid of the national defense is no excuse. In *Youngtown*, the Supreme Court explicitly rejected the notion that the President can rely on a national emergency or his position as Commander-in-Chief to ignore reasonable congressional restrictions on his exercise of power in the United States. The question in that case was "whether the President was acting within his constitutional power" when he directed the seizure of most of the Nation's steel mills. 343 U.S. at 582. The President asserted that he had "inherent authority" to do so and that "his action was necessary to avert a national catastrophe which would inevitably result from a stoppage of steel production, and that in meeting this grave emergency the President was acting within the aggregate of his constitutional powers as the Nation's Chief Executive and the Commander in Chief." *Id.* at 582. When the President issued his order, the steel industry was in the midst of a nationwide labor dispute and the country was at war in Korea. *Id.* at 582-83. The President could not "rely on statutory authorization for this seizure" because the requirements for \*16 seizing property under any potentially applicable statute were not met, and because the very "use of the seizure technique to solve labor disputes" had been rejected by Congress. *Id.* at 585-86.

The Court held that the President violated the Constitution by seeking to exercise the Commander-in-Chief power in violation of a valid congressional enactment. As the Court explained, "the President's power to see that the laws are faithfully executed refutes the idea that he is to be a lawmaker." *Id.* at 587. Justice Jackson, in his now famous concurrence, further clarified the limitations on executive authority announced by the Court. Noting the "relativity" of the President's powers, Justice Jackson outlined the "legal consequences" of three separate exercises of executive authority: (1) "When the President acts pursuant to an express or implied authorization of Congress, his authority is at its maximum, for it includes all that he possesses in his own right plus all that Congress can delegate"; (2) "When the President acts in absence of either a congressional grant or denial of authority, he can only rely upon his own independent powers, but there is a zone of twilight in which he and Congress may have concurrent authority, or in which its distribution is uncertain"; (3) "When the President takes measures incompatible with the expressed or implied will of Congress, his power is at its lowest ebb, for then he can rely only upon his own constitutional powers minus any constitutional powers of Congress over the matter." *Id.* at 635-37 (Jackson, J., \*17 concurring); see *Dames & Moore v. Regan*, 453 U.S. 654, 668-69 (1981) (endorsing Jackson framework).

Analyzed in these terms, the President's power is at its lowest ebb here. In *Youngtown*, Congress had simply declined to enact an amendment that would have granted the President the power to seize the steel mills in a time of national emergency. 343 U.S. at 586. Here, Congress has *explicitly denied* the President the authority to engage in warrantless electronic surveillance of persons in the United States, even in a time of emergency, except pursuant to FISA's procedures. The Constitution provides, in mandatory language, that the President "shall take Care that the Laws be faithfully executed." U.S. Const. art. II, § 3 (emphasis added). Thus, where, as here, the President is acting with power at its "lowest ebb," courts "can sustain exclusive Presidential control ... only by *disabling the Congress from acting*

upon the subject." Youngstown, 343 U.S. at 637-38 (Jackson, J., concurring) (emphasis added).

The Supreme Court's recent *Hamdan* decision powerfully reaffirmed these principles in holding that the President had no authority to create military tribunals that violate statutory limitations Congress had imposed in the UCMJ. 126 S. Ct. at 2786. The Court noted that "[w]hether or not the President has independent power, absent congressional authorization, to convene military commissions, he may not disregard limitations that Congress has, in proper exercise of [his] own war \*18 powers, placed on his powers." *Id.* at 2774 n.23 (citing Youngstown, 343 U.S. at 637). That holding reinforced the limits on presidential power set forth in *Youngstown*. Indeed, the "[c]oncentration of power puts personal liberty in peril of arbitrary action by officials, an incursion the Constitution's three-part system is designed to avoid." *Id.* at 2800 (Kennedy, J. concurring).

