

# Call Detail Records

Federal Law Enforcement Training Center

Mobile Device Investigations Program

Homeland  
Security

# Call Detail Records are...

- Composed of fields that “detail” the phone’s network exchange
- Available in various formats (.xls or .html...) depending on the carrier

**Homeland  
Security**

# Call Detail Records include but are not limited to...

- The MDN/MIN initiating the exchange
- The MDN/MIN receiving the exchange
- When the call/SMS was initiated (time/date stamp)
- Duration of the phone call
- Identifier or system of the telephone exchange writing the record

**Homeland  
Security**

# Call Detail Records include but are not limited to...

- Sequence number of the record
- Result of the call (answered, busy etc)
- Switch identification or routing by which the call initiated the exchange
- Switch identification or routing by which the call finalized the exchange
- Call type (voice, SMS, etc)
