

Homeland Security

June 26, 2008

Mr. David L. Sobel
Electronic Frontier Foundation
1875 Connecticut Avenue, N.W.
Suite 650
Washington, DC 20009

Re: **DHS/OS/PRIV 07-160/Sobel request**

Dear Mr. Sobel:

This is the fourteenth partial release to your Freedom of Information Act (FOIA) requests to the Department of Homeland Security (DHS), dated November 7, 2006 and December 6, 2006, requesting DHS records concerning the Automated Targeting System (ATS). These two requests were aggregated to simplify processing. The following is a consolidated list of records requested:

1. All Privacy Impact Assessments prepared for the ATS system or any predecessor system that served the same function but bore a different name.
2. A Memorandum of Understanding executed on or about March 9, 2005 between Customs and Border Protection (CBP) and the Canada Border Services Agency to facilitate the Automated Exchange of Lookouts and the Exchange of Advance Passenger Information.
3. All records, including Privacy Act notices, which discuss or describe the use of personally-identifiable information by the CBP (or its predecessors) for purposes of screening air and sea travelers.
4. All System of Records Notices (SORNs) that discuss or describe targeting, screening, or assigning "risk assessments" of U.S. citizens by CBP or its predecessors.
5. All records that discuss or describe the redress that is available to individuals who believe that the ATS contains or utilizes inaccurate, incomplete or outdated information about them.
6. All records that discuss or describe the potential consequences that individuals might experience as a result of the agency's use of the ATS, including but not limited to arrest, physical searches, surveillance, denial of the opportunity to travel, and loss of employment opportunities.
7. All records that discuss or identify the number of individuals who have been arrested as a result of screening by the ATS and the offenses for which they were charged.
8. All complaints received from individuals concerning actions taken by the agency as a result of ATS "risk assessments" or other information contained in the ATS, and the agency's response to those complaints.
9. All records that discuss or describe Section 514 of the Department of Homeland Security Appropriations Act, 2007, P.L. 109-295 (H.R. 5441) and its prohibition against the development or testing of "algorithms assigning risk to passengers whose names are not on Government watch lists."
10. All records that address any of the following issues:
 - a. Whether a system of due process exists whereby aviation passengers determined to pose a threat are either delayed or prohibited from boarding their scheduled flights may appeal such decision and correct erroneous information contained in the ATS;

- b. Whether the underlying error rate of the government and private databases that will be used in the ATS to assign a risk level to an individual will not produce a large number of false positives that will result in a significant number of individuals being treated mistakenly or security resources being diverted;
- c. Whether the agency has stress-tested and demonstrated the efficacy and accuracy of all search tools in the ATS and has demonstrated that the ATS can make an accurate predictive assessment of those individuals who may constitute a threat;
- d. Whether the Secretary of Homeland Security has established an internal oversight board to monitor the manner in which the ATS is being developed and prepared;
- e. Whether the agency has built in sufficient operational safeguards to reduce the opportunities for abuse;
- f. Whether substantial security measures are in place to protect the ATS from unauthorized access by hackers or other intruders;
- g. Whether the agency has adopted policies establishing effective oversight of the use and operation of the system;
- h. Whether there are no specific privacy concerns with the technological architecture of the system;
- i. Whether the agency has, pursuant to the requirements of section 44903(i)(2)(A) of Title 49, United States Code, modified the ATS with respect to intrastate transportation to accommodate states with unique air transportation needs and passengers who might otherwise regularly trigger a high risk status; and
- j. Whether appropriate life-cycle estimates, expenditure and program plans exist.

A search directed to CBP has produced an additional 46 pages of records responsive to your request. We have determined that 27 pages are releasable to you in full or with certain information withheld pursuant to Exemptions 2(low) and (high), 5, 6, and 7 of the FOIA, and 19 pages are withheld in their entirety pursuant to Exemptions 2(low) and (high), 5, 6, and 7 of the FOIA.

Enclosed are 27 pages of releasable information. The withheld information, consists of names or initials, deliberative material, legal opinions, law enforcement information, and homeland security information. I am withholding this information pursuant to Exemptions 2, 5, 6, and 7E of the FOIA, 5 U.S.C. §§ 552 (b)(2), (b)(5), (b)(6), and (b)(7)(E).

Also enclosed are 8 blank sheets with several numbers that represent withheld documents. Each number corresponds to a page of withheld information and has the appropriate exemptions that apply to that document. In this instance, there are 19 pages of withheld information that comprise 8 documents.

Exemption 2(low) exempts from disclosure records that are related to internal matters of a relatively trivial nature, such as internal administrative tracking. Exemption 2(high) protects information disclosure of which would risk the circumvention of a statute or agency regulation. Included within such information may be operating rules, guidelines, manuals of procedures for examiners or adjudicators, and homeland security information.