In the present case, there are two related reasons why the Constitution does not disable the Congress from acting to safeguard the privacy rights and civil liberties of Americans and others in the United States. *First*, Congress has acted in an area squarely within its constitutionally assigned sphere--the protection of persons within the United States. *Second*, Congress has acted to ensure that the judiciary is able to carry out its constitutionally assigned responsibility under the Fourth Amendment.

#### A. The Constitution Does Not Disable Congress From Acting To Protect The Civil Liberties Of Americans In The United States.

Congress plainly has the authority to safeguard the rights of persons within the United States against arbitrary executive action. To be sure, foreign intelligence surveillance involves both domestic and international aspects, and applies in both peacetime and wartime. But the mere fact that a law with a domestic focus also relates to international relations or the military does not grant the President a right unilaterally to abrogate the law. In order for Congress to be "disabled" from acting, the asserted authority of the President must be *exclusive*. \*19 Even in the areas of foreign affairs and the military, executive power is not absolute. Indeed, Congress's authority to enact FISA is especially clear because FISA's focus is on the protection of the privacy and civil liberties of Americans in the United States--where legislative power is at its zenith. As the Supreme Court recently held, "[w]hatever power the United States Constitution envisions for the Executive in its exchanges with other nations or with enemy organizations in times of conflict, it most assuredly envisions a role for all three branches when individual liberties are at stake." Hamdi, 542 U.S. at 536 (emphasis added). Implementation of the constitutional protection against unreasonable searches and seizures, even in wartime, is likewise well within Congress's authority.

To grant the President the power to act outside of FISA, except in the rarest of circumstances, would be extremely dangerous. It would permit the President and the military to ignore *any* statute enacted to protect individual rights simply by asserting that such action is necessary to pursue al Qaeda, another terrorist group, or another foreign enemy. The authority is potentially infinite because there is no foreseeable end to the present campaign against terrorism. And it is limitless in scope. Although the Administration has asserted that it has limited the secret NSA program only to communications where one party is abroad, and only where there is a basis to believe there is a link to a particular terrorist group (al Qaeda), its claimed "inherent authority" is not so limited. Because it depends on the \*20 President's unreviewable assertion that a duly-enacted statute impedes efforts to combat international terrorism--even where the statute seeks to protect Americans in this country--the authority would permit him to conduct surveillance of domestic communications based merely on an NSA operative's determination that the communication has some link (however indirect) with terrorism (however the President defines it). Our Constitution does not permit such a disregard for the roles of the other two branches of our government.

#### B. The Executive Cannot Disregard The Warrant Procedure Established By Congress to Implement Americans' Fourth Amendment Rights.

Contrary to NSA's contention, the doctrine of "constitutional avoidance" counsels in favor of, not against, upholding

FISA. That is because the Fourth Amendment independently prohibits the Executive from disregarding the warrant requirement as implemented by statute to protect the right of Americans to be free from intrusive and potentially arbitrary searches and seizures. FISA “embodies a legislative judgment that court orders and other procedural safeguards are necessary to insure that electronic surveillance by the U.S. Government within this country conforms to the fundamental principles of the fourth amendment.” S. Rep. No. 95-701, at 13 (1978), as reprinted in 1978 U.S.C.C.A.N. 3973, 3982. Congress's creation of the FISC overcomes any perceived lack of judicial competence, swiftness, and secrecy that might have previously deterred some \*21 courts from enforcing the Fourth Amendment's warrant requirement in the area of foreign intelligence surveillance. Because of FISA and the judicial process it creates, there is no cause to recognize an exception to that warrant requirement for the NSA program, and the Fourth Amendment provides yet another basis to uphold Congress's power to protect the privacy rights of Americans and others in this country.

The NSA contends that the “state secrets” privilege prevents this Court from determining whether the NSA surveillance program violates the Fourth Amendment. That is incorrect. The Government has already disclosed sufficient facts about the NSA program for this Court to determine that it violates the Fourth Amendment, even if the state secrets privilege otherwise applies. Specifically, the Government has admitted that the NSA conducts warrantless electronic surveillance of persons within the United States covered by the requirements of FISA. Because (as will be shown) none of the narrow exceptions to the Fourth Amendment's warrant requirement applies here, the publicly available facts are sufficient to establish that the NSA program violates the Fourth Amendment.