Exemption 5 protects from disclosure those inter- or intra-agency documents that are normally privileged in the civil discovery context. The deliberative process privilege protects the integrity of the deliberative or decision-making processes within the agency by exempting from mandatory disclosure opinions, conclusions, and recommendations included within inter-agency or intra-agency memoranda or letters. The release of this internal information would discourage the expression of candid opinions and inhibit the free and frank exchange of information among agency personnel. The attorney-client privilege protects confidential communications between an attorney and his client relating to a legal matter for which the client has sought professional advice. It applies to facts divulged by a client to his attorney, and encompasses any

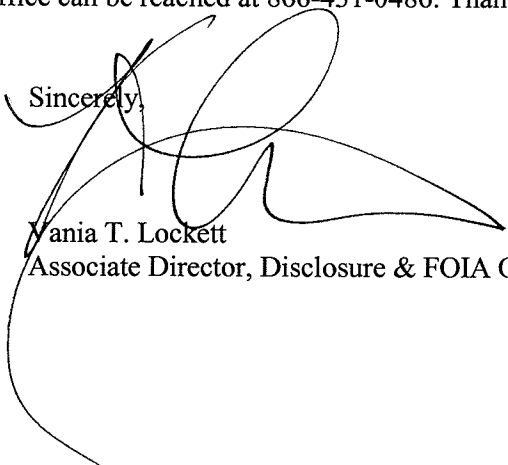

opinions given by an attorney to his client based upon, and thus reflecting, those facts, as well as communications between attorneys that reflect client-supplied information.

Exemption 6 exempts from disclosure records the release of which would cause a clearly unwarranted invasion of personal privacy.

Exemption 7E protects records compiled for law enforcement purposes, the release of which would disclose techniques and/or procedures for law enforcement investigations or prosecutions, or would disclose guidelines for law enforcement investigations or prosecutions if such disclosure could reasonably be expected to risk circumvention of the law.

As stated in the February 1, 2008 Status Report for the litigation which encompasses this FOIA request, we are continuing to process your request with regard to documents located at the following CBP Offices: Office of Field Operations, National Targeting and Security, Office of Chief Counsel, and Office of Information and Technology. If you have any questions regarding this matter, please refer to **DHS/OS/PRIV 07-160/Sobel request**. This office can be reached at 866-431-0486. Thank you for your patience as we proceed with your request.

Sincerely,

Yania T. Lockett
Associate Director, Disclosure & FOIA Operations

Subject: ATS-P Enhancements

(b)(6)

We commenced ATS-P Threshold Targeting on July 22, 2004 at the port of Chicago and are currently at 12 POE's. We developed the user requirements at the NTC rather quickly, knowing that some of the capability that OFO was seeking would take some development time on behalf of OIT. As you know, we will be visiting JFK tomorrow to see the Threshold Targeting process firsthand. Additionally, we are hosting a Threshold Targeting conference next week at the NTC to discuss lessons learned, current best practices, and ways to move forward.

003240

We believe that after our visit to JFK, and after the threshold Targeting conference, we will have a much better handle on where we would like to go operationally with Threshold Targeting. Our understanding is that there are still a few areas of ATIS-P Threshold Targeting, that were discussed in the initial group, that may be in development and ready for production relatively soon. Upon completion of our visit to JFK and the Threshold targeting conference, it would look really great for OIT and OFO, if we were able to advise the Commissioner that additional enhancements are coming on line in the next few weeks. I have identified below the areas that are in production and the areas that may currently be in development.

003241

There may be additions, deletions, or alterations to the list below depending on the outcome of our visit to JFK and the recommendations from our Threshold Targeting conference.

Subject: Re: ATS and TECS

It is not quite as straight forward as you would like. There is no SORN for ATS and ATS is not referenced in the TECS SORN.

ATS is not a transactional system and does not really have any data of its own. ATS gets most of its data from other places, including TECS (e.g. seizure data, crossing data, I-94, subjects; stc...). The TECS SORN covers all of the record sources currently used by ATS; the TECS SORN says it is used by Customs Officers and officers from other federal agencies. It also says 'routine use' of the data includes passenger processing. Given all of that, (b)(6), (b)(6) (Delib, AO)

... We propagate the TECS data to a lot of places. (b)(5) (Delib AO)

(b)(5) Delib

Hope this helps

Subject: ATS and TECS

(b)(6) Thanks for returning my call the other day. I just had a question. I was speaking to (b)(6) regarding PNR relative to the EU negotiations and the topic of system of record came up.

(b)(6), (b)(6) Do you have any

such information?

Thanks - (b)(6)