“The basic purpose of th[e] [Fourth] Amendment ... is to safeguard the privacy and security of individuals against arbitrary invasion by governmental officials.” Camara v. Municipal Court, 387 U.S. 523, 528 (1967). It thus forbids “unreasonable searches and seizures,” and provides that “no Warrants shall issue, \*22 but upon probable cause.” U.S. Const. amend IV. The warrant requirement is a separate restriction, in addition to the requirement that all searches must be reasonable. See Keith, 407 U.S. at 315. Electronic surveillance is presumptively subject to that warrant requirement. With only a few exceptions, such surveillance “conducted outside the judicial process, without prior approval by judge or magistrate [is] *per se* unreasonable.” Katz v. United States, 389 U.S. 347, 357 (1967) (emphasis added). Before FISA, the Court had not decided whether there should be an exception to the warrant requirement for foreign intelligence (as opposed to domestic) electronic surveillance. But the Court made clear that such surveillance, while a necessary tool, is not “a welcome development—even when employed with restraint and under judicial supervision” because “[t]here is, understandably, a deep-seated uneasiness and apprehension that this capability will be used to intrude upon cherished privacy of law-abiding citizens.” Keith, 407 U.S. at 312. Thus, “the broad and unsuspected governmental incursions into conversational privacy which electronic surveillance entails necessitate the application of Fourth Amendment safeguards.” Id. at 313 (footnote omitted) “Official surveillance, whether its purpose be criminal investigation or ongoing intelligence gathering, risks infringement of constitutionally protected privacy ...” Id. at 320.

\*23 Through the warrant requirement, “the Constitution requires that the deliberate, impartial judgment of a judicial officer ... be interposed” between the citizen and the government. Katz, 389 U.S. at 357 (internal quotation marks omitted; alteration in original). The Warrant Clause “is not an inconvenience to be somehow weighed against the claims of police efficiency.” Keith, 407 U.S. at 315. Rather, it is “an important working part of our machinery of government, operating as a matter of course to check the ‘well-intentioned but mistakenly over-zealous executive officers.’” Id. at 316 (citation omitted). The central protection of the Fourth Amendment is the “‘neutral and detached magistrate.’” Id. (citation omitted). The Fourth Amendment thus “contemplates a *prior judicial* judgment, not the risk that executive discretion may be reasonably exercised.” Id. at 317 (emphasis added; footnote omitted).

The Supreme Court has recognized certain limited and specifically enumerated exceptions to the warrant requirement. Katz, 389 U.S. at 356-57. In Keith, however, the Court expressly rejected “the Government's argument that internal security matters are too subtle and complex for judicial evaluation” or that “prior judicial approval will fracture the secrecy essential to official intelligence gathering.” 407 U.S. at 320. Rather, the Court held that the President's constitutional role in ensuring domestic security “must be exercised in a manner compatible with the Fourth Amend-

ment,” which “requires an appropriate prior \*24 warrant procedure.” *Id.* The Court was concerned that “unreviewed executive discretion may yield too readily to pressures to obtain [intelligence information] and overlook potential invasions of privacy and protected speech.” *Id.* at 317. As the Court explained, “[s]ecurity surveillances are especially sensitive because of the inherent vagueness of the domestic security concept, the necessarily broad and continuing nature of the intelligence gathering, and the temptation to utilize such surveillances to oversee political dissent.” *Id.* at 320.

To be sure, *Keith* left open whether there might be a basis for an exception to the warrant requirement where electronic surveillance is conducted of foreign powers or their agents for *foreign* intelligence purposes. Since then, the Supreme Court has not taken up the issue, and the lower courts divided on the question. Courts directly addressing the question recognized such an exception in limited circumstances. See *United States v. Truong*, 629 F.2d 908, 916 (4th Cir. 1980); *United States v. Butenko*, 494 F.2d 593 (3d Cir. 1974) (en bane); *United States v. Brown*, 484 F.2d 418 (5th Cir. 1973). But in *Zweibon v. Mitchell*, 516 F.2d 594 (D.C. Cir. 1975) (en bane), a plurality of the D.C. Circuit rejected the notion that electronic surveillance for foreign intelligence purposes can be conducted without a warrant.

The very existence of FISA, and the judicial procedures it establishes, “moot the debate,” H.R. Rep. No. 95-1283, pt. I, at 24, by demonstrating conclusively \*25 that there is no basis for an exception to the warrant requirement in these circumstances, and therefore no inherent authority in the Executive to disregard Congress's warrant procedures. Any exception may be justified only by “compelling” reasons, *Mincey v. Arizona*, 437 U.S. 385, 394 (1978), and no such reasons exist after FISA. The pre-FISA cases finding an exception are simply inapplicable in a post-FISA world. Those cases balanced the President's interest in protecting the national security from foreign threats against the impediment of seeking prior judicial approval for electronic surveillance from a district court unfamiliar with and possibly unsuited to foreign intelligence issues. See, e.g., *Truong*, 629 F.2d at 912-916; *Butenko*, 494 F.2d at 605. But because these cases involved surveillance conducted *before* FISA, they did not weigh the requirement that the Executive go to a specialized court with streamlined procedures, and strict secrecy, to seek a warrant before engaging in such electronic surveillance. In fact, Congress eliminated the very concerns the pre-FISA courts cited to justify excusing the President from having to seek prior judicial authorization for foreign intelligence surveillance were addressed and eliminated by Congress when it created the FISC.

Indeed, the need to apply the warrant requirement to the electronic surveillance involved in the NSA program is particularly pronounced, because the targets of secret foreign intelligence surveillance will seldom, if ever, become \*26 aware of the surveillance unless they are subsequently indicted for a criminal offense. Thus, judicial review of the surveillance will rarely occur. In the domestic criminal context, the target must be given notice of the search upon the expiration of an order authorizing electronic surveillance. See 18 U.S.C. § 2518(8)(d). As the Supreme Court has noted, these notice procedures “satisfy constitutional requirements.” See *United States v. Donovan*, 429 U.S. 413, 429 n. 19 (1977) (citing, *inter alia*, *Katz*, 389 U.S. at 355-56). In contrast, the only privacy protections that targets of secret foreign surveillance are afforded from executive overreaching are FISA's minimization procedures and the judicial guardianship of the FISC. See 50 U.S.C. § 1805(a)(4); 50 U.S.C. § 1801(h); *United States v. Belfield*, 692 F.2d 141, 148 (D.C. Cir. 1982) (“In FISA the privacy rights of individuals are ensured not through mandatory disclosure [of surveillance logs], but through its provisions for in-depth oversight of FISA surveillance by all three branches of government and by a statutory scheme that to a large degree centers on an expanded conception of minimization that differs from that which governs law-enforcement surveillance”). The NSA's program eliminates both of these safeguards and, instead, substitutes the discretion of NSA operatives. It is therefore critical that such secret surveillance be subject to a warrant requirement so that a court can assure the existence of probable cause, the reasonableness of these searches, and that minimization safeguards are implemented. Moreover, the \*27 disclosure that under the NSA program surveillance may be initiated without a judicial finding of probable cause further demonstrates that, irrespective of the state secrets privilege, sufficient facts are available to determine that the program violates the Fourth Amendment.

Additionally, the fact that, absent a criminal prosecution, foreign intelligence searches are permanently secret makes them different from the “special needs” cases cited by NSA as support for warrantless searches. In “special needs

situations the person who is searched knows that he has been searched and knows the information that may have been disclosed. *See, e.g., Vernonia School District 47 J v. Acton*, 515 U.S. 646, 664-65 (1995) (upholding drug-testing for students participating in school athletics program); *Michigan Dep't of State Police v. Sitz*, 496 U.S. 444, 449-55 (1990) (upholding checkpoint to screen for drunk drivers). The person, therefore, has the ability to challenge the search and vindicate his Fourth Amendment rights. *See United States v. Martinez-Fuerte*, 428 U.S. 543, 559 (1976) (finding that "[r]outine checkpoint stops" were reasonable because "a claim that a particular exercise of discretion in locating or operating a checkpoint is unreasonable is subject to post-stop judicial review.").

Furthermore, individuals subjected to "special needs" searches may use other methods to remedy negative consequences of the search, such as seeking to expunge or clarify the seized information. Individuals subjected to secret \*28 electronic surveillance have no such opportunity, *see* 5 U.S.C. § 552a(k)(1) (exempting properly classified material from disclosure under the Privacy Act of 1974), even though electronic surveillance reveals significantly more personal information than special needs searches, and that information may be retained in various government files and used to the detriment of the person searched in various ways.

In considering whether there is an exception to the presumptive warrant requirement, it is proper for this Court to look to Congress's judgment to determine that current circumstances compel no such exception. *Cf. United States v. Watson*, 423 U.S. 411, 415 (1976). Indeed, the Supreme Court encouraged Congress to impose procedures for obtaining a warrant for electronic surveillance for domestic security threats. *See Keith*, 407 U.S. at 324 (requiring "prior judicial approval ... of domestic security surveillance ... as the Congress may prescribe").

Thus, all the factors potentially counseling against requiring the President to seek prior judicial approval for foreign intelligence surveillance by a federal district court are absent when the President can seek such approval from the FISC. By contrast, the concern that the Executive can and will infringe, even inadvertently, on the privacy and free speech rights of Americans is ever constant. The potential for abuse of civil liberties is particularly acute in the realm of foreign intelligence gathering because the perceived stakes are higher, the Executive acts \*29 with the utmost secrecy, and foreign intelligence officers are less accustomed than law enforcement officers to the privacy concerns presented by the Fourth Amendment. The warrant requirement exists precisely so that neutral and detached magistrates will ensure that executive officers in fact possess probable cause for a contemplated search and that the search is appropriately limited. The NSA's secret, warrantless program lacks these critical protections. And because of the secrecy of the program, there is no way for anyone to know if probable cause exists and the search is reasonable.

Not only are the very persons who may be impinging on the privacy rights of Americans unilaterally judging the reasonableness of their own actions, they have, until recently, done so without any public knowledge or scrutiny of their activities. But even assuming for the sake of argument that these intelligence officers are safeguarding personal liberties with the greatest of care, the Constitution still requires prior review of their judgments by a disinterested magistrate. *See Katz*, 389 U.S. at 356 ("It is apparent that the agents in this case acted with restraint. Yet the inescapable fact is that this restraint was imposed by the agents themselves, not by a judicial officer."). "[A] governmental search and seizure should represent both the efforts of the officer to gather evidence of wrongful acts and the judgment of the magistrate that the collected evidence is sufficient to justify invasion of a citizens' private ... conversation[s]." \*30 *Keith*, 407 U.S. at 316. When the disinterested judgment of the neutral magistrate is eliminated, all that is left is "unreviewed executive discretion." *Id.* at 317.

The Fourth Amendment thus undergirds and reinforces FISA's requirement that the government obtain a warrant in order to engage in foreign intelligence surveillance of persons in the United States. Any concerns potentially counseling against enforcing the warrant requirement in the foreign intelligence realm have been absent for the better part of thirty years, and the threat to individual liberties by an unchecked Executive is, if anything, magnified in the current environment. Accordingly, there is no basis for determining that the President has inherent authority to disregard the warrant requirement enacted by Congress to safeguard the Fourth Amendment rights of persons in the United States.

#### CONCLUSION

2006 WL 4055623 (C.A.6)
